Jasper Hobson and his crew have the mission to build a fort in the Arctic ocean. They manage to get there and establish the fort. However a massive earthquake changes their plans as unusual things begin to happen. The most unusual of all is that they have ended up on iceberg without even noticing. This iceberg becomes their lifebelt. But what will happen if or when it begins to melt? Where will it take them? Will they survive or they will be forever remembered with their last good deed - building a fort in a rich with natural resources area? "The Fur Country" is published in 1873. It depicts an arctic adventure and typically for Jules Verne's style, it has series of descriptions and details of the expedition and the nature. Jules Verne (1828-1905) was a French novelist who mostly wrote adventure fiction inspired by the scientific advances of the 19th century. With the help

of editor Pierre-Jules Hetzel he wrote a series of books called "Extraordinary Travels", which includes "Journey to the Center of the Earth" (1864), "Twenty Thousand Leagues Under the Sea" (1870), and "Around the World in Eighty Days" (1873). Widely popular with both children and adults, Verne is one of the most translated authors of all times, and still inspires people the world over.

Charles at Seventy - Thoughts, Hopes & Dreams

“Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd, their perspectives deceitful, and everything conceals something else.” — from *Invisible Cities* In a garden sit the aged Kublai Khan and the young Marco Polo — Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear. “*Invisible Cities* changed the way we read and what is possible in the balance between poetry and prose . . . The book I would choose as pillow and plate, alone on a desert island.” — Jeanette Winterson

A top tarotist's secrets to personal growth, one card at a time. The two volumes of *Seventy-Eight Degrees of Wisdom* have inspired a whole generation of tarot students. It has often been described by readers, booksellers, and teachers as the "Bible of tarot readers." It is also often cited as one of the landmark books in modern tarot, and it helped to launch the "Tarot Renaissance" of the 1980s. The two texts—one for The Major Arcana and one for The Minor Arcana—appear together in this volume, which is a reissue of the 1998 edition first published by Thorsons. *Seventy-Eight Degrees of Wisdom* draws on mythology and esoteric traditions and delves deeply into the symbolism and ideas of each card. It also gives the cards a modern psychological slant based on the pictures rather than a system of occult symbolism. This endlessly useful reference tool provides a concise history of tarot, introduces common spreads, and is a clear and readable book for both the beginning and advanced tarot student.

When the pilot went off everybody rushed to the side of the ship to see him go down the little rope ladder. I watched him closely, but he climbed down and into the row boat, that was waiting to carry him to the pilot boat, without giving one glance back to us. It was an old story to him, but I could not help wondering if the ship should go down, whether there

Here, in his own words, is the story of one of the twentieth century's most creative medical innovators, Dr. Henry Heimlich. The thoracic surgeon is best known for having developed the Heimlich Maneuver, the world's easiest-to-learn and most universally known method to save people from choking to death on food or foreign objects. But many don't know about Dr. Heimlich's other life-saving inventions. He is the inventor of the Heimlich Chest Drain Valve, which saved thousands of lives during the Vietnam War, and the Heimlich MicroTrach, which provides a remarkably efficient way for people to take oxygen. In the present decade, Dr. Heimlich has turned his attention to two devastating illnesses for which medicine has not yet found a cure--cancer and HIV. He describes his research and its promise, as well as the controversy and resistance his new ideas have generated from the medical establishment. Interweaving the author's personal life with riveting stories of his numerous medical breakthroughs, this rich memoir provides insights into the workings of a creative mind and the machinations of the American medical system.

Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. *Sleep Disorders and Sleep Deprivation* presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

May Sarton's honest and engrossing journal of her seventieth year, spent living and working on the Maine coast May Sarton's journals are a captivating look at a rich artistic life. In this, her ode to aging, she savors the daily pleasures of tending to her garden, caring for her dogs, and entertaining guests at her beloved Maine home by the sea. Her reminiscences are raw, and her observations are infused with the

poetic candor for which Sarton—over the course of her decades-long career—became known. An enlightening glimpse into a time—the early 1980s—and an age, *At Seventy* is at once specific and universal, providing a unique window into septuagenarian life that readers of all generations will enjoy. At times mournful and at others hopeful, this is a beautiful memoir of the year in which Sarton, looking back on it all, could proclaim, “I am more myself than I have ever been.”

If the Universe Is Teeming with Aliens WHERE IS EVERYBODY?

Sometimes you need a little help learning to believe in yourself. And it can show up in the most unexpected ways. Robbie Berger has stalled out in his life and career, hoping for a fresh gust of wind to take him in a new direction. When he arrives at the home of his latest "senior care" assignment, Robbie has no idea he's about to meet someone destined to change his world. The new client unfolds a remarkable tale of a corporation run aground, a twelve-year-old boy convinced he'll always be a loser, and a sage owl whose wisdom may shift the future for them all. This story-within-a-story is about the boundless possibilities that arise when we learn to ask the right questions, set priorities that match our values, and go after the things we we want in life with unstoppable gusto.

"I recommend this book highly to everyone." --Deepak Chopra, M.D. This special updated version of the New York Times-bestseller, *Kitchen Table Wisdom*, addresses the same spiritual issues that made the original a bestseller: suffering, meaning, love, faith, and miracles. "Despite the awesome powers of technology, many of us still do not live very well," says Dr. Rachel Remen. "We may need to listen to one another's stories again." Dr. Remen, whose unique perspective on healing comes from her background as a physician, a professor of medicine, a therapist, and a long-term survivor of chronic illness, invites us to listen from the soul. This remarkable collection of true stories draws on the concept of "kitchen table wisdom"-- the human tradition of shared experience that shows us life in all its power and mystery and reminds us that the things we cannot measure may be the things that ultimately sustain and enrich our lives. Around the World in Eighty Days

A powerful and moving treatise on the surprises of aging from an influential feminist writer and activist who thinks beyond stereotypes. The older I get, the more intensely I feel about the world around me. Gloria Steinem has been an eloquent and outspoken voice for women's rights and equality for more than four decades. In *Doing Sixty & Seventy* she addresses an essential concern of people everywhere—and especially of women: the issue of aging. Whereas turning fifty, in her experience, is “leaving a much-loved and familiar country,” turning sixty means “arriving at the border of a new one.” With insight, intelligence, wit, and heartfelt honesty, she explores the landscapes of this new country and celebrates what she has called “the greatest adventure of our lives.” While appreciating everybody's experiences as different, Steinem sees these years as charged with possibilities. In a 1950 conversation at Los Alamos, four world-class scientists generally agreed, given the size of the Universe, that advanced extraterrestrial civilizations must be present. But one of the four, Enrico Fermi, asked, "If these civilizations do exist, where is everybody?" Given the fact that there are perhaps 400 million stars in our Galaxy alone, and perhaps 400 million galaxies in the Universe, it stands to reason that somewhere out there, in the 14 billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. Webb discusses in detail the 50 most cogent and intriguing solutions to Fermi's famous paradox.

Based on extensive fresh material and resources, Robert Jobson's biography provides a definitive insight into the extraordinary life of HRH Charles, Prince of Wales as he approaches his seventieth birthday at a watershed in the history of the modern British monarchy. Exploring beyond the banal newspaper headlines that have caricatured Charles over the years, the book debunks the myths about the man who will be King, telling his full, true story; exploring his complex character, his profoundly held beliefs and deep thinking about religion - including Islam - politics, the armed services, monarchy and the constitution, providing an illuminating portrait of what kind of monarch Charles III will be. Although this book is not an official biography, the Prince's office, Clarence House, has agreed to cooperate with the author - who has spent nearly thirty years chronicling the story of the House of Windsor as an author, journalist and broadcaster. The author, who has met Prince Charles on countless occasions, will draw on

the knowledge and memories of a number of sources close to the Prince who have never spoken before, as well as members of the Royal Household past and present who have served the Prince during his decades of public service. It will reveal that there are plans for Charles to serve as Prince Regent once the Queen turns ninety-five, how he already reads ALL the Government papers/boxes at his mother's insistence, and why he feels it is his constitutional duty to pass on to ministers his thoughts and feelings in his controversial 'black spider memos'. Beyond that, Charles at Seventy also reveals the truth about the Prince's deeply loving but occasionally volatile relationship with his second wife and chief supporter, Camilla. The result is an intriguing new portrait of a man on the cusp of kingship.

Kitchen Table Wisdom

The first edited volume of work by the legendary undercover journalist Born Elizabeth Jane Cochran, Nellie Bly was one of the first and best female journalists in America and quickly became a national phenomenon in the late 1800s, with a board game based on her adventures and merchandise inspired by the clothes she wore. Bly gained fame for being the first “girl stunt reporter,” writing stories that no one at the time thought a woman could or should write, including an exposé of patient treatment at an insane asylum and a travelogue from her record-breaking race around the world without a chaperone. This volume, the only printed and edited collection of Bly’s writings, includes her best known works—Ten Days in a Mad-House, Six Months in Mexico, and Around the World in Seventy-Two Days—as well as many lesser known pieces that capture the breadth of her career from her fierce opinion pieces to her remarkable World War I reporting. As 2014 marks the 150th anniversary of Bly’s birth, this collection celebrates her work, spirit, and vital place in history.

Nineteen Seventy-seven

Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the

risk of chronic diseases, and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined.

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women*, diving into women's lives at home, the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.

A NEW YORK TIMES NOTABLE BOOK OF 2020 New York Times bestselling author Lesley M.M. Blume reveals how one courageous American reporter uncovered one of the deadliest cover-ups of the 20th century—the true effects of the atom bomb—potentially saving millions of lives. Just days after the United States decimated Hiroshima and Nagasaki with nuclear bombs, the Japanese surrendered unconditionally. But even before the surrender, the US government and military had begun a secret propaganda and information suppression campaign to hide the devastating nature of these experimental weapons. The cover-up intensified as Occupation forces closed the atomic cities to Allied reporters, preventing leaks about the horrific long-term effects of radiation which would kill thousands during the months after the blast. For nearly a year the cover-up worked—until New Yorker journalist John Hersey got into Hiroshima and managed to report the truth to the world. As Hersey and his editors prepared his article for publication, they kept the story secret—even from most of their New Yorker colleagues. When the magazine published “Hiroshima” in August 1946, it became an instant global sensation, and inspired pervasive horror about the hellish new threat that America had unleashed. Since 1945, no nuclear weapons have ever been deployed in war partly because Hersey alerted the world to their true, devastating impact. This knowledge has remained among the greatest deterrents to using them since the end of World War II. Released on the 75th anniversary of the Hiroshima bombing, *Fallout* is an engrossing detective story, as

The story of modernist architects in East Central Europe The first half of the twentieth century witnessed the rise of modernist architects. *Brokers of Modernity* reveals how East Central Europe turned into one of the pre-eminent testing grounds of the new belief system of modernism. By combining the internationalism of the CIAM organization and the modernising aspirations of the new states built after 1918, the reach of modernist architects extended far beyond their established fields. Yet, these architects paid a price when Europe's age of extremes intensified. Mainly drawing on Polish, but also wider Central and Eastern European cases, this book delivers a pioneering study of the dynamics of modernist architects as a group, including how they became qualified, how they organized, communicated and attempted to live the modernist lifestyle themselves. In doing so, *Brokers of Modernity* raises questions concerning collective work in general and also invites us to examine the social role of architects today. Ebook available in Open Access. In *Seven to Seventy*, author Lavera Goodeye chronicles her life's journey. She begins by relating how her grandparents immigrated to homesteads on the Alberta prairie before trains provided transportation. Her parents met and married during the drought and depression of the thirties. She and her two sisters were born during World War II. Religious turmoil, mental illness and tragic loss to suicide were all part of her young life. But she persevered, grew up and eventually established a family of four sons. As an adult, she experienced loss and found herself rebuilding her life while fighting for satisfying relationships. She created a business around the skills of her troubled second husband and discovered a talent for helping others to improve their self-esteem and competency while learning to deal with loss. She hoped that another degree would allow her to do development work, only to have those hopes dashed. Even so, she found new ways to pursue her mission to help others improve their lives. Today, Goodeye continues to ponder questions about suicide, addictions and fundamentalist religion. Through *Seven to Seventy*, she returns to family and roots to find satisfaction in aging. She recovers mobility after major surgeries and realizes that she enjoys her home and the people who are part of her life.

Detective Bob Fraser and Jack Whitehead, a reporter at the *Post*, however, have other things on their minds-mainly the fact that someone is murdering prostitutes. The killer is quickly dubbed the "Yorkshire Ripper" and each man, on their own, works tirelessly to catch him. But their investigations turn grisly as they each engage in affairs with the prostitutes they are supposedly protecting. As the summer progresses, the killings accelerate and it seems as if Fraser and Whitehead are the only men who suspect or care that there may be more than one

killer at large. From the Trade Paperback edition.

At Seventy

Seventy-Two Virgins is a comic political novel, with similar appeal to Stephen Fry or Ben Elton, written by one of Britain's most popular politicians. It is Boris Johnson's first novel. to a top-level audience in Westminster Hall. Ferocious security - with some difficulties in communication - is provided by a joint force of the United States Secret Service and Scotland Yard. The best sharpshooters from both countries are stationed on the roof of the Parliament buildings. hapless Member of Parliament, having mislaid his crucial pass, is barred from Westminster, his bicycle regarded as a potential lethal weapon. And a man going by the name of Jones, although born in Karachi, successfully slips through the barriers, and whole new ball game starts. out of control. A remarkable new worldwide reality television show dominates the airwaves. And the most unlikely heroes emerge

Twenty Seven Seventy

As a budding photographer and oenophile in the 1940s, Fred Lyon surveyed the wine photography of the day and thought, "I can do better than that!" What followed was a seven-decade adventure that took him to the world's great wine regions—to French châteaux, the verdant slopes of Chile, and the picturesque wineries of Italy, Greece, Portugal, and beyond — always returning to the breathtaking Napa and Sonoma vineyards that lie just over the bridge

from his San Francisco home. Lyon's keen eye illuminates moments both grand and intimate that define the world of winemaking: families turning out for the harvest, a horse pulling a sled of freshly picked grapes, a midmorning workers' break to enjoy bread and cheese. *Vineyards* is a delightful gift for wine lovers, foodies, and armchair travelers.
