In this inspired new edition, the authors illustrate accounting not as a set of technical procedures to be memorized, but as a way of identifying and understanding business problems and a means for evaluating potential solutions. Now in its fourth edition, the primary goal of this text remains the same -- to teach students to understand a company's financial statement information. This unique organization introduces students to how a business uses accounting information and then emphasizes activities of the firm in the second half of the book. This engages students in the type of financing, investing and operating decisions that a firm has to make. The approach is especially ideal for students who will become users of accounting information because concepts - not procedures - are emphasized.

Cornerstones of Financial Accounting

Financial Accounting

With rising competition in the field, independent accountants as well as accounting firms are finding it harder to survive and make a profit. According to the author of this management guide, the difficulty is compounded by the fact that most professional accountants lack training or expertise in managing a practice. Kastantin, an experienced CPA, consultant, and accounting educator, has written a comprehensive manual that will enable accountants to upgrade their practices systematically and develop the human relations competence that is vital to managing a successful practice. The first several chapters discuss the need to accept a basic business orientation through a stated business purpose and to define the size and scope of a practice as well as personal finance goals. The author next considers such basics as liability insurance, employment contracts, and financing methods. A major section of the book is devoted to working relationships with bookkeepers and other staff, partners, bankers, and the Internal Revenue Service. Chapters on client services offer specific guidelines on

management concerns relating to auditing, review and compilation, tax practice, management advisory services, and client write-up services. Turning to the question of marketing, the author gives detailed advice on soliciting clients, advertising and the creating of a firm image, and explores the ethical issues involved. He describes the various ways that computers can assist the practitioner in managing a practice. He suggests an organized approach to accounting practice administration and outlines the use of financial statements and break-even analysis in practice management. The final chapter, which includes a case study, deals with business budgeting and sales forecasting as they relate to banking relationships, business management, and personal financial planning. This convenient, logically organized manual is an invaluable resource for the accounting practitioner who wishes to maximize financial return and to develop the kind of well-run practice that can retain clients despite increased competition. It is an appropriate acquisition for the business and accounting collections of academic and public libraries.

Advanced Financial Accounting

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory

student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.
