Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide

specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

Potter & Perry's Fundamentals of Nursing - Australian Version

Now packaged with a bonus CDROM, the Fourth Edition of this comprehensive text provides an introduction to the broad range of the discipline of nursing, including theory, the nursing process, and step by step procedures.

Gain the knowledge and skills you need to effectively care for adult patients. Medical-Surgical Nursing, 7th Edition covers both medical-surgical and psychiatric mental health conditions and disorders while building on the fundamentals of nursing. This essential text focuses on nursing roles, settings, trends, body systems and their disorders, and emergency and disaster management. Unique to this edition is the gerontologic nursing unit which addresses physiologic and psychosocial changes in the older adult, along with related disorders common to the elder patient - the primary patient group population you'll encounter in practice. It also emphasizes culturally competent care and holistic nursing, while thoroughly covering all relevant NCLEX-PN® test plan content. With updated guidelines on diabetes, heart failure, asthma, COPD, and cancer treatment protocols, no other resource offers the breadth of topics at a level that is so perfectly tailored to the LPN/LVN student. UNIQUE! Gerontologic nursing unit covers physiologic and psychosocial changes in the older adult, along with related disorders common to the elder patient, the primary patient group for whom LPNs provide care. UNIQUE! In-depth pharmacology coverage includes: the Pharmacology Tutorial covering drug classifications, how drugs work, and nursing responsibilities; Pharmacology Capsules boxes providing medication information, precautions for use, interactions, and

side/adverse effects; and Pharmacology and Medications tables including classification, use/action, side/adverse effects, and nursing interventions. Nursing care plans reinforce the nursing process and focus on critical thinking. Get Ready for the NCLEX-PN® Examination! sections at the end of chapters include key points, review questions, and case studies that address the various NCLEX® Client Needs categories. Coordinated Care boxes highlight team approach to patient care, helping you to prioritize tasks and assign them safely to assistive personnel. Patient Teaching Plans provide bulleted lists of nursing instructions for patients, stressing the role and responsibility of the LPN/LVN to reinforce patient education. Health Promotion Considerations boxes highlight timely wellness and disease prevention topics. Cultural Considerations boxes discuss the importance of providing culturally competent care related to various clinical situations. Put on Your Thinking Cap boxes allow you to pause and consider the practical implications of what you have just read. Nutritional Considerations boxes are spotlighted at appropriate points throughout the text to emphasize the role that nutrition plays in disease and nursing care. Complementary and Alternative Therapies focus on nontraditional therapies along with precautions and possible side effects. Key terms with phonetic pronunciations help improve terminology and language skills of English-as-a-Second-Language (ESL) students and students with limited proficiency in English before they enter clinical practice. NEW! Organization of disorders units consolidates anatomy and physiology, nursing assessment/data collection, and diagnostic tests into one chapter. NEW! Updated guidelines on diabetes, heart failure, asthma, COPD, and cancer provides you with latest treatment protocols.
