Accident Investigation Manual Army Training and Leader Development Computer Image Generation

Accident Investigation Manual

Provides detailed descriptions of the algorithms and architectures used in major computer image generation devices. Examines anti-aliasing, data-base design, and the generation of special effects. Critically reviews several VLSIC architectures for image generation. Describes current and possible future applications of this technology, including visual flight simulation for pilot training.

Army Training and Leader Development

Computer Image Generation

This regulation prescribes policies, procedures, and responsibilities for developing, managing, and conducting Army training and leader development.
