## **CSET Industrial and Technology Education Exam Secrets Study Guide**

The importance of state academic standards soared in January 2002 with passage of the No Child Left Behind Act (NCLB). Not only does that milestone law require all

states to have demanding academic standards in place and to demonstrate steady student progress toward academic proficiency as set forth in those standards, it also links states' accountability for increasing students' achievement to the quality of their teachers. The Higher Education Act also asks states to report annually on pass rates on licensure tests taken by prospective teachers and on how their K-12 standards relate to their teacher-preparation program standards. For the first time in U.S. history, these key elements of our public-education system are joined--and they are all joined to state academic standards that set forth what K-12 students are expected to learn in core subjects. The quality of those standards thus matters more than ever before. In this review, that quality is appraised in 2005 in reading and English language arts, arguably the most basic and consequential subject of all. Do states' current standards expect what they should? Are they demanding enough? Clear enough? Faithful to what is known about how students learn? And are states using them to guide not only the curriculum and assessment system for students but also their teacher-training programs, the tests that they require of prospective teachers, and their professional development activities for current teachers? This report answers those and many more questions about reading and English standards in 49 states and the District of Columbia. (Iowa has no state standards.) In addition to official standards documents, a wide variety of supplemental materials were reviewed against 34 criteria organized into six major categories. Criteria were scored on a 4-point scale and grade point averages were converted to letter grades. Appended are: (1) The 2005 Review Form and Methodology; (2) Criteria, Rationales, and State Results; (3) Unteachable Literature Standards; (4) Strong Literature Standards; and (5) Tables. [Report also produced by the Thomas B. Fordham Institute. Foreword by Chester E. Finn, Jr.]

### **Bibliographic Guide to Education**

The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

This timely book explores what is often overlooked in policy debates about the education of English language learners: how the day-to-day dynamics of the classroom are affected by high-stakes testing and the pressures students and teachers experience and internalize as a result. The author presents and analyzes classroom observations, student work, and test scores, as well as interviews with students and teachers. A disturbing picture of today's overtested public school classroom emerges from the events and practices described in this book. While hard to believe, all the depictions presented took place in a real elementary school classroom and reflect the current culture of extreme accountability. Overtestednot only describes the flaws in our current accountability system, but it also provides real-world solutions that can have an immediate and positive effect at the classroom, state, and national level. Chapters address key debates such as how to measure proficiency, the validity of various language assessment tools, the overuse of assessment, and the risks and benefits of teaching language arts to English language learners via mandated, structured curricula. Jessica Zacher Pandya is an Associate Professor in the Departments of Teacher Education and Liberal Studies at California State University, Long Beach. "This book tells an important tale that cannot be conveyed by numbers and tables. It is important information for teachers; for those who depend on, employ, and train teachers; and for those who create the policies under which teachers are required to operate."

—From the Foreword by Robert Rueda, University of Southern California, author of *The 3 Dimensions of Improving Student Performance: Finding the Right Solutions to the Right Problems* “How many more dire tales of ‘schooling for assessment’ must be told before we realize that teaching and testing are not the same and that scores on standardized, multiple choice achievement tests are a sorry substitute for an engaging learning environment? In this book, Jessica Zacher Pandya reaches across ideological and institutional borders to offer reasonable, pragmatic solutions for change.” —Linda Valli, Jeffrey & David Mullan Professor of Teacher Education & Professional Development, College of Education, University of Maryland “Zacher Pandya’s invaluable book exposes the injustices and absurdities of our high-stakes accountability era. Just as importantly, it limns a more academically robust and culturally relevant instructional vision for English language learners.” —Gerald Campano, University of Pennsylvania
