### **The Feeling Great! Wellness Program for Older Adults**

Functional Fitness for Older Adults is an illustrated guide for activity professionals working with adults over the age of 65--especially those who are unable to complete activities of daily living because of poor functional fitness levels. This guide provides you with physical activity programs that are proven to be both safe and effective for improving the functional performance levels of your participants as well as improving their health-related quality of life. The guide includes a variety of specialized activity programs that are developed to meet the specific needs of older adults. They are designed to improve upper- and lower-body strength, balance, range of motion, and functional performance. Each exercise program is approximately 20 to 30 minutes long and works easily with busy schedules, a variety of participants' needs, and institutional budgets. Specific guidelines are included for working with older adults with arthritis, chronic obstructive pulmonary disease, depression, diabetes, heart disease, hypertension, osteoporosis, or stroke.

Extensive research has verified that the guidelines and programs are safe and will result in significant functional gains for most participants. There are nine activity programs to choose from. Three are basic strength training programs that are designed for different fitness levels, with each program including exercises to strengthen the major muscle groups needed for performing daily activities. One program is a walking and wheeling program for cardiovascular conditioning. The five remaining programs address specific functional needs, disabilities, and health concerns, including balance and mobility problems, incontinence, and dementia. These five programs may be offered in conjunction with one of the three strength training programs. Most of the programs may be conducted either on an individual basis or in a group setting, and both seated and standing exercises are included. These nine cost-effective programs offer safe and effective strategies for developing the functional performance levels of you participants. The functional fitness programs enable you to improve the quality of life for your older adult population, help those who are functional to maintain or improve their functional level, enable others to regain the ability to participate in activities that are meaningful, and increase the degree of independence for most. The general fitness programs provide an easy-to-difficult progression: -Lift to Function increases lower-body strength. -Squeeze to Function increases upper-body strength. -Strengthen to Function increases both lower- and upper-body strength. -Walk 'n' Wheel to Function improves cardiovascular fitness. -Balance to Function reduces participants' chances of falling. The specialized programs enable you to address

the specific functional needs of those with decreased ability to walk, incontinence, and dementia; and those who are wheelchair- or bed-bound also have specialized programs: -Step Up to Function improves circulation and strength needed for walking or climbing stairs. -Hold It to Function targets specific muscle groups to help reduce incontinence. -Remember to Function helps decrease behavioral disturbances such as wandering and agitation in those who have dementia. -Move to Function is designed for those who cannot stand and are bedridden because of muscle weakness or illness. Functional Fitness for Older Adults includes materials that make it easy for you to conduct the programs. All exercises are organized into warm-up and cool-down exercises, upper-body exercises, lower-body sitting exercises, lower-body standing exercises, and seated modifications. Included are individual and group balance activities, foot exercises, and walking and wheeling activities. All exercise descriptions list the muscles worked and instructions for performing the ex

“Wow. This book totally rocks. It arrived on a day when I was in deep confusion and sadness about my age. Everything about it, from my invisibility to my neck. Within four or five wise, passionate pages, I had found insight, illumination, and inspiration. I never use the word empower, but this book has empowered me.”

—Anne Lamott, New York Times bestselling author Author, activist, and TED speaker Ashton Applewhite has written a rousing manifesto calling for an end to discrimination and prejudice on the basis of age. In our youth obsessed culture, we’re bombarded by media images and messages about the despairs and declines of our later years. Beauty and pharmaceutical companies work overtime to convince people to purchase products that will retain their youthful appearance and vitality. Wrinkles are embarrassing. Gray hair should be colored and bald heads covered with implants. Older minds and bodies are too frail to keep up with the pace of the modern working world and older should just step aside for the new

generation. Ashton Applewhite once held these beliefs too until she realized where this prejudice comes from and the damage it does. Lively, funny, and deeply researched, *This Chair Rocks* traces her journey from apprehensive boomer to pro-aging radical, and in the process debunks myth after myth about late life. Explaining the roots of ageism in history and how it divides and debases, Applewhite examines how ageist stereotypes cripple the way our brains and bodies function, looks at ageism in the workplace and the bedroom, exposes the cost of the all-American myth of independence, critiques the portrayal of elders as burdens to society, describes what an all-age-friendly world would look like, and offers a rousing call to action. It's time to create a world of age equality by making discrimination on the basis of age as unacceptable as any other kind of bias. Whether you're older or hoping to get there, this book will shake you by the shoulders, cheer you up, make you mad, and change the way you see the rest of your life. Age pride!

activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical

second edition provides a broader focus on balance, a critical component of any functional fitness program, to aid in designing classes that incorporate various stability exercises. Exercises that provide significant benefits to balance are indicated with a symbol to ensure effective program design. Additional features of this edition include the following:

- Learning objectives at the beginning and review questions at the conclusion of each chapter provide a framework for understanding.
- Reproducible forms provide readers with easy-to-use appraisals, questionnaires, and exercise logs for evaluating clients.
- Checklists and reference charts highlight key areas of concern and consider specific needs when planning functional fitness programs for clients.
- Guidelines and safety precautions for special conditions and how they apply to range-of-motion exercises, resistance training, aerobic exercise, and stretching have been updated.
- Specific exercise instructions, including variations and progression options, show professionals how to add interest and challenge for participants.
- Suggested resources encourage exercise leaders to continue their education.

To enhance learning and program development, the text is divided into two parts. Part I covers planning an exercise program for frail elders or adults with special needs, including knowing the needs of class participants, motivating students to exercise, and keeping them safe while participating. It also offers strategies for success, including basic class structure creating a sense of fun and community. Part II covers implementation of a successful program, including course design, warm-up and cool-down, and exercises for range of motion, resistance training, aerobic training, and stretching,

What if your lack of mobility isn't due to your age, but simply the number of years you haven't been moving well? Dynamic Aging presents a new paradigm in senior fitness: your age isn't responsible for your lack of mobility; your habits are! In this powerful and effective guide to moving better, geared specifically for those

50-plus, biomechanist and movement teacher Katy Bowman details how readers can regain their balance, maintain their ability to drive, keep their feet healthy and functional, and regain mobility and reduce pain throughout their bodies. Bowman's exercises are straightforward, require no special equipment, and include modifications for readers of all fitness levels. To combat the idea of being 'too old' to make great improvements, *Dynamic Aging* is filled with stories and advice from four septuagenarians who have been following Bowman's program for a decade, avoiding surgeries, eliminating pain, and regaining freedom and ease in their bodies they thought they had lost permanently to "old age." From hiking mountains to climbing ladders and walking on cobblestones with ease, each of these women embodies the book's message: No matter where you're starting, if you change how you move, you can change how you feel.

### **Fitness Hacks for over 50**

The ideal graduation gift for anyone about to enter the workforce, a witty, practical guide to 200 difficult professional conversations—featuring all-new advice from the creator of the popular website *Ask a Manager* and New York's work-advice columnist. There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she

tackles the tough discussions you may need to have during your career. You'll learn what to say when

- coworkers push their work on you—then take credit for it
- you accidentally trash-talk someone in an email then hit “reply all”
- you're being micromanaged—or not being managed at all
- you catch a colleague in a lie
- your boss seems unhappy with your work
- your cubemate's loud speakerphone is making you homicidal
- you got drunk at the holiday party

Advance praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Clear and concise in its advice and expansive in its scope, Ask a Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in).”—Sarah Knight, New York Times bestselling author of *The Life-Changing Magic of Not Giving a F\*ck*

### **Just Move!**

The bestselling author of *The Willpower Instinct* introduces a surprising science-based book that doesn't tell us why we should exercise but instead shows us how to fall in love with movement. Exercise is health-enhancing and life-extending, yet many of us feel it's a chore. But, as Kelly McGonigal reveals, it doesn't have to be. Movement can and should be a source of joy. Through her trademark blend of science and storytelling, McGonigal draws on insights from neuroscience, psychology, anthropology, and evolutionary biology, as well as memoirs, ethnographies, and philosophers. She shows how movement is intertwined with some of the most basic human joys, including self-expression, social connection,

Fast After 50 is for every endurance athlete who wants to stay fast for years to come. For runners, cyclists, triathletes, swimmers, and cross-country skiers, getting older doesn't have to mean getting slower. Drawing from the most current research on aging and sports performance, Joe Friel—America's leading endurance sports coach—shows how athletes can race strong and stay healthy well past age 50. In his groundbreaking book *Fast After 50*, Friel offers a smart approach for athletes to ward off the effects of age. Friel shows athletes how to extend their racing careers for decades—and race to win. *Fast After 50* presents guidelines for high-intensity workouts, focused strength training, recovery, crosstraining, and nutrition for high performance: How the body's response to training changes with age, how to adapt your training plan, and how to avoid overtraining How to shed body fat and regain muscle density How to create a progressive plan for training, rest, recovery, and competition Workout guidelines, field tests, and intensity measurement In *Fast After 50*, Joe Friel shows athletes that age is just a number—and race results are the only numbers that count. With contributions from: Mark Allen, Gale Bernhardt, Amby Burfoot, Dr. Larry Creswell, John Howard, Dr. Tim Noakes, Ned Overend, Dr. John Post, Dr. Andrew Pruitt, and Lisa Rainsberger.
