He Died for Peace

In the early 1970s, Nancy Rexroth began photographing the rural landscapes, children, white frame houses, and domestic interiors of southeastern Ohio with a plastic toy camera called the Diana. Working with the camera's properties of soft focus

and vignetting, and further manipulating the photographs by deliberately blurring or sometimes overlaying them, Rexroth created dreamlike, poetic images of "my own private landscape, a state of mind." She called this state IOWA because the photographs seemed to reference her childhood summer visits to relatives in Iowa. Rexroth self-published her evocative images in 1977 in the book IOWA, and the photographic community responded immediately and strongly to the work. Aperture published a portfolio of IOWA images in a special issue, The Snapshot, alongside the work of Robert Frank, Garry Winogrand, Lee Friedlander, and Emmet Gowin. The International Center for Photography, the Corcoran Gallery of Art, and the Smithsonian Institution included IOWA images in group exhibitions. Forty years after its original publication, IOWA has become a classic of fine art photography, a renowned demonstration of Rexroth's ability to fashion a world of surprising aesthetic possibilities using a simple, low-tech dollar camera. Long out of print and highly prized by photographers and photobook collectors, IOWA is now available in a hardcover edition that includes twenty-two previously unpublished images. Accompanying the photographs are a new foreword by Magnum photographer and book maker Alec Soth and an essay by internationally acclaimed curator Anne Wilkes Tucker, who affirms the continuing power and importance of IOWA within the photobook genre. New postscripts by Nancy Rexroth and Mark L. Power, who wrote the essay in the first edition, complete the volume.

Diamonds are a multi-billion dollar business involving some of the world's largest mining companies, a million and a half artisanal diggers, more than a million cutters and polishers and a huge retail jewellery sector. But behind the sparkle of the diamond lies a murkier story, in which rebel armies in Angola, Sierra Leone and the Congo turned to diamonds to finance their wars. Completely unregulated, so-called blood diamonds became the perfect tool for money laundering, tax evasion, drug-running and weapons-trafficking. Diamonds brings together for the first time all aspects of the diamond industry. In it, Ian Smillie, former UN Security Council investigator and leading figure in the blood diamonds campaign, offers a comprehensive analysis of the history and structure of today's diamond trade, the struggle for effective regulation and the challenges ahead. There is, he argues, greater diversification and competition than ever before, but thanks to the success of the Kimberley Process, this coveted and prestigious gem now represents a fragile but renewed opportunity for development in some of the world's poorest nations. This part of the diamond story has rarely been told.

Babel, Alan Burns's fourth critically acclaimed novel, contains all the hallmarks of the aleatoric style he helped to define--shot through with seemingly random newspaper headlines, poems, snatches of conversation and anecdote, which both heighten and undermine meaning, and characterized by extreme contrasts of mood and style and startling surrealist juxtapositions of images and ideas. By turns comic and tragic, tender and brutal, religious and blasphemous, the narrative rockets from London to the United States to Vietnam to interstellar space, familiar events are constantly fragmented and reset into new patterns, and ultimately Babel becomes a cautionary tale about the tragedy arising from attempting to build

Utopia.

They formed the D&E Cameron transport company, to battle the primitive Hume Highway. Frustrated by the inadequacies of the available European and British trucks, Ed found the solution by importing the first Kenworths to Australia. It was through his efforts that Kenworth set up at Bayswater in Victoria, to produce trucks custom- built for Australian long-haul transport conditions. D&E Cameron ceased operations in the 1970s, but the name continues as Ed's son runs the very successful Glen Cameron Group, as one of Australia's leading transport operations.
