The Mitsubishi Pajero was first launched in 1983, creating a new class of 4x4, smaller and more affordable than the Range Rover. Renamed Shogun for the UK market, and Montero for Spain and the Americas, this rugged, yet refined, off-roader rapidly became Mitsubishi's best-selling export product. In the 22 years since its introduction, the Shogun's popularity has gone from strength to strength, and in the UK grey imports of Pajeros now outnumber official Shoguns, while the Shogun brand has expanded to include the Shogun Sport and the Shogun Pinin. This fascinating book is essential reading for all Shogun owners and enthusiasts.

A trace element (TE) is a chemical element presented below ~ 0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are

discussed in management and prognosis of endometriosis and premature ovarian failure (POF).
