Judicial Determination of Capacity of Older Adults in Guardianship Proceedings

This book deals with sentencing in international criminal law, focusing on the approach of the UN ad hoc Tribunals for the former Yugoslavia (ICTY) and Rwanda (ICTR). In contrast to sentencing in domestic jurisdictions, and in spite of its growing importance, sentencing law is a part of international criminal law that is

still 'under construction' and is unregulated in many aspects. International sentencing law and practice is not yet defined by exact norms and principles and as yet there is no body of international principles concerning the determination of sentence, notwithstanding the huge volume of sentencing research and the extensive modern debate about sentencing principles. Moreover international judges receive very little guidance in sentencing matters: this contributes to inconsistencies and may increase the risk that similar cases will be sentenced in different ways. One purpose of this book is to investigate and evaluate the process of international sentencing, especially as interpreted by the ICTY and the ICTR, and to suggest a more comprehensive and coherent system of guiding principles, which will foster the development of a law of sentencing for international criminal justice. The book discusses the law and jurisprudence of the ad hoc Tribunals, and also presents an empirical analysis of influential factors and other data from ICTY and ICTR sentencing practice, thus offering quantitative support for the doctrinal analysis. This publication is one of the first to be entirely devoted to the process of sentencing in international criminal justice. The book will thus be of great interest to practitioners, academics and students of the subject.

China's Laws

2006

This is a book about the improbable: seeking legal relief for pollution in contemporary China. In a country known for tight political control and ineffectual

courts, Environmental Litigation in China unravels how everyday justice works: how judges make decisions, why lawyers take cases, and how international influence matters. It is a readable account of how the leadership's mixed signals and political ambivalence play out on the ground - propelling some, such as the village doctor who fought a chemical plant for more than a decade, even as others back away from risk. Yet this remarkable book shows that even in a country where expectations would be that law wouldn't much matter, environmental litigation provides a sliver of space for legal professionals to explore new roles and, in so doing, probe the boundary of what is politically possible.

Implementation of the Growth and Poverty Reduction Strategy (GPRS II), 2006-2009

The reform of the European Constitution continues to dominate news headlines and has provoked a massive debate, unprecedented in the history of EU law. Against this backdrop Monica Claes' book offers a "bottom up" view of how the Constitution might work, taking the viewpoint of the national courts as her starting point, and at the same time returning to fundamental principles in order to interrogate the myths of Community law. Adopting a broad, comparative approach, she analyses the basic doctrines of Community law from both national constitutional perspectives as well as the more usual European perspective. It is only by combining the perspectives of the EU and national constitutions, she argues, that a complete picture can be obtained, and a solid theoretical base (constitutional pluralism) developed. Her comparative analysis encompasses the law in France, Belgium, Denmark, the Netherlands, Germany, Ireland, Italy and the United Kingdom and in the course of her inquiry discusses a wide variety of prominent problems. The book is structured around three main themes, coinciding with three periods in the development of the judicial dialogue between the ECJ and the national courts. The first focuses on the ordinary non-constitutional national courts and how they have successfully adapted to the mandates developed by the ECJ in *Simmenthal* and *Francovich*. The second examines the constitutional and other review courts and discusses the gradual transformation of the ECJ into a constitutional court, and its relationship to the national constitutional courts. The contrast is marked; these courts are not specifically empowered by the case law of the ECJ and have reacted quite differently to the message from Luxembourg, leaving them apparently on collision course with the ECJ in the areas of judicial Kompetenz Kompetenz and fundamental rights. The third theme reprises the first two and places them in the context of the current debate on the Constitution for Europe and the Convention, taking the perspective of the national courts as the starting point for a wide-ranging examination of EU's constitutional fundamentals. In so doing it argues that the new Constitution must accommodate the national perspective if it is to prove effective.

This book makes a unique contribution to the study of gay rights politics by assessing the laws and policies governing the rights of gay children and gay families. The focus of the analysis will be on decision-making by state and lower federal courts—the very courts where the bulk of these questions are likely to be

resolved.

This study provides an up-to-date empirical account of Chinese female judges within the context of the Chinese legal system and wider society, revealing a deeper understanding of women in contemporary China. Shen explores the gendered nature of judging in post-Mao China by examining: who female judges are, what they do, and their position in relation to their profession. She goes on to argue for true representation of women in the judiciary, including their contributions in judging, and the importance of judicial diversity. The book examines the place held by female judges at home and women's place in society as a whole, and investigates gender equality, women's agencies, emancipation, and empowerment in the contemporary China. Based on data resulting from original research, this book provides a much-needed contribution to contemporary women's studies. Addressing a broad range of issues surrounding gender and justice in the Chinese judicial system, this engaging study will be of special interest to scholars and activists involved with judicial diversity, gender politics, and gender equality.

Official Congressional Directory, 2005-2006

This volume analyzes whether China's thirty years of legal reform have taken root in Chinese society by examining how ordinary citizens are using the legal system in contemporary China. It is an interdisciplinary look at law in action and at legal institutions from the bottom up, that is, beginning with those at the ground level that are using and working in the legal system. It explores the emergent Chinese conception of justice - one that seeks to balance Chinese tradition, socialist legacies and the needs of the global market. Given the political dimension of dispute resolution in creating, settling and changing social norms, this volume contributes to a greater understanding of political and social change in China today and of the process of legal reform generally.

Writing in the sixth edition of this Handbook, author Michael Fordham described his ambition when writing the first edition (and indeed all subsequent editions) of this book as "to read as many judicial review cases as I could and to try to extract, classify and present illustrations and statements of principle". Behind this aim lay the practitioner's overwhelming need to know and understand the case-law. Without it, as Fordham says "much can be achieved in public law through instinct, experience and familiarity with general principles which are broad, flexible and designed to accord with common sense". But with knowledge of the case law comes the vital ability to be able to point to and rely on an authoritative statement of principle and working illustration. Knowing the case-law is crucial: "the challenge is to find it". This, the sixth edition of the Handbook, continues the tradition established by earlier editions, in rendering the voluminous case-law accessible and knowable. This Handbook remains an indispensable source of reference and a guide to the case-law in judicial review. Established as an essential part of the library of any practitioner engaged in public law cases, the Judicial Review Handbook offers unrivalled coverage of administrative law, including, but not confined to, the work of the Administrative Court and its procedures. Once again completely revised and up-dated, the sixth edition approximates to a restatement of the law of judicial review, organised around 63 legal principles, each supported by a comprehensive presentation of the sources and an unequalled selection of reported case quotations. It also includes essential procedural rules, forms and guidance issued by the Administrative Court. As in the previous edition, both the Civil Procedure Rules and Human Rights Act 1998 feature prominently as major influences on the shaping of the case-law. Their impact, and the plethora of cases which explore their meaning and application, were fully analysed and evaluated in the previous edition, but this time around their importance has grown exponentially and is reflected in even greater attention being given to their respective roles. Attention is also given to another new development - the coming into existence of the Supreme Court. Here Michael Fordham casts an experienced eye over the Court's work in the area of judicial review, and assesses the early signs from a Court that is expected to be one of the key influences in the development of judicial review in the modern era. The author, a leading member of the English public law bar, has been involved in many of the leading judicial review cases in recent years and is the founding editor of the Judicial Review journal. "an

institution for those who practise public law it has the authority that comes from being compiled by an author of singular distinction". (Lord Woolf, from the Foreword to the Fifth Edition)

This thesis focuses on the interim protection of the individual in the Community legal order. An analysis will be made of the avenues available to individuals for requesting interim relief when a case is brought before the European or the national courts. An extensive examination of the relevant case law will be performed to reveal what appears to be an evolving concept of the individual's interim protection in the European Community structure and to suggest any possible changes in order to guarantee an effective remedy of interim relief.

The Interim Protection of Individuals Before the European and National Courts

This volume addresses several core questions regarding the nature of law in China and its future development. In particular, these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party. Beginning virtually from scratch, China has established a comprehensive legal system that boasts a constitution, primary and secondary legislation and plentiful regulations covering most areas of public and private life. Yet, as these articles discuss, its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights, ensuring that the law is subordinate to national public policy goals. Legal and extra-legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law. Ultimately, the question is therefore whether China's legal system, if eschewing formalised human rights, is developing a capacity to protect fundamental human dignity.

The European Union (EU) is making strong inroads into areas of security traditionally reserved to states, especially into internal security, or Justice and Home Affairs. The Area of Freedom, Security and Justice (AFSJ), as it has been

renamed in the Amsterdam Treaty, has seen significant policy developments since the late 1990s. In fact, there has been no other example of a policy-making area making its way so quickly and comprehensively to the centre of the treaties and to the top of the EU's policy-making agenda. After major treaty revisions in Maastricht, Amsterdam, Nice, and, finally the Lisbon Treaty, which entered into force on 1 December 2009, as well as an increased political impetus through the European Council Summits in Tampere (1999), the Hague (2004), and Stockholm (2009), the area appears as one of the most promising policy fields for integration in the EU in the foreseeable future. This process has deepened even more significantly after the terrorist attacks on 11 September 2001 in the United States, on 11 March 2004 in Madrid, and on 7 July 2005 in London. This book is the first to analyse these hugely topical developments in European internal security at both the treaty and policy levels, as well as its implementation at the national level, from various disciplinary perspectives (political science, law, criminology, etc). This book was published as a special edition of European Security.
