Our dress is our identity. In dress, we live, move and have our social being. This book shows how the dressed body is central to the construction of a recognizable identity and provides accessible accounts of the particular dress 'ways' associated with a considerable variety of lifestyles. Churchgoers, ballerinas, Muslim schoolgirls, glamour models, 'vampires', monks and country gents all fashion a social self through dress. These cultures all have characteristic forms of displaying the dressed body for social visibility - whether in religion, sex, performance, or on the street. In contrast to much of the literature on dress, which often assumes a lack of agency on the part of the wearer, contributors to this book focus on the conscious manipulation of dress to reflect an identity that is designed to look 'different'. Why do people choose to mark themselves off socially from others? What are the costs and benefits? For every dress 'identity', there is a corresponding set of entitlements and expectations as to behaviour and belief. 'Priestly' bodies inhabit a different universe of response from strippers, just as 'Gothic' bodies experience the public gaze differently from 'Methodist' ones. Where one look commands respect in one setting, in another it can incite antipathy and rejection. Contributors tackle head-on this 'paradox of dress' - its potent power to unite and divide. Evidence of the dressed body's social ambiguity as a medium of consensus, on the one hand, and conflict, on the other, provides a glimpse through dress into an elementary condition of social and cultural life that has all too rarely been part of historical and sociological discourse.

Ned Rorem explores the state of contemporary classical music in a magnificent collection of personally selected essays and critiques of masterworks, lesser works, and their legendary creators Pulitzer Prize-winner Ned Rorem's musical compositions are considered some of the finest produced in the past century. His literary works have been hailed as "scintillating" (Time magazine) and "extraordinary" (The Washington Post). Rorem's remarkable twin talents are brilliantly intertwined in *Settling the Score*, a masterful collection of essays on music, composers, and the state of the art. Selected by Rorem himself, these enthralling and provocative pieces examine the works of the great and (in the author's lively, unabashed opinion) the not-so-great masters of twentieth-century classical music—Debussy, Ravel, Copland, Gershwin, Barber, Cage, Bernstein, Britten, Stravinsky, and others. With keen precision, he dissects the so-called serious music of our time while predicting where the form is bound in the future. Never lacking in intelligence or wit, each essay in *Settling the Score* sings in a voice that is clear and true.

Technology has been an essential factor in the production of dress and the cultures of fashion throughout human history. Structured chronologically from prehistory to the present day, this is the first broad study of the complex relationship between dress and technology. Over the course of human history, dress-making and fashion technology has changed beyond recognition: from needles and human hands in the ancient world to complex 20th-century textile production machines, it has now come to include the technologies that influence dress styles and the fashion industry, while fashion itself may drive aspects of technology. In the last century, new technologies such as the electronic media and high-tech manufacturing have helped not just to produce but to define fashion: the creation of automobiles prompted a decline in long skirts for women while the beginnings of space travel caused people to radically rethink the function of dress. In many ways, technology has itself created avant garde and contemporary fashions. Through an impressive range of international case studies, the book challenges the perception that fashion is unique to western dress and outlines the many ways in which dress and technology intersect. Dress, Fashion and Technology is ideal reading for students and scholars of fashion studies, textile history, anthropology and cultural studies.

documents in fashion history. Providing a revealing window onto the Renaissance, they chronicle how style-conscious accountant Matthäus Schwarz and his son Veit Konrad experienced life through clothes, and climbed the social ladder through fastidious management of self-image. These bourgeois dandies' agenda resonates as powerfully today as it did in the sixteenth century: one has to dress to impress, and dress to impress they did. The Schwarzes recorded their sartorial triumphs as well as failures in life in a series of portraits by illuminists over 60 years, which have been comprehensively reproduced in full color for the first time. These exquisite illustrations are accompanied by the Schwarzes' fashion-focussed yet at times deeply personal captions, which render the pair the world's first fashion bloggers and pioneers of everyday portraiture. *The First Book of Fashion* demonstrates how dress – seemingly both ephemeral and trivial – is a potent tool in the right hands. Beyond this, it colorfully recaptures the experience of Renaissance life and reveals the importance of clothing to the aesthetics and every day culture of the period. Historians Ulinka Rublack's and Maria Hayward's insightful commentaries create an unparalleled portrait of sixteenth-century dress that is both strikingly modern and thorough in its description of a true Renaissance fashionista's wardrobe. This first English translation also includes a bespoke pattern by TONY award-winning costume designer and dress historian Jenny Tiramani, from which readers can recreate one of Schwarz's most elaborate and politically significant outfits.

Henry VIII used his wardrobe, and that of his family and household, as a way of expressing his wealth and magnificence. This book encompasses the first detailed study of male and female dress worn at the court of Henry VIII (1509-47) and covers the dress of the king and his immediate family, the royal household and the broader court circle. Henry VIII's wardrobe is set in context by a study of Henry VII's clothes, court and household. ~ ~ As none of Henry VIII's clothes survive, evidence is drawn primarily from the great wardrobe accounts, wardrobe warrants, and inventories, and is interpreted using evidence from narrative sources, paintings, drawings and a small selection of contemporary garments, mainly from European collections. ~ ~ Key areas for consideration include the king's personal wardrobe, how Henry VIII's queens used their clothes to define their status, the textiles provided for the pattern of royal coronations, marriages and funerals and the role of the great wardrobe, wardrobe of the robes and laundry. In addition there is information on the cut and construction of garments, materials and colours, dr given as gifts, the function of livery and the hierarchy of dress within the royal household, and the network of craftsmen working for the court. The text is accompanied by full transcripts of James Worsley's wardrobe books of 1516 and 1521 which provide a brief glimpse of the king's clothes.
