establishing new order in your home. Believe this: every single space in your house has the potential to function efficiently and look great. The mishmash of summer and winter clothes in the closet? Yep. Even the dreaded junk drawer? Consider it done. And the best news: it's not hard to do—in fact, it's a lot of fun. From the home organizers who made their orderly eye candy the method that everyone swears by comes Joanna and Clea's signature approach to decluttering. The Home Edit walks you through paring down your belongings in every room, arranging them in a stunning and easy-to-find way (hello, labels!), and maintaining the system so you don't need another do-over in six months. When you're done, you'll not only know exactly where to find things, but you'll also love the way it looks. A masterclass and look book in one, The Home Edit is filled with bright photographs and detailed tips, from placing plastic dishware in a drawer where little hands can reach to categorizing pantry items by color (there's nothing like a little ROYGBIV to soothe the soul). ### **The Government of India, Being a Digest of the Statute Law Relating Thereto**

This book assesses and evaluates the decision-making behavior of United States presidents and their chief advisers from Roosevelt to Kennedy pertaining to China. Seeking to dispel with the notion that each administration sought policy outcomes on the basis of a rational decision-making model, Bartley highlights the contradictions of adopted presidential decision-making processes and the nature of domestic politics as playing prejudicial and debilitating roles. The book demonstrates that elite decision-making processes interacted with assumptions made about Chinese behavior, interests, and attitudes only superficially and in some cases not at all. Misinformation and misperception were the natural outcomes. Reinforced by the politics of McCarthyism at home, intellectual debate on China policy was squashed, parochialism and nuance were shunned, and information was closed off. Ultimately, a divorce between the norm of behavior and the search for rational policy was registered in each administration. The net result was a lasting and destructive cognitive dissonance: to fit expectations of a China reality constructed, information was ignored, overlooked, and distorted. Offering new insights into the China policies of consecutive administrations from 1941 to 1963, this volume will be of great interest to scholars and students of American foreign policy, security studies, and international relations.
