**OECD Reviews of Evaluation and Assessment in Education:**

## **Mexico 2012**

This book provides, from an international perspective, an independent analysis of major issues facing the educational evaluation and assessment framework, current policy initiatives, and possible future approaches in Mexico.

## **The Radio Amateur's Handbook**

The Demo Docs System of instruction replicates the classroom experience by providing more “I get it” moments outside of class. We’ve talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students understand (or “get it”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. & On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. & The Demo Docs system helps to recreate the “I get it” moments outside of class-keeping both you and the students on track.

The latest in the Hot Blood series is a collection of terrifying and titillating stories by authors who embrace the seductive side of horror--where what happens in the dark stays in the dark.

## **Government Reports Annual Index**

The U.S. Naval Institute Wheel Books provide valuable information, pragmatic advice, and cogent analysis on topics important to all naval professionals. Drawn from the U.S. Naval Institute's vast archives, the series combines articles from the Institute's flagship publication Proceedings, selections from the oral history collection, and Naval Institute Press books to create unique guides on a wide array of fundamental professional subjects.

## **Stranger by Night**

Beguiling and bewitching stories from Ramsey Campbell, Brian Lumley, Graham Masterton, and others will give you goosebumps—in more ways than one . . . Sex and horror, intertwined since the beginning of the human race, take on all new twists, turns, and contortions in *Stranger by Night*, sixth in the Hot Blood erotic horror anthology series—with one of its most illustrious lists of contributors. Two of the United Kingdom's greatest horror writers, Ramsey Campbell and Brian Lumley, both appear. Actress and scream queen Brinke Stevens contributes original fiction. Comics illustrator and TV writer Bruce Jones features in the Hot Blood series for the first time, while Graham Masterton returns with another classic. Lucy Taylor and Brian Hodge are among the other brilliant horror writers, eighteen stories in all,

that probe every dark desire. The Heliocentric Net said, “whatever your tastes, be prepared to be titillated and terrorized,” and according to Deathrealm, “Stranger by Night demonstrates that the Hot Blood books haven’t lost their steam in any sense of the phrase.” Praise for the Hot Blood series “Read Hot Blood late at night when the wind is blowing hard and the moon is full.” —Playboy “Outstanding . . . A daring combination of sex and terror.” —Cemetery Dance “Will appeal to your every kink.” —Locus “Seek out this one (or its predecessors) for some naughty fun.” —Booklovers

Fifty percent of American voters define themselves as political moderates, two-

thirds favor political solutions that come from the center of the political spectrum, and Independents outnumber both Democrats and Republicans. Bill Clinton and George W. Bush each explicitly used Centrist strategies to win the White House—and twenty-first-century candidates will be compelled to do the same. Independent Nation documents the rich history of the defining political movement of our time. Organized as a series of short and colorful political biographies, it offers an insightful and engaging analysis of the successes and failures of key Centrist leaders throughout the twentieth century. In the process, it demonstrates that Centrism is not only a winning political strategy but an enlightened governing philosophy that best reflects the will of the people by putting patriotism ahead of partisanship and the national interest ahead of special interests.

Dyletri, God of Fertility, has locked away his powers. No woman is allowed to touch him, not until he can return his long-dead lover back to life. All he has to do is sacrifice one human girl. A girl who unlocks his powers and rips his dormant lust right out of his body. Trapped by his promise, Dyletri has no choice but to watch her die, no matter how much he wants her. Yet the darkness of his calling is spiraling within him, demanding he claim the human as his. If he goes back on his promise, the energy of the Fates will cause untold destruction in the Universe. That doesn't change how Dyletri's begun exhibiting symptoms that point to more than

just lust. How does he allow Ismini to die when she's come to own him from the inside out?

In the suspenseful new thriller from New York Times bestselling coauthors Sherrilyn Kenyon and Dianna Love, a Bureau of American Defense agent must join forces with an informant he can neither trust nor resist. Bureau of American Defense operative Carlos Delgado has spent the past sixteen years watching over his shoulder, waiting for death to catch up to him. His luck runs out when BAD intercepts an unexpected tip on the number one threat to United States security: the Fratelli de il Sovrano. Their best hope for uncovering a deadly plan that risks countless lives and threatens economic chaos just days before the presidential election is to capture a mysterious informant known as Mirage. But when Carlos takes her into custody, Mirage is not at all what he expected -- and neither is the threat she poses to the secrets he would die to protect. Gabrielle Saxe has hidden from a killer for the past decade, sending anonymous tips on international criminals to intelligence agencies around the world. When a postcard arrives from a friend who is supposed to be dead, she takes a risk that catapults her into the midst of dangerous operatives on a treacherous mission -- and into the arms of a man who is duty-bound to surrender her to Interpol as an international felon. Carlos is the last person Gabrielle should trust and the only one standing between her and death. But little does she know, she holds the key to his survival as well.

This publication is the outcome of work of the UNECE Group of Experts on Euro-Asian Transport Links (EATL) in phase III of the project (2013-2017). The report was drafted by a consultant from the Scientific and Research Institute of Motor Transport (NIIAT) in Moscow and is focused both at coordination and facilitation of

financing of infrastructural projects, as well as facilitating and removing physical and administrative bottlenecks at border crossings in overland transport between Europe and Asia. The report is a particularly useful tool for transport policy-makers from Landlocked Developing Countries (LLDCs) and transit countries in the Euro-Asian region and beyond, in that it, inter alia: i) Identifies and describes main commodity groups for the transport of which inland modes of transport can compete with maritime and aviation modes (incl. non-containerized, containerized and high-value containerized cargo); ii) Provides analysis showing the economic advantage (in terms of time and costs) of inland routes compared to air or maritime routes; and iii) Identifies the current strengths and weaknesses and lists several recommendations to make inland routes more competitive vis-à-vis the other modes. The EATL project's principal value to the market is that it paved the way for the operation of container "block trains". The development of the block trains, the so called "highways of railways" made the Euro-Asian corridors operational, serving as a regular mechanism controlled by the market that evaluates the service levels and requests for greater facilitation, cooperation and investment.

### **Good Derivatives**

The men of the U.S. Navy's brown-water force played a vital but often overlooked role in the Vietnam War. Known for their black berets and limitless courage, they

maneuvered their aging, makeshift craft along shallow coastal waters and twisting inland waterways to search out the enemy. In this moving tribute to their contributions and sacrifices, Tom Cutler records their dramatic story as only a participant could. His own Vietnam experience enables him to add a striking human dimension to the account. The terror of firefights along the jungle-lined rivers, the rigors of camp life, and the sudden perils of guerrilla warfare are conveyed with authenticity. At the same time, the author's training as a historian allows him to objectively describe the scope of the navy's operations and evaluate their effectiveness. Winner of the Navy League's Alfred Thayer Mahan Award for Literary Achievement in 1988 when the book was first published, Cutler is credited with having written the definitive history of the brown-water sailors, an effort that has helped readers better understand the nature of U.S. involvement in the war.

Recorded music is as different to live music as film is to theatre. In this book, Simon Zagorski-Thomas employs current theories from psychology and sociology to examine how recorded music is made and how we listen to it. Setting out a framework for the study of recorded music and record production, he explains how recorded music is fundamentally different to live performance, how record production influences our interpretation of musical meaning and how the various participants in the process interact with technology to produce recorded music. He combines ideas from the ecological approach to perception, embodied cognition and the social construction of technological systems to provide a summary of theoretical approaches that are applied to the sound of the music and the creative activity of production. A wide range of examples from Zagorski-Thomas's professional experience reveal these ideas in action.

### **Strange Bedfellows**

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental

markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

“Wheel books” were once found in the uniform pockets of virtually all junior officers and many senior petty officers. Each small notebook was unique to the Sailor carrying it, but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties. Often used as a substitute for experience among neophytes and as a portable library of reference information for more experienced personnel, those weathered pages contained everything from the time of the next tide, to leadership hints from a respected chief petty officer, to the color coding of the phone-and-distance line used in underway replenishments. In that same tradition, the Naval Institute has created and aptly named the Wheel Book series, portable libraries culled from

USNI's vast array of information that has accumulated for more than a century. Articles from the Institute's flagship publication Proceedings are combined with selections from USNI's oral history program and from Naval Institute Press books to create unique guides on a wide array of relevant professional subjects. Just as the "wheel books" of yesterday served the fleet well, the Naval Institute Wheel Books of today provide supplemental information, pragmatic advice, and cogent analysis on topics important to modern naval professionals. The pinnacle of leadership in a military organization is command. Article 0801 of Navy Regulations defines both the authority and the responsibility of command as "absolute." This Naval Institute Wheel Book provides practical guidance and food for thought that actual and would-be commanders can use to carry out that absolute authority while being absolutely responsible. Included in this specially-selected collection is the sage advice of those who have commanded as well as the expectations of those who are commanded. Aspirants as well as practitioners will do well to exploit this selected survey of what Fleet Admiral Chester Nimitz described as the "one purpose" for entering the Navy.

### **The Dresden Files Collection 1-6**

The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late

medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.

Expert Indexing in Oracle Database 11g is about the one database structure at the heart of almost all performance concerns: the index. Database system performance is one of the top concerns in information technology today. Administrators struggle to keep up with the explosion of access and activity driven by the proliferation of computing into everything from phones to tablets to PCs in

our increasingly connected world. At the heart of any good-performing database lies a sound indexing strategy that makes appropriate use of indexing, and especially of the vendor-specific indexing features on offer. ### **The Economics of Regional Clusters**

You see, people forever say history is written by the victors. It's not. It's written by those who can shape the simplest narrative. David is a man struggling to hold together his marriage when the small town he lives in is rocked by the sudden, untimely death of a local girl. As details are uncovered, rumours and talk take hold of the town, and start to force David to revisit old memories. Set in 1960s Ireland, *Before Monsters Were Made* tells the story of how a few small words can have a

very big impact. When suspicion and old stories start to spread like a virus, how well do we know the people we trust the most? Can we ever know what goes on inside other people's lives? And do we really want to? Before Monsters Were Made is an unnerving and moving thriller about loyalty, lies and love.

### **Genius and Eminence**

LaToya Jenkins is the quintessential woman: smart, successful, grounded and determined. She only has one problem socially - she's overweight. As the "big one" of her girlfriends, she often faces rejection from the men of their social circle because of her size and/or her dark skin. And due to a painful past relationship, she gives up on love completely until, she takes on Mitchell "Mitch" O'Keefe as a new client. The Irish born architect needs a professional cleaning service to help him literally clean up his life after a nasty divorce, but he winds up finding a true friend in LaToya, the owner of It's An Honor Cleaning Service. While LaToya is handicapped emotionally by her baggage, Mitch thinks she's the strongest woman he's ever seen and a breath of fresh air in his hectic life. His only goal is to prove to her that his interest in her is more than lust sparked by curiosity.
