"The assessment builds on the work of the Livestock, Environment and Development (LEAD) Initiative"--Pref.

A False Report

North to the Night

This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and

international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

Snow Wolf

Champion

U.S. Arctic waters north of the Bering Strait and west of the Canadian border encompass a vast area that is usually ice covered for much of the year, but is increasingly experiencing longer periods and larger areas of open water due to climate change. Sparsely inhabited with a wide variety of ecosystems found nowhere else, this region is vulnerable to damage from human activities. As oil and gas, shipping, and tourism activities increase, the possibilities of an oil spill also increase. How can we best prepare to respond to such an event in this challenging environment? *Responding to Oil Spills in the U.S. Arctic Marine Environment* reviews the current state of the science regarding oil spill response and environmental assessment in the Arctic region north of the Bering Strait, with

emphasis on the potential impacts in U.S. waters. This report describes the unique ecosystems and environment of the Arctic and makes recommendations to provide an effective response effort in these challenging conditions. According to *Responding to Oil Spills in the U.S. Arctic Marine Environment*, a full range of proven oil spill response technologies is needed in order to minimize the impacts on people and sensitive ecosystems. This report identifies key oil spill research priorities, critical data and monitoring needs, mitigation strategies, and important operational and logistical issues. The Arctic acts as an integrating, regulating, and mediating component of the physical, atmospheric and cryospheric systems that govern life on Earth. Not only does the Arctic serve as regulator of many of the Earth's large-scale systems and processes, but it is also an area where choices made have substantial impact on life and choices everywhere on planet Earth. This report's recommendations will assist environmentalists, industry, state and local policymakers, and anyone interested in the future of this special region to preserve and protect it from damaging oil spills.

Illustrated Sporting & Dramatic News

Globalization entails the world becoming a smaller place through political, socio-cultural and economic processes. These processes have salient implications for tourism, and tourism itself is one of the driving forces behind globalization. This book is a collection of conceptual treatises by international scholars about the dynamics and reach of globalization and its relationships with tourism. It anatomizes and deconstructs the global forces, processes and challenges that face the world of tourism. It is international in scope, encyclopedic in its conceptual depth, empirically evocative, and contemporary in its coverage.

Snow Leopards

A chronicle of a family's efforts to build a home near the Arctic Circle in Alaska depicts their moving discovery of love and courage in a land of modern-day outlaws, feuds, grizzly bears and unbelievably harsh winters. Reprint.

An Ounce of Prevention

Victory Tales Press offers four sweet to sensual stories that will warm your heart during those cold winter nights. Our talented storytellers will take you where romance is the true miracle for any holiday season. Raff's Christmas Miracle by Teresa K. CypherRaff, retired and alone, befriends Mandy-a single mother of two who lives down the road from him. The young woman reminds him of Angie, his high school sweetheart and the only girl he ever loved. He and Angie had planned to spend their lives together, but many years before, on the Christmas they announced they were getting married; her father whisked her away to find a good man, the "right" man. Three months before Christmas, when the rat-infested mobile home Mandy rents, burns to the ground, he offers to let them stay with him in his big, old farmhouse. Their short stay turns into a longer one, and Raff discovers that he likes having children in the house, and he likes Mandy's company. She's alone in the world, and he wants to help her and her kids get back on their feet. As the holidays approach, while Mandy searches for her birth mother and then has to choose whether to meet her or not, Raff is forced to face his memories of the Christmas long ago when Angie broke it off with one phone call, and then she moved away. Is there still room in his heart for the one true miracle of Christmas the miracle of love? Comfort and Joy by Gerald CostlowComfort Smith hasn't had an easy life. Raised in an orphanage, shunned by the upright citizens of the town, her only way to survive is being a prostitute in a saloon. Now she has a baby in her life. A baby she's expected to turn over to the same orphanage she

came from. A saloon is no place to raise a baby. Pete Lamont is a bouncer in the saloon, tormented by something terrible that he did in his past. Now it's his job to escort Comfort and her baby on a train ride to the orphanage back east. It's a sad choice, but one many prostitutes have made in the 1890s frontier. It should be an uneventful trip. But Comfort is determined to hang onto the baby and has made other plans. The trip together will be anything but uneventful for Comfort and Pete.

I'll be Home for Chanukah - Dannville Dreamers, Book One ~ sweet contemporary holiday story by Nancy Goldberg Levine
Paramedic Eve Preston is taking some boss-mandated time off from her job. Her parents don't understand her at all-they wanted her to be a doctor, and a wife and mother. She's perfectly happy in Dannville, Colorado being housemates with her Grandma Bernie and her cat, Simba. Then Rabbi Byron Sachs, her best friend's brother, takes a temporary job at Eve's temple and that changes everything. Rabbi Byron Sachs is a city boy who thinks his family is perfect. When he meets his sister's best friend, Eve, he starts to re-think life in the big city. As he spends more time in Dannville, he learns that his family isn't perfect, and that life in a small town might not be so bad after all. Can a great miracle in Dannville bring Eve and Byron together?

Christmas Betrothal by Barbara Miller
Captain Blase Westcott travels to Fernly, the family estate of his fellow officer, for the holidays. The two soldiers have been recovering at Westcott's estate after the terrible battle at Waterloo. Now Blase has agreed to spend Christmas at Fernly even though he suspects Lieutenant James Barnes wants to match him up with his sister. After a successful spate of portrait work

during the months after the Peace Celebrations, Christine Barnes has been invited to her uncle's estate for the holidays and knows they wish her to stay on afterwards. She loves Fernly and her uncle. She even has a soft spot for her doting aunt, but she fears staying there would prove impossible. Her cousin, Sally, has made it clear she doesn't want her there. Besides, she enjoys her independence.

At The Mountains Of Madness

Merchant Vessels of the United States

An account of one couple's journey around the Arctic Circle by sailboat, a trip that becomes a nightmare as the wife must leave her husband to face the long Arctic night alone

Upside Down

This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field.

Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

Social Assistance in Albania

The classic work that revolutionized the way business is conducted across cultures around the world.

Handbook of Globalisation and Tourism

Once upon a time Cooper Holbrook was a champion, racking up buckles and buckle bunnies with ease. But the years have not been kind to the former bull rider, leaving him broke and broken until he doesn't recognize himself or his life anymore. Until Hannah Anderson, the mother of his former student Skeeter, swoops into his world to remind him of what he had and what he lost. And most of all, how strong the attraction he'd denied himself then still is between them. If you enjoy the hot cowboys written by Lorelei James, Lori Wilde, Mica Stone, Lora Leigh, Desiree Holt, Vivian Arend, Em Petrova, Becky McGraw, Elle James, Sable Hunter and the like, you have to read the Studs in Spurs! Champion was previously released by Samhain Publishing under the same title. This is a reissue, reedited and recovered but with no substantial changes to the story. Don't miss the other hot and steamy contemporary cowboy romances set in the world of professional bull riding in New York Times bestselling author Cat Johnson's Studs in Spurs! Cat Johnson's Studs in Spurs Unridden Bucked Ride Hooked Flanked Thrown Champion Spurred Wrecked Topics: Professional bull riding, contemporary romance, western romance, alpha male heroes, connected series, second chances, reunion romance,

friends to lovers, small town romance, coming home, binge read, completed series, mature hero and heroine, over 40 couple, damaged hero, single mother, rodeo cowboys, Hell Yeah series, Six Pack Ranch, Rough Riders, Blacktop Cowboys, bull riders, older hero, older heroine, single mother

Whitaker's Cumulative Book List

Best known for his original series of Arthurian novels, A Dream of Eagles (called The Camulod Chronicles in the US), and his Knights Templar trilogy, Jack Whyte has authored 10 international bestsellers in the past 15 years. Jack's imagination and his passion for observing human nature shine through in both his prose and his verse in this uniquely Canadian memoir. He delights in pointing out daily treasures of his chosen homeland that are taken for granted by non-immigrants. He dares to challenge conventional wisdom and the politically correct. From start to finish, Jack Whyte: Forty Years in Canada makes you think, makes you laugh and makes you curious.

Snow Bound

Moon of the Crusted Snow

Snow Leopards: Biodiversity of the World: Conservation from Genes to Landscapes is the only comprehensive work on the biology, behavior, and conservation status of the snow leopard, a species that has long been one of the least studied, and hence poorly understood, of the large cats. Breakthroughs in technologies and methodologies to study this elusive cat have come rapidly, including non-invasive genetics, camera traps, and GPS-satellite collaring. The book begins with chapters on the genetic standing and taxonomy of the snow leopard, followed by chapters on their behavior and ecology. Additional contributions follow on the current and emerging threats to the species, which include longstanding concerns, such as poaching and conflicts with livestock, and new and emerging threats such as mining and climate change. A section on conservation solutions, backed by valuable case studies, starts with an overview of the important role mountain communities play in assuring the snow leopard's long-term persistence. In addition, chapters on the role of captive snow leopards for the conservation of the species, state-of-the-art techniques and technologies for studying and monitoring snow leopards, status reports from around the region, and future perspectives, such as transboundary conservation initiatives, international conventions (CITES, CMS, etc.), the role of the IUCN Cat Specialist Group and the Snow Leopard Network, and undertakings such as the Global Snow Leopard Forum facilitated by the World Bank are also included. Serves as the first and only comprehensive book on the biology, behavior, and conservation status of the snow leopard Brings together the most current scientific knowledge, documents the most pressing

conservation issues, and shares success stories in alleviating the broad threats that now jeopardize the long-term survival of this species Brings current knowledge of the species, not only to researchers and conservationists, but also to decision makers, academics, and students Edited by recognized snow leopard experts, with more than 50 years of collective experience in research and conservation of the species

Wild Cats

The eagerly awaited sequel to the award-winning novel, Semester Aboard. After learning how to use magic and fighting vampires, anyone would be bored going back to normal college life. As if that wasn't enough, Jen didn't realize how hard it would be to tiptoe around her non-magic family and friends. She can't even talk to her familiar, Rak, without making sure no one else is around! Worst of all, Jen misses the friends she made over the summer. Aside from Rak, they're the only other magics she knows and she hasn't seen them in almost five months! Jen is all too happy to accept an invitation to go skiing with the gang. She gears up for two weeks of snow, magic, and fun. Just when everything seems to be going great, an uninvited guest turns up. Soon the skiers aren't the only things going downhill. Jen thought that vampires were just about the most dangerous thing the magical world could throw at her. Unfortunately, she's about to learn that people with no magic at all can be just as deadly

Fundamentals of Geomorphology

First published in 1997, Glenn Meade's first internationally bestselling thriller is back and better than ever, as it takes you on a riveting ride into the heart of a Cold War plot to assassinate Joseph Stalin. It's 1953—the middle of the Cold War. Joseph Stalin is a major threat—with his deteriorating mental stability, reports that he's about to resume his horrifying purges, and the Soviet Union on the cusp of developing nuclear weapons, it's a risk the US government is unwilling to take. Operation Snow Wolf is created to eliminate Stalin before it's too late. CIA agent Jake Massey is chosen to run the operation and he recruits Alex Slanski—AKA Wolf—to do the deed, along with Anna, who recently escaped from a Soviet gulag, to be his guide. But someone knows their plan, and the KGB have dispatched their own deadly Major Yuri Lukin to hunt down the hunters. As circumstances quickly unravel, Jake must somehow put an end to the mission he had set into motion—before the entire situation explodes into World War III. Filled with breathtaking action and nail-biting thrills, this classic bestseller proves that despite being over, the Cold War can “still freeze readers' attention and chill their blood” (Publishers Weekly).

Jack Whyte

The Zombie Survival Guide

In 1889, Jâerãome Plumier investigates a series of explosive shipwrecks in the Arctic Ocean that occur after the crew spots a ghost ship among icebergs.

The Illustrated London News

A natural history and illustrations of the New World in the seventeenth century.

Wild Cats of the World

When NY divorce lawyer, Sarah Lindquist, stepped out of her office to clear her mind before her next client showed up, the last thing she expected was to come to in the middle of the Colorado Rockies, with two park rangers standing over her. The ex-military rangers are convinced someone wants her out of the way, but how do they find out who, without putting her life at risk and letting that 'someone' know they've missed the target?

Marine Anthropogenic Litter

"This is an expanded version of 'An unbelievable story of rape' originally published

on ProPublica (propublica.org) and co-published with the Marshall Project on December 15, 2015"--Title page verso.

Conservation Genetics in Mammals

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

The New American Encyclopedic Dictionary

Explains how animals use chemical communication, emphasising the evolutionary context and covering fields from ecology to neuroscience and chemistry.

The Arctic Marauder

This book focuses on the use of molecular tools to study small populations of rare and endangered mammals, and presents case studies that apply an evolutionary framework to address innovative questions in the emerging field of mammalian

conservation genomics using a highly diverse set of novel molecular tools. Novel and more precise molecular technologies now allow experts in the field of mammology to interpret data in a more contextual and empirical fashion and to better describe the evolutionary and ecological processes that are responsible for the patterns they observe. The book also demonstrates how recent advances in genetic/genomic technologies have been applied to assess the impact of environmental/anthropogenic changes on the health of small populations of mammals. It examines a range of issues in the field of mammalian conservation genomics, such as the role that the genetic diversity of the immune system plays in disease protection and local adaptation; the use of noninvasive techniques and genomic banks as a resource for monitoring and restoring populations; the structuring of population by physical barriers; and genetic diversity. Further, by integrating research from a variety of areas – including population genetics, molecular ecology, systematics, and evolutionary and conservation biology – it enables readers to gain a deeper understanding of the conservation biology of mammals that are at increasing risk of extinction at local, regional and global scales. As such, it offers a unique resource for a broad readership interested in the conservation biology of mammals and conservation management strategies to better preserve biodiversity.

Nepal Biodiversity Resource Book

Ranging from the largest - the Tiger to the smallest species - the Rusty-spotted Cat and Black-footed Cat, the world's wild cats are some of the most beautiful, ferocious and feared carnivores in the world. *Wild Cats of the World* provides a detailed account of each species of wild cat, examining their importance throughout history and the future of some of the most endangered breeds. Using stunning photography and magnificent colour plates by top wildlife artist Priscilla Barrett to depict each cat in detail, *Wild Cats of the World* examines the characteristics of all 38 species, as well as their history, distribution and current IUCN status.

Living in the Environment

Snowmobiles

Inspiring people to care about the planet. In the new edition of *LIVING IN THE ENVIRONMENT*, authors Tyler Miller and Scott Spoolman have partnered with the National Geographic Society to develop a text designed to equip students with the inspiration and knowledge they need to make a difference solving today's environmental issues. Exclusive content highlights important work of National Geographic Explorers, and features over 200 new photos, maps, and illustrations

that bring course concepts to life. Using sustainability as the integrating theme, LIVING IN THE ENVIRONMENT 18e, provides clear introductions to the multiple environmental problems that we face and balanced discussions to evaluate potential solutions. In addition to the integration of new and engaging National Geographic content, every chapter has been thoroughly updated and 18 new Core Case Studies offer current examples of present environmental problems and scenarios for potential solutions. The concept-centered approach used in the text transforms complex environmental topics and issues into key concepts that students will understand and remember. Overall, by framing the concepts with goals for more sustainable lifestyles and human communities, students see how promising the future can be and their important role in shaping it. offers additional exclusive National Geographic content, including high-quality videos on important environmental problems and efforts being made to address them. Team up with Miller/Spoolman's, LIVING IN THE ENVIRONMENT and the National Geographic Society to offer your students the most inspiring introduction to environmental science available! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Arctic Homestead

implications that go far beyond the cat family. --

Livestock's Long Shadow

A daring post-apocalyptic novel from a powerful rising literary voice With winter looming, a small northern Anishinaabe community goes dark. Cut off, people become passive and confused. Panic builds as the food supply dwindles. While the band council and a pocket of community members struggle to maintain order, an unexpected visitor arrives, escaping the crumbling society to the south. Soon after, others follow. The community leadership loses its grip on power as the visitors manipulate the tired and hungry to take control of the reserve. Tensions rise and, as the months pass, so does the death toll due to sickness and despair. Frustrated by the building chaos, a group of young friends and their families turn to the land and Anishinaabe tradition in hopes of helping their community thrive again. Guided through the chaos by an unlikely leader named Evan Whitesky, they endeavor to restore order while grappling with a grave decision. Blending action and allegory, Moon of the Crusted Snow upends our expectations. Out of catastrophe comes resilience. And as one society collapses, another is reborn.

Pheromones and Animal Behavior

Presents an unparalleled overview of the sophisticated culture of pastoral nomadic populations who lived on the territory of present-day Kazakhstan from roughly the

middle of the first millennium BCE to the early centuries CE.--Book Jacket.

Nomads and Networks

"A kindergarten-level introduction to the motorized vehicles known as snowmobiles, covering their purpose, parts, and operation, and such defining features as their runners and tracks"--

Fading Footprints

Presents the most comprehensive and up-to-date information available on the 36 wild cats of the world. It includes the first published collection of detailed range maps and some of the first photographs of rare species in the wild. It provides a thorough review of major issues in cat conservation such as habitat loss and management of big cats in livestock areas; field and laboratory research; international trade; the role of zoos; and reintroduction. High priority are identified to further the cause of cat conservation.

Let It Snow (2016 Holiday Romances)

Based on groundbreaking new scholarship, Upside Down: Arctic Realities brings

together ancient and modern works from the Arctic region, including major sites in Russia and Alaska. The featured pieces dramatically illustrate the continuing influence of centuries-old traditions in modern times and include both utilitarian and decorative items such as amulets, funerary offerings, and ceremonial masks from the Alaskan Yup'ik. Essays by leading scholars in the field explore such topics as the relationship between artist and material and between the aesthetics of native Arctic cultures and their environments.

When Cultures Collide, Third Edition

An illustrated, comprehensive guide to surviving an attack by hordes of the predatory undead explains zombie physiology and behavior, the most effective weaponry and defense strategies, how to outfit one's home for a long siege, and how to survive in any territory or terrain. Original. 35,000 first printing.

The Biology and Conservation of Wild Felids

At the Mountains of Madness is a science fiction-horror novella by American author H. P. Lovecraft, written in February/March 1931 and rejected that year by Weird Tales editor Farnsworth Wright on the grounds of its length. It was originally serialized in the February, March, and April 1936 issues of Astounding Stories. It

has been reproduced in numerous collections. The story details the events of a disastrous expedition to the Antarctic continent in September 1930, and what was found there by a group of explorers led by the narrator, Dr. William Dyer of Miskatonic University. Throughout the story, Dyer details a series of previously untold events in the hope of deterring another group of explorers who wish to return to the continent.
