First multi-year cumulation covers six years: 1965-70.

ACCCN's Critical Care Nursing - E-Book

The new 6th edition of Core Review for Critical Care Nursing helps readers assess and build their knowledge of critical care nursing as they prepare for the certification exam. The book consists of three 200-question sample examinations that provide extensive practice and review key content. An in-depth rationale, complete with references, is included for each question. Written under the authority of the American Association for Critical-Care Nurses (AACN), this book is an ideal study tool to facilitate preparation for critical care nursing certification. This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Based on Core Curriculum for Critical Care Nursing, 6th Edition, the review is designed to follow along with the core text. Three separate sample examinations each address the complete range of important areas in critical care nursing and challenge readers' mastery of the essential knowledge base in the specialty. Answers are provided for each question, accompanied by rationales and references, to assist readers in building their knowledge. Each examination mirrors the certification examination content, multiple-choice question format, and content distribution, giving readers realistic practice for the examination. Contains a review of the synergy model, including Professional Care and Ethical Practice. Contains a review of the AHRQ and JCAHO

evidence-based practice guidelines that are incorporated in Core Curriculum for Critical Care Nursing, 6th Ed.

National Library of Medicine Current Catalog

The patient in intensive care following surgery, trauma, cardiac arrest, or other medical conditions often displays neurologic complications that demand timely and appropriate diagnosis and treatment. Complications like generalized weakness, seizures, coma, or new stroke affect many patients in surgical or medical intensive care units. Neurology of Critical Illness is the first book that helps you know what to look for in each of these patients and offers you practical advice about the best way to deal with each problem.

Critical Care Medicine

This issue of Critical Care Nursing Clinics, Guest Edited by Bobbi Leeper, MN, RN, CNS M-S, CCRN, at Baylor University Medical Center, provides review of Cardiac topics for the practicing nurse. Article topics include: Spectrum of Acute Coronary Syndromes; Mechanical Complications of AMI; Glucose Control in the Cardiovascular Patient; Pulmonary Hypertension; Pulmonary Problems in the Patient with Cardiovascular Disease; Stroke Coronary Artery Bypass Surgery; Surgery on Thoracic Aorta; Heart Valve Surgery; Complications of Cardiac Surgery; Electrolyte Disorders in the Cardiac Patient; and Cardiogenic Shock.

Intensive Care Nursing

Preceded by Textbook of critical care / [edited by] Jean-Louis Vincent [et al.]. 6th ed. c2011.

A Textbook of Children's and Young People's Nursing E-Book

A revised new edition of this comprehensive critical care nursing text, developed with the Australian College of Critical Care Nurses (ACCCN). This second edition of ACCCN's Critical Care Nursing has been fully revised and updated for critical care nurses and students in Australia and New Zealand. As well as featuring the most recent critical care research data, current clinical practice, policies, procedures and guidelines specific to Australia and New Zealand, this new edition offers new and expanded chapters and case studies. The ultimate guide for critical care nurses and nursing students alike, ACCCN's Critical Care Nursing 2e has been developed in conjunction with the Australian College of Critical Care Nurses (ACCCN). As with the first edition, the text in ACCCN's Critical Care Nursing 2e reflects the expertise of ACCCN's highly-qualified team of local and international critical care nursing academics and clinicians. This authoritative nursing resource takes a patient-centred approach, encouraging practising critical care nurses and students to develop effective, high-quality critical care nursing practice. ACCCN's Critical Care Nursing 2e outlines the scope of critical care nursing, before detailing the core components and specialty aspects of critical care nursing, such as intensive care, emergency nursing, cardiac nursing, neuroscience nursing and acute care. Specific clinical conditions such as emergency presentations, trauma, resuscitation, and

organ donation are featured to explore some of the more complex or unique aspects of specialty critical care nursing practice. expanded chapters for cardiovascular, respiratory and neurological content new chapters on Quality and Safety; Recovery and Rehabilitation; Psychological care; and Obstetric emergencies new case studies elaborate on relevant care issues critiques of recent research publications explore related topics practice tips highlight areas of care particularly relevant to daily clinical practice learning activities support knowledge, reflective learning and understanding

The Practice of Emergency and Critical Care Neurology

The AACN Procedure Manual for Critical Care, 6th Edition presents procedures for the critical care environment in an illustrated, consistent, and step-by-step format. The Procedures and Patient Monitoring sections are presented in a tabular format that includes special considerations and rationales for each intervention. References have been meticulously reviewed to ensure that the most authoritative and timely standards of practice are used. Additionally, the references supporting care recommendations are identified according to the latest AACN Evidence Leveling System to ensure that you have a complete understanding of the strength of the evidence base. UNIQUE! AACN-sponsored content ensures the highest standards of practice Comprehensive, clear, easy-to-use format allows you to quickly find and review the exact content you need Rationales provide complete information on every procedure Identified AP procedures help you judge whether a procedure is in your scope of practice Patient safety highlighted with new icons for patient identification and time-out Joint Commission Universal Protocols CDC Standard Precautions for hand washing and applying protective clothing and equipment highlighted with new icons UNIQUE! Clarity of Evidence Leveling helps you quickly grasp the strength of the evidence supporting the care recommendations Reviewed and Updated References comply with the highest standards of critical care practice Alphabetical procedures index inside the front cover provides easy access Reader-friendly design changes make it easier to identify and utilize special features

Surgical Critical Care, An Issue of Surgical Clinics - E-Book

Ensure you are up to date on all the common and urgent issues in the critical care unit with *Priorities in Critical Care Nursing, 7th Edition!* With its succinct coverage of all core critical care nursing topics, this evidence-based text is the perfect resource for both practicing nurses and nursing students alike. Using the latest, most authoritative research, this book will help you identify priorities to accurately and effectively manage patient care. Content spans the areas of medication, patient safety, patient education, nursing diagnosis, and collaborative management and much more to equip you for success in all aspects of critical care nursing. This new edition also features new case studies, new QSEN-focused call-out boxes throughout the text, a complete digital glossary, and revised chapter summaries. Evidence-based approach offers the most accurate and timely patient care recommendations based on the latest and most authoritative research, meta-analyses, and systematic reviews available. UNIQUE! Nursing Diagnosis Priorities boxes list the most urgent potential nursing diagnoses, with a page reference to the corresponding Nursing Management Plan. Nursing Management Plans provide

a complete care plan for every Priority Diagnosis that includes the diagnosis, definition, defining characteristics, outcome criteria, nursing interventions, and rationales. Case studies with critical thinking questions test your understanding of key concepts and their practical applications. Concept maps help students understand common critical health conditions, including acute coronary syndrome, acute renal failure, ischemic stroke, and shock. Collaborative Management boxes guide you through the management of a wide variety of disorders. Patient Education boxes list the concepts that must be taught to the patient and the family before discharge from the ICU. Priority Medication boxes offer a foundation in the pharmacology used most in critical care.

nurse for life – electronic access only Get to all of the high-quality content from Elsevier faster than ever! Your favourite textbooks are now available as e-books through nurse for life, allowing you to: Electronically search the book Create and share notes and highlights Save time with automatic referencing Load it up and change the way you learn! What do I get? You will be emailed a PIN code that will give you perpetual access to the electronic version of the book through nurse for life. Book description This title is directed primarily towards health care professionals outside of the United States. Covering the full age and specialty spectrum this text brings together for the first time, individual chapters from among the most respected children's nurses. This textbook is rooted in child-centred health care within a family context and draws upon best contemporary practice throughout the UK and further afield. This innovative text harnesses new design parameters in enquiry-based/problem-based learning, providing up-to-date information on a wide range of topics. In an exciting addition each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Aims, objectives, learning outcomes, a summary box in each chapter and key points assist learning and understanding Professional conversation boxes enliven the text on the page and make it more interesting to dip into Suggestions for seminar discussion topics to help teachers Case studies help to relate theory to practice Prompts to promote reflective practice Activity boxes/suggested visits Evidence based practice boxes which highlight key research studies, annotated bibliographies including details of web-sites and full contemporary references to the evidence base Resource lists including recommended web-site addresses

Neurology of Critical Illness

For critical care of laboratory rodents, there is a scarcity of sources for comprehensive, feasible, and response-oriented information on clinical interventions specific to spontaneous and induced models of disease. With the more complex cases that need critical care management, many treatment

approaches to veterinary emergencies cannot be applied directly to the laboratory rodent. The first text of its kind devoted to the challenges of critical care management for laboratory rodents, *Critical Care Management for Laboratory Mice and Rats* provides a specialized resource for all veterinary, husbandry, technical, and research professionals who utilize rodent models for biomedical research. The book covers the varied approaches to laboratory rodent patient care, health assessments, characteristics of specific disease models, monitoring and scoring of disease parameters, and humane interventions. Giving primary consideration to preservation of animal health and welfare, the text also considers how best to balance welfare with the achievement of proposed scientific objectives. Organized into five chapters, this full-color book covers the following topics: General Approaches for Critical Care Critical Care Management for Laboratory Mice Critical Care Management for Laboratory Rats Special Considerations for Critical Care Management in Laboratory Rodents Resources and Additional Information The author provides treatment guidelines with the expectation that they will be applied with apt professional judgment, allowing for further modification of clinical recommendations for improved patient-based care and welfare for research animals.

Priorities in Critical Care Nursing - E-Book

For many years, intensive care has focused on avoiding immediate death from acute, life-threatening conditions. However, there are increasing reports of a number of lingering consequences for those who do indeed survive intensive care. Examples include on-going high risk of death, neurocognitive defects, significant caregiver burden, and continued high healthcare costs. *Surviving Intensive Care*, written by the world's experts in this area, is dedicated to better understanding the consequences of surviving intensive care and is intended to provide a synopsis of the current knowledge and a stimulus for future research and improved care of the critically ill.

Surviving Intensive Care

Especially written for qualified nurses working in intensive care nursing units, this third edition has been developed to be as accessible as possible. Including new chapters on planning for pandemics and transferring patients, it has been revised throughout to ensure the evidence-base is completely up-to-date and the content reflects contemporary best practice.

Anaesthesia, Pain, Intensive Care and Emergency Medicine - A.P.I.C.E.

Completely revised and updated with 80 all-new chapters covering the most important information on current diagnostic, treatment, and preventive challenges facing feline practitioners today, *Consultations in Feline Internal Medicine* is an invaluable addition to every small animal clinician's library. Full-color illustrations and expert contributions help you master and apply the latest advances in feline nutrition, emerging diseases, pet overpopulation, advanced imaging, and more with a comprehensive, clinically relevant approach. More than 100 worldwide

leaders in small animal practice provide expert insight across the full spectrum of feline internal medicine. Extensive references make it easy to find additional information about specific topics most important to your practice. Current, evidence-based coverage reflects the latest findings and reports on pressing topics such as: Upper Respiratory Tract Aspergillosis Exocrine Pancreatic Insufficiency Diagnostic Imaging of the Ear Cardiac Blood Tests Urological Interventional Techniques A new section on feline nutrition highlights the impact of nutritional considerations on feline health. A dynamic full-color design, incorporating hundreds of NEW illustrations and tables, clarifies concepts and helps you interpret clinical data.

Nancy Caroline's Emergency Care in the Streets, Volume 2

This issue of Critical Care Nursing Clinics, Guest Edited by Stephen D. Krau, PhD, RN, CNE, from Vanderbilt University, will focus on Summer Trauma. Article topics will include Tick bites, Rabies, Snake bites, West Nile Virus, Spider bites, Allergic Reactions to Bee and Wasp Stings, Heat Exhaustion and Stroke, Near Drowning, and Musculoskeletal Injuries.

Critical Care Management for Laboratory Mice and Rats

Irwin & Rippe's Manual of Intensive Care Medicine has established itself as an invaluable reference for students, interns, residents, fellows, nurse practitioners and physician assistants, nurses, and respiratory care practitioners working in the critical care medicine environment. Known for its reader-friendly outline format and compact portable size, this handy manual builds upon its tradition of excellence in its Sixth Edition. Available both in print and electronic formats, the Sixth Edition parallels the text, Irwin & Rippe's Intensive Care Medicine, Seventh Edition, and features fully updated and revised content with a focus on patient safety.

- Fully revised content addresses recent developments, including the larger role for ultrasound, in critical care medicine.
- Annotated references are provided at the close of each chapter to guide the interested reader through key articles in the relevant literature.
- Video clips have been added where appropriate to reinforce key points and findings.
- Logical organization begins with an extensive section on Procedures and Techniques, followed by 15 sections covering organ system problems as well as palliative care, legal and ethical issues, and transplantation.
- Thorough coverage of pharmacology, poisonings, and overdoses presented in a tabular format.
- New section editors share a wealth of experience and expertise targeted to broaden readers' skills.

AACN Procedure Manual for Critical Care - E-Book

Methods in Critical Care

Finding all the information necessary to treat or meet the nutritional requirements of patients who are severely ill or establish new protocols has historically been problematic. This is addressed in Diet and Nutrition in Critical Care. This major reference work encapsulates the latest treatments and procedures to meet the

dietary and nutritional needs of the critically ill. Where evidence is available this is presented. However, where evidence is absent, the authors highlight this and provide guidance based on their analysis of other available data and their clinical experience. Diet and Nutrition in Critical Care is a three volume set which addresses the needs of all those concerned with diet and nutrition in the critically ill and covers General Aspects, Enteral Aspects, and Parenteral Aspects. Each volume is stand alone and is further divided into separate sections. The Sections in the General Aspects are: General conditions in the severely ill General metabolic effects and treatments Assessment protocols General nutritional aspects Specific nutrients Adverse aspects The next two volumes Enteral Aspects and Parenteral Aspects contain the following sections: General aspects and methods Specific nutrients Specific conditions Adverse aspects and outcomes Comparisons or dual parenteral and enteral support or transitions Preclinical studies The authors recognise the limitations in simplistic divisions and there is always difficulty in categorising treatment regimens. For example, some regimens involve transitions from one feeding protocol to another or the development of co-morbid conditions and in some cases enteral support may be supplemented with parenteral support. This complexity however, is addressed by the excellent indexing system. Contributors are authors of international and national standing, leaders in the field and trendsetters. Emerging fields of science and important discoveries relating to artificial support will also be incorporated into Diet and Nutrition in Critical Care. This volume represents a one stop shop of material related to enteral and parenteral support and is essential reading for those specialising in intensive and critical care, dietitians, nutritionists, gastroenterologists, cardiologists, pharmacologists, health care professionals, research scientists, molecular or cellular biochemists, general practitioners as well as those interested in diet and nutrition in general.

Irwin & Rippe's Manual of Intensive Care Medicine

Drs. Evie Marcolini and Haney Mallemat have assembled an expert panel of authors focusing on: Sepsis, Shock, Assessment and Treatment of the Trauma Patient in Shock, Coagulopathy and Hemorrhage, Vasopressors & Inotropes, Assessing Volume Status, Neurotrauma, Mechanical Circulatory Support, End of life, and more!

Current Therapy of Trauma and Surgical Critical Care E-Book

Here's a unified evidence-based approach to problems encountered in trauma and critical care surgical situations. Comprehensive and concise, it is ideal for a quick overview before entering the operating room or ICU, or as a review for board certification or recertification. Be prepared for the unexpected with practical, concise coverage of major surgical problems in trauma and critical care. Get expert practical and up-to-date guidance on ventilator management, damage control, noninvasive techniques, imaging, infection control, dealing with mass casualties, treating injuries induced by chemical and biological agents, and much more. Find the information you need quickly and easily through numerous illustrations, key points boxes, algorithms, and tables.

Small Animal Critical Care Medicine - E-Book

The Update compiles the most recent developments in experimental and clinical research and practice in one comprehensive reference book. The chapters are written by well recognized experts in the field of intensive care and emergency medicine. It is addressed to everyone involved in internal medicine, anesthesia, surgery, pediatrics, intensive care and emergency medicine.

Handbook of ICU Therapy

Critical Care Ultrasound Manual is a concise step-by-step guide on the assessment of ultrasounds. It trains critical care physicians in applying Rapid Assessment by Cardiac Echo (RACE) and Focused Assessment with Sonography in Trauma (FAST) to sonography principles. Animated video clips of procedures assist the reader in comprehending the content covered in the manual. Focus on helping readers obtain rapid practical information to assist management decisions. User-friendly layout. Explanatory diagrams, ultrasound images enhance the learning experience. DVD showing video clips of procedures cross-referenced in the book. Practical tips and cautions are highlighted in Boxes. MCQs on each chapter allow readers to analyse what they've learnt. The Appendices provide a checklist to assist interpretation of transthoracic echocardiogram in a systematic way, and a chapter on Doppler principles for those who wish to prepare the way for Doppler measurements.

AACN Certification and Core Review for High Acuity and Critical Care - E-Book

Now in its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the professional aspects of nursing. Volume 17 focuses on focus on complementary health and pain management and includes chapters by Mariah Snyder, Susan E. Auvil-Novak, Donna L. Algase, Beverly J. McElmurry, and Merle H. Mishel.

Cardiac Review, An Issue of Critical Care Nursing Clinics - E-Book

In the last twenty years, critical care medicine has been established as a specialty with its own therapies and procedures, with significant implications for clinical nephrology regarding severe acute renal failure. This typically multi-factorial condition is today predominantly seen in intensive care units. The complex knowledge and skills necessary to handle it have resulted in a field called Critical Care Nephrology, where nephrologist and intensivist either work side by side or have formally acquired expertise and training in both specialties. Extracorporeal renal replacement therapies, although originally used to treat end-stage renal disease patients, rapidly gained importance for acute patients. This has had far-reaching implications for the initiation and possible role of blood purification in the management of critically ill patients, widening the scope of interaction between the nephrologist and the intensivist. Experts in the field have contributed to the

present book, providing a comprehensive review of the different blood purification techniques relevant in the intensive care unit in the case of multiple organ failure. The resulting mix of established knowledge and recent results from both clinical trials and basic research constitutes a valuable tool for all professionals involved in the care of the critically ill patient.

Blood Purification in Intensive Care

With this DVD, you will learn how to successfully perform each skill and will find helpful information, tips, and pointers designed to facilitate your progression through the practical examination.

Intensive Care Medicine in 10 Years

This book identifies trends in critical care medicine that will form the basis for practice over the next ten years. Predicting the future is always risky. Nevertheless, the ideas articulated in this book are likely to serve as a road map for intensivists, hospital administrators, and governmental leaders interested in healthcare as they seek to improve the quality and efficiency of hospital-based services.

Year Book of Critical Care Medicine 2012 - E-Book

In modern medicine the most functional methodologies are taking an increasing importance in spreading informations, rendering it credible while at the same time using reliable data to focus interaction between basic science and clinical medicine. Critical care medicine embraces these needs and more than any other discipline thrives and develops thanks to interdisciplinary contact. APICE 2004 has been organised to provide precise answers to these issues. In particular, considerable emphasis has been given to the reviews regarding the most important aspects - or the most significant clinical developments - in the sectors involving variety of functions: neurological, respiratory and cardiovascular, gastrointestinal, metabolism and perfusion; trauma infections, sepsis and organ failure; perioperative medicine and life support techniques; information technology dedicated to clinical medicine, but also as a means of information and education. The contributing authors are all part of leading research groups at the international level in the various sectors presented in the volume.

Pediatric Critical Care E-Book

It's the ideal go-to reference for the clinical setting! Compact and easy to use, Manual of Critical Care Nursing, 6th Edition presents essential information on approximately 80 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialists Marianne Baird and Sue Bethel separate the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. A concise format presents the material in a

way that reflects a practicing nurse's thought processes. Coverage of approximately 80 critical care conditions/disorders includes those most commonly seen in critical care units. Chapter outlines provide easy access to disorders. A portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Unique! Gerontology icon highlights considerations relating to the care of older adults. Unique! Research briefs in special boxes discuss selected research studies for evidence-based patient care. Unique! The latest NANDA-approved nursing diagnoses increase familiarity with NANDA terminology. Appendixes provide quick reference to information needed in the critical care setting. Revised format mirrors a practicing nurse's approach to patient care, making it easier to find information. Newly formatted care plans incorporate diagnoses, interventions, and desired outcomes in a consistent, logical organization. Patient safety alerts and high alerts call attention to issues important to a patient's safety. Unique! Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Unique! Collaborative Management tables concisely summarize key points while incorporating nationally recognized guidelines. Colored tabs mark the location of each body system, making topics easier to find. Smaller trim size increases portability for use in the unit or bedside, while enhancing readability.

Textbook of Critical Care

Focus on Critical Care

Current Catalog

The Practice of Emergency and Critical Care Neurology serves as the definitive authoritative reference on the care of the patient with a critical neurologic disorder at risk of deterioration and in need of immediate attention. This work is an expanded new edition of the book on the management of patients with critical neurologic disorders. This single-authored monograph is broad in scope and follows the patients from the very moment they enter the emergency department to their care in the neurosciences intensive care unit. This book condenses the essential information into several sections. These are: The General Principles of Recognition of Critically Ill Neurologic Patients in the Emergency Department, The Evaluation of Presenting Symptoms Indicating Urgency and Critical Emergency, General Principles of Management of Critically Ill Patients, Monitoring Devices and Diagnostic Tests, Complete Management of Specific Disorders in the Neurosciences Intensive Care Unit, Postoperative Neurosurgical and Neurointerventional Complications, Management of Medical Complications and End of Life Care. This accessibly written book differs from the conventional by specifically following the time course of clinical complexities as they emerge and change. It offers advice on how to diagnose and manage acute neuromuscular respiratory failure, acute worrisome headache, acute febrile confusion, acute diplopia, acute movement disorders, acute paraplegia, seizures and coma of uncertain cause in the emergency department. The major disorders requiring neurocritical care are covered in great detail and include traumatic brain injury aneurysmal subarachnoid hemorrhage, cerebral hemorrhage, hemispheric ischemic stroke, basilar artery

occlusion, acute bacterial meningitis and encephalitis, myasthenic crisis and severe Guillan Barre syndrome. This book comes with a pocket book of selected tables and figures. This booklet covers all essential points for quick reference and has been considered a 'survival guide' for the house staff.

Intensive Care Medicine

Small Animal Critical Care Medicine is a comprehensive, concise guide to critical care, encompassing not only triage and stabilization, but also the entire course of care during the acute medical crisis and high-risk period. This clinically oriented manual assists practitioners in providing the highest standard of care for ICU patients. More than 150 recognized experts offer in-depth, authoritative guidance on clinical situations from a variety of perspectives. Consistent, user-friendly format ensures immediate access to essential information. Organ-system, problem-based approach incorporates only clinically relevant details. Features state-of-the-art invasive and non-invasive diagnostic and monitoring procedures, as well as an extensive section on pharmacology. Appendices provide conversion tables, continuous rate infusion determinations, reference ranges, and more.

Diet and Nutrition in Critical Care

An important review on critical care for the general surgeon! Topics include: heparin induced thrombocytopenia, monitoring devices, mechanical ventilation, removal from mechanical ventilations, common complications in the critically ill patients, common drugs in the SICU, hypovolemic shock resuscitation, sepsis, nutrition, renal management, pain management, family engagement, and more!

Manual of Critical Care Nursing - E-Book

This new, expanded and updated edition of Handbook of ICU Therapy builds on the success of the first edition and continues to provide concise updates on a broad spectrum of issues relating to care of the critically ill patient. As with the first edition, it is equally applicable to anaesthetists, intensivists, operating department practitioners and anaesthetic/theatre/recovery nurses, and the heart of the book focuses on providing practical information in a readable and easily accessible format. All of the authors are directly involved in ICU practice and/or research and are familiar with the most recent developments in this fast-moving area of medicine.

Critical Care Emergencies, An Issue of Emergency Medicine Clinics of North America,

This second edition of the definitive volume on the diagnosis and management of neurologic complications during critical illness has been thoroughly revised and expanded to bring the book up-to-date. Important features include information on neurologic complications in organ transplant recipients, muscle and nerve injury in critical illness, status epilepticus, cerebral edema, multisystem trauma including cervical spine and traumatic brain injury, and prognosis. The second edition includes entirely new chapters on: *Evaluation of coma focused on structural

causes *Neurologic complications in the critically ill pregnant patient *Ethical issues and practical problems with withdrawal of life support New material on: *Pathophysiological mechanisms (set off in different type so that these sections can be read separately) *Neuroimaging studies (including the addition of two pages of full color plates) *Electrophysical examples including EEG, evoked potentials, and nerve conduction studies The first edition (published under the title Neurology of Critical Illness by F.A. Davis in 1995) was highly praised as a concise, practical volume introducing this new and rapidly-evolving specialty that focuses on the care of patients in general medicine and surgical intensive care units with significant disease of the nervous system, either as a primary event or secondary to involvement of organs outside the nervous system. The book is intended for neurologists, intensivists, anesthesiologists, pulmonologists, neurosurgeons, neurology and ICU nurses, and transplant surgeons.

New Serial Titles

Here's the most clinically oriented critical care text focusing on the adult patient. In full-color and superbly illustrated with clinical photographs, imaging studies, and management algorithms, and with a broad multidisciplinary focus, this text will help you enhance your skills at any level of training. Stands alone as a clinically oriented comprehensive reference. Completely updated and authorship expanded to reflect the evolution in critical care practice. In color for the first time, with new color schematics and treatment algorithms for greater ease of reference. Utilizes key points lists at the end of chapter, to help you make decisions rapidly and easily. Delivers key references that list other useful resources for information. Includes these seven new chapters to keep you on the cutting edge of your specialty: Assessment of Cardiac Filling and Blood Flow Mechanical Ventilation of Obstructive Airways Disease Mechanical Ventilation of Acute Respiratory Distress Syndrome Severe Sepsis and Multiple Organ Dysfunction Stroke Delirium, Psychosis, Sleep and Depression in the ICU ICU Education

Neurologic Complications of Critical Illness

Provide the latest in superior quality care for critically ill children with the full-color, updated 4th Edition of Fuhrman and Zimmerman's Pediatric Critical Care. In print, and now online, Drs. Bradley P. Fuhrman and Jerry J. Zimmerman use a comprehensive, organ-systems approach to help you manage a full range of disease entities. Get up-to-the-minute knowledge of topics such as acute lung injury, multiple organ dysfunction syndrome, and more. Implement new clinical techniques and diagnostic tests, weigh the varying perspectives of six associate editors with expertise in the field, reference 1,000+ illustrations to aid diagnosis, and keep sharp with online access to board-style review questions. This definitive title will ensure that you consistently deliver the very best intensive care to your pediatric patients. Focus on the development, function, and treatment of a wide range of disease entities with the text's clear, logical, organ-system approach. Keep all members of the pediatric ICU team up to date with coverage of topics particularly relevant to their responsibilities. Keep current with the latest developments in palliative care, mass casualty/epidemic disease, acute respiratory failure, non-invasive ventilation, neurocritical care, neuroimaging, hypoxic-ischemic encephalopathy, stroke and intracerebral hemorrhage, systemic

inflammatory response syndrome, acute lung injury, multiple organ dysfunction syndrome, and much more. Quickly find the information you need with sections newly reorganized for easier access. Gain the perspectives of six expert associate editors on all the new developments in the field. Understand complex concepts quickly and conclusively with a brand new full-color format and more than 1,000 illustrations. Search the full text, download the image library, and access online board review questions targeting every relevant topic, all at www.expertconsult.com.

Annual Review of Nursing Research, Volume 17, 1999

Textbook of Critical Care E-Book

Textbook of Critical Care, by Drs. Jean-Louis Vincent, Edward Abraham, Frederick A. Moore, Patrick Kochanek, and Mitchell P. Fink, remains your best source on effective management of critically ill patients. This trusted reference - acclaimed for its success in bridging the gap between medical and surgical critical care - now features an even stronger focus on patient outcomes, equipping you with the proven, evidence-based guidance you need to successfully overcome a full range of practice challenges. Inside, you'll find totally updated coverage of vital topics, such as coagulation and apoptosis in certain critical care illnesses, such as acute lung injury and adult respiratory distress syndrome; sepsis and other serious infectious diseases; specific organ dysfunction and failure; and many other vital topics. At www.expertconsult.com you can access the complete contents of the book online, rapidly searchable, with regular updates plus new videos that demonstrate how to perform key critical care procedures. The result is an even more indispensable reference for every ICU. Access the complete contents of the book online at www.expertconsult.com, rapidly searchable, and stay current for years to come with regular online updates. Practice with confidence by consulting with a "who's who" of global experts on every facet of critical care medicine. Implement today's most promising, evidence-based care strategies with an enhanced focus on patient outcomes. Effectively apply the latest techniques and approaches with totally updated coverage of the importance of coagulation and apoptosis in certain critical care illnesses, such as acute lung injury and adult respiratory distress syndrome; sepsis and other serious infectious diseases; specific organ dysfunction and failure; and many other vital topics. See how to perform key critical care procedures by watching a wealth of new videos online. Focus on the practical guidance you need with the aid of a new, more templated format in which basic science content has been integrated within clinical chapters, and all procedural content has been streamlined for online presentation and paired with videos.

Consultations in Feline Internal Medicine, Volume 6 - E-Book

Designated a Doody's Core Title! Supporting the urgent need for new patient safety guidelines and practices, Focus on Patient Safety, provides the most current and authoritative research and review to help decision makers develop new and much-needed standards and practices in nursing. With contributions from experts

in the field, this new up-to-date reference focuses on key disciplines and topics that are critical to patient safety today including: Patient safety indicators Medication errors Falls and injury prevention Hospital-acquired infections Patient safety in acute-care units in hospitals Medications in the perioperative environment Home visit programs for the elderly Nursing homes Informatics issues Organizational, climate, and culture factors From new and emerging issues in patient safety to a review of research methods and measurement, this new 24th volume in the Annual Review of Nursing Research (ARNR) series continues to provide the highest standards of content and authoritative review of research for students, researchers, and clinicians.

Annual Review of Nursing Research, Volume 24, 2006

The Year Book of Critical Care Medicine brings you abstracts of articles carefully selected from more than 500 journals worldwide. Expert commentaries evaluate the clinical importance of each article and discuss its application to your practice. Topics such as Acute Lung Injury, Cardiac Arrest, Hemodynamics and Monitoring, Burns, Postoperative Management, Renal, Trauma and Overdose, and Pharmacology/Sedation-Analgesia are represented highlighting the most current and relevant articles in the field.
