Construction professionals of all kinds frequently need legal advice that is straightforward as well as authoritative and legally rigorous. Building on the success of two previous editions, David Chappell returns to provide answers to 225 FAQs from his experience as Specialist Advisor to the RIBA. With 50 new questions, and thorough updates to address changes to the law and contracts, this is an invaluable first port of call for any construction law problem. Questions range in content from extensions of time, liquidated damages and loss and/or expense to issues of practical completion, defects, valuation, certificates and payment, architects' instructions, adjudication and fees. Among the new questions are: Is the contractor bound by its price even if there is an error? How do terms about working in a spirit of trust affect other clauses? Can architects lose their rights to certify under JCT 2011 contracts? Every question included has been asked of David Chappell during his career, and he uses his vast experience to provide clear, easy to follow advice in this book. Most were originally asked by architects, but the answers will be of wide interest to everyone involved in construction.

Principles and Practices of Construction Law presents the most common areas of law encountered in the construction industry in an easy-to-read format. Geared to those not yet studying law, the legal concepts are simplified and presented in a basic and simple format that is understandable, practical and devoid of excessive legal detail that can be overwhelming. The book is designed to build readers' ability to think critically, solve legal problems and write comprehensible solutions to claims and issues arising in the construction process. The volume provides an introduction to the legal system and the maxims of law, and addresses applying and using the law, logic, preparing legal arguments and briefing cases, law, ethics, and morality, relationships among the parties on the project, bidding, specification and plans, delays, and acceleration, differing, and unforeseen site conditions, warranties, termination of the contract and contract damages, torts, joint liability and indemnity and dispute resolution. For construction industry professionals interested in a basic understanding of important legal concepts.

Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey LLOYD QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia.

There is probably no area of activity more in need of reliable dispute resolution procedures than construction projects, especially if more than one jurisdiction is involved. The second edition of this eminently practical guide greatly facilitates the process for all parties concerned. The text, now updated to include the latest edition of arbitral rules, considers the full range of available dispute resolution methods, including mediation, conciliation, and (increasingly common in international construction disputes) determination by dispute review boards or expert panels, before focusing specifically on arbitration. The book then looks in detail at all aspects of arbitration, from commencement of proceedings, through preparation and collection of the evidence necessary in complex construction cases, to common procedural issues, the conduct of the hearing, the effect of the award, challenges to it and its enforcement. Specific valuable features include the following: guidance on drafting of dispute resolution provisions designed to minimise disputes and facilitate their swift resolution; flowcharts to illustrate the stages in dispute procedures and arbitration; a comparison between common law and civil law approaches to key concepts; details of the key features of a construction contract and common standard forms; expert guidance on effective

contract administration; step-by-step advice on the conduct of a construction arbitration; and coverage of particular issues thrown up by complex construction disputes which differentiate them from other commercial disputes, with guidelines on how to approach such issues in the presentation before a tribunal. As an easy-to-use resource for both general counsel and the lawyers in private practice, this book has no peers. It has proved to be of particular value to commercial contract negotiators and corporate counsel who may have many years of experience but have not had to live through a construction dispute or manage a construction contract during the life of a project. Lawyers in private practice embarking on a construction dispute for the first time will also find this book of value, as will students of dispute resolution.

Chapters cover the rights and liabilities of parties to construction projects, the bid process involving public entities, trial preparation, and alternative dispute resolution and partnering. The manual addresses bankruptcy, bond, insurance, and damages issues, and includes a chapter on jury instructions for construction trials. Highlights of the new edition include:

- Throughout the book the authors addressed the impact of *Tiara Condominium Association, Inc. v. Marsh & McLennan Companies, Inc.* where the Florida Supreme Court held the Economic Loss Rule applies only in the products liability context
- The impact of the Florida Statute Evidence Code amendment based on *Daubert* regarding admissibility of expert testimony is raised
- Statutory amendments impacting the Notice of Commencement, changes in the requirements for written demands for contract copies, and added flexibility for notices, claims of lien and other served documents
- The pre-suit notice requirements changed by statute are discussed
- Changes to public construction bonds, private payment bonds and public bids are detailed
- Case law, statute, and rule references are reviewed and updated
