Everybody deals with them--people who rub you the wrong way, often leaving abrasions behind! Mary Southerland goes beyond just giving good advice on how to handle tough relationships. Using examples from her own painful experiences, a readily applicable format--and a dusting of humor and intriguing "Sandpaper Facts" throughout--she "frames key principles of relating to rub-you-the-wrong-way types such as "be loving--recognize their worth" "be humble--choose against pride" "be encouraging--become their cheerleader" "be strong--develop endurance" "be committed--refuse to walk away" Readers will see how God, using the difficult people in their lives, is reshaping them into men and women who can express His forgiveness, mercy, and tender affection.

This book provides case studies and general views of the main processes involved in the ecosystem shifts occurring in the high mountains and analyses the implications for nature conservation. Case studies from the Pyrenees are preponderant, with a comprehensive set of mountain ranges surrounded by highly populated lowland areas also being considered. The introductory and closing chapters will summarise the main challenges that nature conservation may face in mountain areas under the environmental shifting conditions. Further chapters put forward approaches from environmental geography, functional ecology, biogeography, and paleoenvironmental reconstructions. Organisms from microbes to large carnivores, and ecosystems from lakes to forest will be considered. This interdisciplinary book will appeal to researchers in mountain ecosystems, students and nature professionals. This book is open access under a CC BY license.

This is a thorough description of this increasingly important technology, starting from the development of head-up displays (HUDs), particularly specifications and standards and operational problems associated with HUD use. HUD involvement in spatial disorientation and its use in recognizing and recovering from unusual attitudes is discussed. The book summarizes the design criteria including hardware, software, interface and display criteria. It goes on to outline flight tasks to be used for evaluating HUDs and discusses the impact of HUDs on flight training. Recent work indicates that a HUD may allow a significant reduction in the time required to train a pilot on a particular aircraft, even considering non-HUD-related tasks. The author concludes with a review of unresolved HUD issues and recommendations for further research and provides an impressive bibliography, glossary and index. Within the military aviation sector the book will be of use to industry, research agencies, test pilot schools and air force training establishments. In the civil area regulatory authorities, airlines and industry will also have an increasing interest.

untimely death of a local girl. As details are uncovered, rumours and talk take hold of the town, and start to force David to revisit old memories. Set in 1960s Ireland, *Before Monsters Were Made* tells the story of how a few small words can have a very big impact. When suspicion and old stories start to spread like a virus, how well do we know the people we trust the most? Can we ever know what goes on inside other people's lives? And do we really want to? *Before Monsters Were Made* is an unnerving and moving thriller about loyalty, lies and love.

The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three-day international seminar that included a one-day workshop in order to highlight freshwater and coastal elasmobranch conservation issues in the region and worldwide, to disseminate the result of the project to other Malaysian states and countries, and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation, commercial fisheries management, and for subsistence fishing communities. These proceedings contain numerous peer-reviewed papers originally presented at the seminar, which cover a wide range of topics, with particular reference to species from freshwater and estuarine habitats. The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries, biodiversity, conservation and management. This paper records those conclusions, which highlight the importance of elasmobranchs as top marine predators and keystone species, noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks.

Her insight into life and art is remarkable. The Warner Loughlin Technique changes the way acting will be taught for generations to come. Find out more at [warnerloughlin.com](http://warnerloughlin.com). "I was able to find my voice, and to find tears and to find levels, because I was able to have a safe place to go, that I could come back from. With your technique, in character prep, when I visit a character's life, her past and create an event good or tragic - that belongs to her. I don't take ownership of that pain with me. I don't take it on as my own. So this allows me not to be scared to go there, which allows me freedom as an actress to do anything, because I don't own it. It belongs to my character."-Amy Adams "Working with Warner was a revelation. I doubted that I could ever work without "observing" and judging every moment. I will be forever grateful [to Warner] for helping me get back to the joy of living in the spontaneous truth of every scene."-Kyra Sedgwick "I've been working with Warner Loughlin for years. Not only has she helped me become a better actor, but she's also helped me truly enjoy this work in ways I never imagined."-Ryan Reynolds "Before I started working with Warner on the technique, I felt like acting was just something that I could some days do, and some days not do. It was only

through doing deep emotion with detail on each of the characters I got, that I could act everyday how I wanted to, because I ended up knowing the character inside and out. The thoughts are no longer my own, but the characters', so I don't have to work as hard during the scenes. Now being on set and being the character is fun and never feels pushed. I love the technique and it has helped me immensely."-Sosie Bacon "I met Warner over 10 years ago. She has coached me through comedy, drama, and even life! She has not only given me tools to be better at my job, but tools to be 100% confident through the process."-Emma Roberts "Warner's Technique has become part of my creative process It's simply the most intuitive way for me to find a character's base human emotion. Warner worked with us on Disney's Frozen for many months and helped us create truthful characters I've never felt so comfortable animating a character before and I think the sophistication in the performance in the film speaks for itself."-Lino DiSalvo, Head of Animation for Disney's Frozen
