Running on My Knees

Evolving Visions of the Priesthood traces the movement of the Church in the United States during the first forty years of the implementation of Vatican II. This research gives the U.S. Church a good picture of itself and its struggles during the post-conciliar period. These studies are important for what they tell us of priests who were already ministering the theology of the Council, at the time of the Council, and also consider those priests ordained more recently and their perspectives on Vatican II. How the different groups of priests perceive each other in their respective desires to be faithful to God offers the reader insight into today's presbyterate. By following what has been happening we get a glimpse of what the future holds. Given the struggles of the scandals recently confronting the Church, the studies also offer indications of why the particular problems arose so suddenly and why they were so related to a given time frame. Chapters are "The American Priesthood After the 1960s," "Characteristics of Priests in 2001," "The Shifting Emphasis in Ecclesiology," "The New Priests," "Issues and Needs Felt by Priests," "The Question of Homosexual Subcultures," "Understanding the Changes," and "Recommendations Made by the Priests." Includes an epilogue, "Effects of the 2002 Sexual Misconduct Crisis." Dean R. Hoge is a professor in the department of sociology at The Catholic University of America in Washington, D.C. He has done sociological research serving American churches for 32 years and has authored several books and articles on American religion including *The First Five Years of the Priesthood*, published by Liturgical Press. Jacqueline E. Wenger is a graduate student in sociology at The Catholic University of America and a licensed clinical social worker. "

How do we extend the 'conservation ethic' to include the cultural links between local populations and their physical environments? Can considerations of human capital be incorporated into the definition and measurement of sustainability in managed forests? Can forests be managed in a manner that fulfills traditional goals for ecological integrity while also addressing the well-being of its human residents? In this groundbreaking work, an international team of investigators apply a diverse range of social science methods to focus on the interests of the stakeholders living in the most intimate proximity to managed forests. Using examples from North America, Asia, Africa, and Latin America, they explore the overlapping systems that characterize the management of tropical forests. *People Managing Forests* builds on criteria and indicators first tested by the editors and their colleagues in the mid-1990s. The researchers address topics such as intergenerational access to resources, gender relations and forest utilization, and equity in both forest-rich and forest-poor contexts. A copublication of *Resources for the Future* (RFF) and the Center for International Forestry Research (CIFOR).

Running on my knees is about making decisions and choices and the affect those decisions and choices have on your life and the lives of other people. Decisions and choices are powerful and should not be made in haste or under duress. They should never be made without careful thinking or having a plan of action. Whatever the decision or choice you make, it's life-changing for better or for worse; maybe you will find out the moment the decision is made or perhaps you discover the effects later. Either way, decisions change lives and alter paths.

Experience an in-depth exploration of logical volume management and the use of file managers to manipulate files and directories and the critical concept that, in Linux, everything is a file and some fun and interesting uses of the fact that everything is a file. This book builds upon the skills you learned in Volume 1 of this course and it depends upon the virtual network and virtual machine created there. More experienced Linux users can begin with this volume and download the assigned script that will set up the VM for the start of Volume 2. Instructions with the script will provide specifications for configuration of the virtual network and the virtual machine. Refer to the volume overviews in the book's introduction to select the volume of this course most appropriate for your current skill level. You'll see how to manage and monitor running processes, discover the power of the special filesystems, monitor and tune the kernel while it is running - without a reboot. You'll then turn to regular expressions and the power that using them for pattern matching can bring to the command line, and learn to manage printers and printing from the command line and unlock the secrets of the hardware on which your Linux operating system is running. Experiment with command line programming and how to automate various administrative tasks, networking, and the many services that are required in a Linux system. Use the logs and journals to look for clues to problems and confirmation that things are working correctly, and learn to enhance the security of your Linux systems and how to perform easy local and remote backups. What You Will Learn Understand Logical Volume Management, using file managers, and special filesystems Exploit everything in a file Perform command line programming and basic automation Configure printers and manage other hardware Manage system services with systemd, user management, security, and local and remote backups using simple and freely available tools Who This Book Is For Anyone who wants to continue to learn Linux

In a completely new approach to borders and border crossing, this volume suggests a re-conceptualization of the nation in Southeast Asia. Choosing an actor approach, the individual chapters in this volume capture the narratives of minorities, migrants and refugees who inhabit and cross borders as part of their everyday life. They show that people are not only constrained by borders; the crossing of borders also opens up new options of agency. Making active use of these, border-crossing actors construct their own live projects on the border in multiple ways against the original intention of the nation-state. Based on their intimate knowledge of the interaction of communities, anthropologists from Europe, the USA, Japan and Southeast Asia provide a vivid picture of the effects of state policies at the borders on these communities.

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a

Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

International Relations Theory

In light of the tremendous changes that have come to the island of Borneo in recent decades, this volume takes a detailed historical look at the Borneo environment from native, colonial and national perspectives. It examines change and continuity in the economic, political and social dimensions of human-environment interactions. Reflecting the increasingly multidisciplinary nature of environmental history, the book brings together an international group of historians, anthropologists, geographers and social foresters, all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak, and the Indonesian province of Kalimantan and Brunei. Drawing on extensive archival research and fieldwork, these ten original contributions encompass eleven centuries of history on Borneo, examining interrelated topics that include long-distance trade, conservation, land tenure, resource access, property rights, perceptions of the environment, migration, and development policy and practice. The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on "Environmental change in native and colonial histories of Borneo: Lessons from the past, prospects for the future" held in Leiden under the auspices of the International Institute for Asian Studies.
