Resources in Education

Sport Marketing:Managing the Exchange Process presents cutting edge conceptual and empirical approaches for managers to manage relationships with consumers. The central theme of the book is the sport marketing exchange, because this process is fundamental to marketing and can be used to highlight the challenges and opportunities faced by the sport marketer. The authors challenge students, researchers, and managers in sport marketing to embrace current marketing tools that are being employed by marketers in other industry sectors. Several recent marketing techniques are discussed and illustrated within the sport context.

Official Collegiate Football Record Book

A study of one of the most decisive stages in Wales' development. In the 16th century the Roman Church was ousted from Wales and replaced by a state-established church. This is the story of how the ensuing Reformation dramatically influenced Welsh religious, literary and intellectual history.

The Federal Reporter

A guide to help administrators and faculty at institutions of higher education to fashion a practical educational program for a diverse student population and to make the best use of available resources, both on campus and in the community. The authors show how such factors as scheduling of classes, use of space and organization of departments can be employed to facilitate effective instruction and learning.

Principles of Athletic Training: A Competency-Based Approach

This series of survival handbooks is useful reading for anyone planning to spend some time abroad whether visitors, business people, immigrants, students or retirees. This book looks at living and working in America.

Which University?

Principles of Athletic Training: A Competency-Based Approach is designed to be used by athletic trainers in courses concerned with the scientific, evidence-based and clinical foundations of athletic training and sports medicine. The text leads the student from general foundations to specific concepts relative to injury prevention, evaluation, management, and rehabilitation. As the student progresses from beginning to end, he or she will understand the complexities of the profession of athletic training. An over-arching goal of the text is to make certain that each and every one of the educational competencies identified by the Education Council is specifically covered. After using this text the student should be able to apply the appropriate techniques and concepts in the day-to-day performance of his or her job as an athletic trainer.
