Professor Albert H Kritzer is Executive Secretary of the Pace Institute of International Commercial Law, author of the International Contract Manual, and Editor of the award winning database at www.cisg.law.pace.edu. He is the recipient of the 1998 Award for Distinction in International Affairs of the New York State Bar Association, has pioneered countless important projects in international commercial law, and inspired and nurtured generations of researchers. This book, which is published on the occasion of his eightieth birthday in the continental European tradition of a Festschrift, celebrates Albert and his profound influence on international commercial law and the world trade community. Albert's favourite concepts are friendship and sharing — and so it is fitting that scholars and friends from around the world honour this great man by sharing contributions written specifically for him. Albert has devoted his academic career to promote what this book sets out to do: Sharing International Commercial Law across National Boundaries. This Festschrift expresses the gratitude of many who have reaped the benefits of Albert's sharing, and who wish to share something in return.

This publication is a comprehensive commentary on the history, analysis & interpretation of the Bilateral Investment Treaties (BITs). These treaties are intended to protect U.S. investment in foreign countries. Although the initial target of the BITs was to develop countries in the third world, the opening of Eastern Europe has led to BIT negotiations in that region as well. United States Investment Treaties: Policy & Practice analyzes the policies underlying the BIT program; describes how the BIT program differs from prior U.S. practice with respect to foreign investment protection; explains the intent of specific provisions in the various model negotiations texts; assesses the extent to which the negotiations of the individual signed BITs resulted in a substantive modification of provisions of the model negotiating texts & thus a departure from the intent of the drafters. This book deals with a topic of increasing interest to businesses with operations in foreign countries & to attorneys advising these companies.

The CISG is now being applied extensively both by international arbitral tribunals and by domestic courts of its more than 70 contracting states. But do they also apply it in the same manner? Although Article 7 of the CISG underscores "the need to promote uniformity in its application", it gives little guidance as to how to achieve this goal. Each judge and arbitrator is influenced by the legal methodology of his home jurisdiction. Therefore it is somewhat of a paradox that whilst the number of contracting states is constantly increasing so too is the threat of variation in application. In this book the most important issues of the CISG's methodology are analysed by leading experts from five continents. Whereas some authors provide a thorough analysis of the central topics of interpretation, others enter almost uncharted territories.

International Sales Law Under CISG

More than 60 countries, accounting for more than two-thirds of all world trade, have ratified the Convention on Contracts

For The International Sale of Goods (CISG). Through a comparison and contrast with domestic law, The authors explain the CISG in terms familiar to European jurists. Because the CISG treaty demands an international interpretation, The authors draw heavily upon a broad base of CISG decisions, arbitral awards and doctrine from around the world. This completely revised and expanded Second Edition includes an account of the most significant CISG decisions reported during recent years. Concrete examples are provided throughout. The English language text will help European jurists to better communicate about CISG problems across language barriers.

Martindale-Hubbell Buyer's Guide

The UNIDROIT Principles of International Commercial Contracts, published in 1994 after years of intensive study by a special Working Group composed of representatives of all the major legal systems of the world, already encounter an extraordinary success in practice. In this volume twenty-one leading experts from all over the world examine the UNIDROIT Principles from the perspective of their respective countries, focusing, among others, on the similarities and differences between the UNIDROIT Principles and domestic law, and the use of the UNIDROIT Principles in actual practice (contract negotiation, arbitration proceedings, model for law reform projects, etc.). These national reports are critically analysed in the General Report by Professor M.J. Bonell, Chairman of the Working Group for the preparation of the UNIDROIT Principles.

Now ratified by 73 countries from every geographical region, representing every stage of economic development and every major legal and economic system, the United Nations Convention on Contracts of the International Sales of Goods (CISG) has changed the way international sales contracts are drafted and resulting disputes settled. In the decade since the Third Edition of Professor John Honnold's classic commentary, there has been vast growth in the number of decisions from tribunals around the world which have applied the CISG, an explosion of new scholarly analyses of the Convention, and remarkable developments in the research infrastructure that permits access to those materials. These developments have raised many new issues, and have deepened our understanding of (or, in some instances, effectively resolved) old ones. The remarkable progress of this epoch-making uniform international law calls for an updated edition of Professor Honnold's treatise. This Fourth Edition retains the original's incisive article-by-article commentary, as well as its insistence on how the parties' duties and the corresponding remedies need to work together ('like scissor-blades,' to quote Professor Honnold's vivid simile) and the many concrete examples that illustrate and test the Convention's response to problems that arise in

international trade. It deals definitively with the crucial aspects of sales contracts, including the following, taking fully into account the myriad variations among distinct legal systems: delivery of the goods and handing over of documents; conformity of the goods and third party claims; remedies for breach of contract by the seller; payment of the price; taking delivery; remedies for breach of contract by the buyer; anticipatory breach and instalment contracts; damages; interest; exemptions; effects of avoidance; and preservation of the goods conclusion (formation) of contracts. In explicit recognition of Professor Honnold's unique understanding of the Convention's development and the issues that occupied those who drafted and finalized the text, the substantial new textual material incorporated into this new edition is set in bold italics, allowing the reader to distinguish the work of the editor from text preserved from earlier editions, and thus identifying the material that carries Professor Honnold's special authority. Over three decades Professor Honnold's almost intuitive grasp of the instrument has guided governments, tribunals, scholars and practitioners towards an enlightened international understanding of the treaty. This new edition provides tribunals, practitioners, and scholars with even more invaluable insights into the meaning of each article of the Convention. The hundreds of decisions cited, many of them dating from the last few years, will continue to influence the promotion of international sales contract uniformity, encourage the settlement of disputes, and help to reinforce consensus in the application of the Convention.
