This book explores, at a time when several powers have become serious players on the continent, aspects of African agency, past and present, by African writers on foreign policy, representative of geography, language and state size. In the past, African foreign policy has largely been considered within the context of reactions to the international or global “external factor”. This groundbreaking book, however, looks at how foreign policy has been crafted and used in response not just to external, but also, mainly, domestic imperatives or (theoretical) signifiers. As such, it narrates individual and changing foreign policy orientations over time—and as far back as independence—with mainly African-based scholars who present their own constructs of what is a useful theoretical narrative regarding

foreign policy on the continent—how theory is adapted to local circumstance or substituted for continentally based ontologies. The book therefore contends that the African experience carries valuable import for expanding general understandings of foreign policy in general. This book will be of key interest to scholars and students of Foreign Policy Analysis, Foreign Policy Studies, African International Relations/Politics/Studies, Diplomacy and more broadly to International Relations.

South Africa's 1996 'Final' Constitution is widely recognised as the crowning achievement of the country's dramatic transition to democracy. This transition began with the unbanning of the liberation movements and release of Nelson Mandela from prison in February 1990. This book presents the South African Constitution in its historical and social context, providing students and teachers of constitutional law and politics an invaluable resource through which to understand the emergence, development and continuing application of the supreme law of South Africa. The chapters present a detailed analysis of the different provisions of the Constitution, providing a clear, accessible and informed view of the constitution's structure and role in the new South Africa. The main themes include: a description of the historical context and emergence of the constitution through the democratic transition; the implementation of the constitution and its role in

building a new democratic society; the interaction of the constitution with the existing law and legal institutions, including the common law, indigenous law and traditional authorities; as well as a focus on the strains placed on the new constitutional order by both the historical legacies of apartheid and new problems facing South Africa. Specific chapters address the historical context, the legal, political and philosophical sources of the constitution, its principles and structure, the bill of rights, parliament and executive as well as the constitution's provisions for cooperative government and regionalism. The final chapter discusses the challenges facing the Constitution and its aspirations in a democratic South Africa. The book is written in an accessible style, with an emphasis on clarity and concision. It includes a list of references for further reading at the end of each chapter.

This book conceptualizes the World Bank Inspection Panel as a mechanism of quasi-judicial review or oversight, aimed at enhancing the accountability and legitimacy of the World Bank, which is conceived as an international institution exercising public power. The author engages in comparative constitutional law analysis, looking towards three non-international constitutional systems — the United States, the European Union, and post-Apartheid South Africa — to construct a conceptual model of judicial oversight that reflects the concept's nature, effect, and dynamics. The author employs this model to analyze the institutional history and practice of the World Bank Inspection Panel, covering the Panel's entire institutional lifespan. The author concludes that the nature, effect, and dynamics of judicial oversight — indeed, the "judicial spirit" — is more alive in this area of public international law than what might be expected. This book will be of interest to both constitutional and international lawyers, as well as legal practitioners and members of international civil society frequently engaging with international financial institutions such as the World Bank.

Reports, 1947-2001

At the theoretical level, most constitutions in Africa normally provide for the concept of separation of powers with each arm of government assigned defined roles and functions. At the operational level, the Judiciary is regarded as the junior partner with the 'restrictions' on funding in terms of spending as it is usually the prerogative of the Executive branch of government to allocate funds to the Judiciary. To what extent is the check and or control of funding affect the operations of the courts? Can in exercise of the doctrine of separation of powers be expanded with regards to the appointment, discipline and removal of judicial officers? What should be the relationship between the two other arms of government and the Judiciary with regards to control of cases to be determined by the courts. All these issues find a way of determining how effective the Judiciary can be in any governmental arrangement and structure. It is particularly challenging in Africa where democracy in practice is still at the embryonic stage especially with regards to the political office holders. The African Union has in place the African Charter on Human and Peoples' Rights with a provision for an African Commission to determine disputes. How effective is this Commission and how independent is it? This book, Judicial Independence in Africa set out to interrogate some of these issues and was put together by scholars of varied and diverse experience in and outside university environment tracing the evolution of the Judiciary as an arm of government, its relationship with other arms of

To what extent is the language of judicial opinions responsive to the political and social context in which constitutional courts operate? Courts are reason-giving institutions, with argumentation playing a central role in constitutional adjudication. However, a cursory look at just a handful of constitutional systems suggests important differences in the practices of constitutional judges, whether in matters of form, style, or language. Focusing on independently-verified leading cases globally, a combination of qualitative and quantitative analysis offers the most comprehensive and systematic account of constitutional reasoning to date. This analysis is supported by the examination of eighteen legal systems around the world including the European Court of Human Rights and the European Court of Justice. Universally common aspects of constitutional reasoning are identified in this book, and contributors also examine whether common law countries differ to civil law countries in this respect.

The Constitution of South Africa

A Commentary on the South African Constitution

The African National Congress is light years beyond the liberation movement of old. It remains a juggernaut, but its control and dominance are no longer watertight. The ANC lives the contradictions of weaknesses, cracks and factions while retaining its colossal status. As a party-movement it draws on its liberation credentials, and extracts immense power from its deep anchorage in South Africa's people. It is immersed in electoral politics that marks the state of its overwhelming power cyclically. As government the ANC is the object of protest, but not protest designed to bring the ruling party to its knees. The ANC is in command of the state, yet fails to definitively counter the deficits that make South Africa's democracy seem so diluted. Its incredulous and thus far trusting supporters

condemn but only rarely punish deployees who do not ?pass through the eye of the needle?. The ANC and the Regeneration of Political Power unpacks these contradictions. It focuses on four faces of the ANC?s political power _ the organisation, the people, political parties and elections, and policy and government _ and explores how the ANC has acted since 1994 to continuously regenerate its power. By 2011-12 the power configurations around the ANC were converging to a conjuncture holding vexing uncertainties. This book presents insights into how South African politics _ in many ways synonymous with the politics of the ANC _ is likely to unfold in years and possibly decades to come.

Is the world facing a serious threat to the protection of constitutional democracy? There is a genuine debate about the meaning of the various political events that have, for many scholars and observers, generated a feeling of deep foreboding about our collective futures all over the world. Do these events represent simply the normal ebb and flow of political possibilities, or do they instead portend a more permanent move away from constitutional democracy that had been thought triumphant after the demise of the Soviet Union in 1989? Constitutional Democracy in Crisis? addresses these questions head-on: Are the forces weakening constitutional democracy around the world general or nation-specific? Why have

some major democracies seemingly not experienced these problems? How can we as scholars and citizens think clearly about the ideas of "constitutional crisis" or "constitutional degeneration"? What are the impacts of forces such as globalization, immigration, income inequality, populism, nationalism, religious sectarianism? Bringing together leading scholars to engage critically with the crises facing constitutional democracies in the 21st century, these essays diagnose the causes of the present afflictions in regimes, regions, and across the globe, believing at this stage that diagnosis is of central importance - as Abraham Lincoln said in his "House Divided" speech, "If we could first know where we are, and whither we are tending, we could then better judge what to do, and how to do it."
