Traditionally, network security (firewalls to block unauthorized users, Intrusion Prevention Systems (IPS) to keep attackers out, Web filters to avoid misuse of Internet browsing, and antivirus software to block malicious programs) required separate boxes with increased cost and complexity. Unified Threat Management (UTM) makes network security less complex, cheaper, and more effective by consolidating all these components. This book explains the advantages of using UTM and how it works, presents best practices on deployment, and is a hands-on, step-by-step guide to deploying Fortinet's FortiGate in the enterprise. Provides tips, tricks, and proven suggestions and guidelines to set up FortiGate implementations Presents topics that are not covered (or are not covered in detail) by Fortinet's documentation Discusses hands-on troubleshooting techniques at both the project deployment level and technical implementation area

Blessing is God's idea--it's the first thing He did when He made Adam and Eve, and it's the last thing Jesus did before He ascended into heaven. And yet many of us picture God as a grumpy old man who measures out blessing in measly thimblefuls. Building on her book The Promise of Blessing, which explores the Aaronic blessing from Numbers 6, this encouraging devotional from Kate Patterson offers daily opportunities to see God afresh through that shining blessing made to God's people as they wandered in the desert. Though thousands of years old, this blessing still holds surprising truths for God's children today. With reflections, Scripture, and prayer prompts, Patterson looks at each phrase of God's blessing in Numbers 6. Each day shares a significant discovery about the God at the heart of our faith--a God who loves us and longs to bless His people so they can be a blessing to others. For those wanting to know God's blessing for themselves, this inviting giftbook will bless not only them but also those around them.

These artists, heeding the call of Constructivist manifestos to abandon the nonobjective painting and sculpture of the early Russian avant-garde and enter into Soviet industrial production, aimed to work as "artist-engineers" to produce useful objects for everyday life in the new socialist collective." "Kiaer shows how these artists elaborated on the theory of the socialist object-as-comrade in the practice of their art. They broke with the traditional model of the autonomous avant-garde, Kiaer argues, in order to participate more fully in the political project of the Soviet state. She analyzes Constructivism's attempt to develop modernist forms to forge a new comradely relationship between human subjects and the mass-produced objects of modernity."--BOOK JACKET.

What is philosophy, why does it matter, and how would it be different if women wrote more of it? At a time when the importance of philosophy, and the humanities in general, is being questioned and at a time when the question of gender equality is a huge public question, 22 women in philosophy lay out in this book how they think of philosophy, what they actually do, and how that is applied to actual problems. By bringing together accounts of the personal experiences of women in philosophy, this book provides a new understanding of the ways in which the place of women in philosophy has changed in recent decades while also introducing the reader to the nature and the value of philosophy.

This book provides a stocktake and comparative socio-legal analysis of law enforcement cooperation strategies in four different regions of the world: the European Union (EU), North America, Greater China and Australasia. The work analyses law enforcement cooperation mechanisms within the socio-legal framework of global normmaking. The strategies addressed range from legal frameworks facilitating cooperation to formal and informal police networks and cooperation practices. The study also takes into account crime-specific engagement, for example campaigns focusing on drug crimes, terrorism, financial crime, kidnappings and other offences. It explores challenges in policing practice and human rights protection in each region that could be countered by existing strategies in another. As regions usually develop more advanced cooperation mechanisms than exist at a global scale, strategies found in the former could help find solutions for the latter. To map existing strategies and assess their impact on both human rights and policing practice this study relies on an assessment of the primary and secondary literature sources in each region as well as interviews with practitioners ranging from senior police officers to prosecutors, government officials, customs and military staff. This book presents a valuable resource for academics and postgraduate students, as well as policing and criminal justice practitioners, government officials and policy makers.

Transparency and Apperception: Exploring the Kantian Roots of a Contemporary Debate explores the links between the idea that belief is transparent and Kant's claims about apperception. Transparency is the idea that a person can answer questions about whether she, for instance, believes something by considering, not her own psychological states, but the objects and properties the belief is about. This marks a sharp contrast between a first-person and third-person perspective on one's current mental states. This idea has deep roots in Kant's doctrine of apperception, the claim that the human mind is essentially self-conscious, and Kant held that it underlies the responsibility that a person has for certain of their own mental states. Nevertheless, the idea of transparency and its roots in apperception remain obscure and give rise to difficult methodological and exegetical questions. The contributions in this work address these questions and will be required reading for anyone working on this intersection of the philosophy of mind and language, and epistemology. The chapters in this book were originally published in a special issue of the Canadian Journal of Philosophy.
