Equal Employment Opportunity and Open Housing

Social and Legal Background of the Equal Employment Opportunity Legislation

The Excluded Past is a groundbreaking exploration of the uneasy relationship between archaeology and education. The concept of the excluded past rests on two basic arguments: that the prehistoric past is almost universally excluded from school curricula and that the version of the past presented to many indigenous and minority groups is not their own but rather that of dominant social groups. Contributors from a variety of different perspectives and countries show how the exclusion of aspects of the past impoverishes and distorts social and educational experience. They show how bridges can and must be built between archaeology, education and indigenous and minority groups.

Women and the Law

This collection of writings is the only broad, interdisciplinary introduction to the struggle for EEO and its consequences.

Equal Employment Opportunity Plan

Based on a conference of senior policymakers convened by the Anglo-German Foundation and the Royal Institute of Public Administration, this work examines equal employment opportunity for women in Britain and West Germany.

Affirmative Development

File Type PDF Achieving Equal Employment Opportunities For People With Disabilities Through Legislation Guidelines

Legislative and institutional affirmative and positive action policies, intended to increase accessibility and the participation of historically disadvantaged groups in employment and education, have been with us for some time, particularly in Anglo Saxon countries. One of the major issues they are intended to address is gender inequality. Proponents of these policies have hailed quota initiatives as a key to promoting equal opportunities and reducing discrimination. At the same time, affirmative action policies and processes have been challenged in courts and have caused controversy in educational establishments, highlighting the fact that these practices can have negative consequences. Exploring the application of quotas and affirmative action at an institutional or organizational level from a variety of different perspectives, the contributions in Diversity Quotas, Diverse Perspectives provide an understanding of the complexity and controversial nature of policies and actions in different countries. Even within Europe, implementation has varied widely from country to country. For example, while most European countries have employment quotas for people with disabilities, there is little consistency among the European Union's member states when it comes to quotas and other policies relating to ethnic minorities in employment and educational settings. Focussing here particularly on gender-related initiatives, but raising questions pertinent to other aspects of diversity, the contributions from international researchers investigate variances between and differing justifications for policies. The book offers a global perspective on the subject and expands the discussion of it beyond Anglo-Saxon contexts.

Equal Employment Opportunity

Affirmative Development makes the case theoretically for deliberate intervention to develop academic ability for students not naturally disposed to develop such ability by the conditions under which they live. The book includes discussions of intellectual competence and intellectual character as products of the development of academic ability and reviews of the research evidence for the feasibility and morality of such action.
