The Investment Dealers' Digest

Terrorism has returned to the streets of Northern Ireland. In the years after the 1998 Real IRA bombing of Omagh, which killed 29 people, violent dissident Republican groups have re-emerged as a major security threat to a region that has been denied peace, stability, and prosperity for too long. Those responsible have many names. They are breakaways, splinter factions, spoilers, and "residual" terrorists. The Real IRA, Continuity IRA, and Óglaigh na hÉireann are only some of the groups now responsible for a growing wave of bombings, shootings, threats, and intimidation across Northern Ireland. Commonly known as "the dissidents," these are the rejectionists for whom there seems to be no negotiated settlement, no peace deal, no consensus solution that will convince them to accept the will of the majority of the people on the island of Ireland. *Divided We Stand: The Strategy and Psychology of Ireland's Dissident Terrorists* presents the results of meticulous research conducted by the International Center for the Study of Terrorism at the Pennsylvania State University. Since 2007, John Horgan, Director of the center, has led a research project to monitor the activities of Ireland's new terrorists. Drawing on one of the largest open-source militant databases ever assembled, *Divided We Stand* describes the activities, histories, motivations, psychology, and strategy of the small, dynamic, and rapidly evolving splinter groups that continue to erode peace, stability, and normalization in Northern Ireland.

Contains detailed information on the various appropriations and funds that constitute the budget and is designed primarily for the use of the Appropriations Committee. The Appendix contains more detailed financial information on individual programs and appropriation accounts than any of the other budget documents. It includes for each agency: the proposed text of appropriations language, budget schedules for each account, new legislative proposals, and explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or group of agencies. Information is also provided on certain activities whose outlays are not part of the budget totals.

Today, governmental archivists and manuscript collectors—both private collectors and collecting repositories—are in conflict and competition for government documents that come out of private hands and onto the market. This book presents both sides of the issue and examines them dispassionately. It includes a historical review of institutional and state-sponsored collecting of documents, an evaluation of state and federal statutes on public documents in private hands, a careful look at the perspectives of the various parties involved in the conflict, and tales of theft and neglect as well as helpful case studies.

Study on Investment Advisers and Broker-Dealers

The amount of money flowing through U.S. politics continues to astound. "While not all expenditures are reported," writes David Magleby, "our best estimate is that at least \$8 billion was spent in the 2012 federal elections." In this essential volume, the latest in a quadrennial series dating back to 1960, Magleby and his colleagues reveal where all this the money came from, where it went, what were the results—and why it matters. Anthony Corrado examines the most important changes and legal challenges to the law and regulation of campaign finance leading up to the 2012 election. John Green, Michael Koehler, and Ian Schwarber discuss the dynamics and funding of the Republicans' presidential nomination contest as well as the Obama campaign's activity—including the role his Priorities USA "Super PAC" played in negatively defining Romney. Candice Nelson examines in considerable detail how each side raised and spent its funds and the implications of their different approaches. Paul Herrnson, Kelly Patterson, and Stephanie Perry Curtis explore the financing of congressional elections. Diana Dwyre and Robin Kolodny examine the ways political parties raised and spent money through their national

committees, including congressional campaign committees. Jay Goodliffe and Magleby examine how interest groups raised and spent money—closely examining the effect of the new Super PACs. How did these organizations raise more than \$828 million, and how did they allot the \$609 million they reported spending, and to what effect? Thomas Mann concludes with a summary of lessons recently learned regarding the financing of federal elections. What changes should be made to the system, and what institutional steps would they require?

Lemon-Aid Used Cars and Trucks 2011-2012

Discusses a number of significant steps that the SEC has taken over the past two years in their divisions and offices to reform and improve their operations. As part of that effort, the SEC has revitalized and restructured enforcement and examination functions, revamped the handling of tips and complaints, taken steps to break down internal silos and create a culture of collaboration, improved their risk assessment capabilities, begun to recruit more staff with specialized expertise and real world experience, and enhanced safeguards for investors' assets. This is a print on demand edition of an important, hard-to-find publication.

Retail investors seek guidance from broker-dealers and investment advisers (BD&IA) to manage their invest. and to meet their own and their families' financial goals. BD&IA are regulated extensively, but the regulatory regimes differ, and BD&IA are subject to different standards under fed. law when providing invest. advice (IA) about securities. This report evaluated: (1) The effectiveness of existing legal standards of care for providing personalized IA and recommend. about securities to retail customers; and (2) Whether there are legal gaps in regulatory standards in the protection of retail customers relating to providing personalized IA about securities to retail customers that should be addressed by statute. This is print on demand report.

Appendix, Budget of the United States Government, Fiscal Year 2011

This books examines an increasingly popular but controversial set of agricultural development programmes promoting smallholder agriculture and food security in low income countries, particularly in Africa, Drawing on and developing theory on these programmes, and on a wider review of recent experience in Africa, the authors provide a detailed analysis of the historical, political and agro-economic roots and context of Malawi's agricultural programme from 2005 to2011, a large and controversial programme that has been the subject a very considerable but unfortunately little informed international debate. As well as a fascinating account of the history ofdevelopment and current constraints on smallholder farming in Malawi and of the implementation of a large scale national programme, this provides critical insights into the potential benefits and risks with such programmes, and on political and technical issues that are critical in success or failure.

Drugs on the Dark Net

Scrap and Precious Metal Dealers Bill 2011

The authors provide insight into the world of college drug dealers, affluent, upwardly mobile students who have everything to lose and little to gain, and offer an important corrective to the traditional distorted view of the US drug trade as primarily involving poor minorities. Drawing on six years of fieldwork at a predominately white private university, their ethnography explores issues of deviance, race, and stratification in the US war on drugs.

The Fundamentals of Municipal Bonds

The definitive new edition of the most trusted book on municipal bonds As of the end of 1998, municipal bonds, issued by state or local governments to finance public works programs, such as the building of schools, streets, and electrical grids, totaled almost \$1.5 trillion in outstanding debt, a number that has only increased over time. The market for these bonds is comprised of many types of professionals—investment bankers, underwriters, traders, analysts, attorneys, rating agencies, brokers, and regulators—who are paid interest and principal according to a fixed schedule. Intended for investment professionals interested in how US municipal bonds work, *The Fundamentals of Municipal Bonds, Sixth Edition* explains the bond contract and recent changes in this market, providing investors with the information and tools they need to make bonds reliable parts of their portfolios. The market is very different from when the fifth edition was published more than ten years ago, and this revision reasserts *Fundamentals of Municipal Bonds* as the preeminent text in the field Explores the basics of municipal securities, including the issuers, the primary market, and the secondary market Key areas, such as investing in bonds, credit analysis, interest rates, and regulatory and disclosure requirements, are covered in detail This revised edition includes appendixes, a glossary, and a list of financial products related to applying the fundamentals of municipal bonds An official book of the Securities Industry and Financial Markets Association (SIFMA) With today's financial market in recovery and still highly volatile, investors are looking for a safe and steady way to grow their money without having to invest in stocks. The bond market has always been a safe haven, although confusing new bonds and bond funds make it increasingly difficult for unfamiliar investors to decide on the most suitable fixed income investments.

Switzerland: Detailed Assessment of Implementation-IOSCO Objectives and Principles of Securities Regulation

In *Outraged*, an auto insider provides an inspiring account of what it means to lose your rights, property, and, in essence, the American dream. It begins with roughly two thousand men and women whose companies were destroyed by two automakers, General Motors and Chrysler, during their government-led corporate restructurings in 2009. Authors Tamara Darvish, vice president of DARCARS Automotive in Maryland, and Lillie Guyer, a Detroit area automotive journalist, show the collapse of the American dream from the perspective of an entrepreneur who was affected by the automotive industry bailout. In this featurized business story, *Outraged* details the founding of the activist group Committee to Restore Dealer Rights and its efforts to regain the economic rights of auto dealerships throughout the United States. It tells how they took their fight to Congress and to the steps of the White House. *Outraged* candidly examines the battles between dealers and the entities that engineered their demise. It also details the pain and the high points in government as its temporary power brokers ignore the significant role of Congress in lawmaking and the rights of ordinary citizens. This personal, controversial account shows what can happen when people unite in a common cause and stand up for what they believe is right.
