This book explores the various personal and social narratives within the songs of Brassens and Brel, the auteurs-compositeurs-interpretes who epitomised what is now widely regarded as the golden era of chanson française during the 1950s and 60s. Tinker's discussion reveals the tensions in the narrators' relationship with themselves, other individuals, and society. The book builds upon, and moves beyond, the two dominant critical approaches used to write about French song: the exclusively biographical oriented approach and the purely linguistic analysis. Tinker focuses both on identity, viewed primarily as a relational process, and on representation: linguistic, musical, vocal, and gestural.

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.
