The XJ-S was Jaguar's most controversial car. Despite offering a superb blend of performance and refinement it was a radical departure in style from the elegant E-type. It appeared at a time when fuel-thirsty luxury cars were unfashionable. However, Jaguar stuck with the car and the result is a twenty-one year production history and a firm place in the classic jaguar list.

Fast Ladies

After 20 years of glorious 'failure', the best-loved team in Formula One is consigned to the history books, and it deserves one of its own. Minardi had a

successful time in Formula Two until the tiny Italian outfit was ready to hit the big time in 1985. It somehow survived in F1's shark-infested waters as bigger teams (Lotus, Arrows, Tyrrell) were dragged under. They have a truly international fan-base and are the 'second team' of most F1 devotees. Minardi is held in such affection as everyone loves the plucky underdog – Minardi's annual budget would have lasted one month at the other Italian team up the road. Yet, from its plant in Faenza near Bologna, Minardi has produced cars that qualify, sometimes score points and often lead the way in their technology. Gian Carlo Minardi also developed a reputation as a fabulous talent-spotter – Fisichella, Trulli, Webber and the youngest ever World Champion Alonso all started their F1 careers with Minardi. For the last five years, Minardi was owned by controversial Australian tycoon Paul Stoddart. Cast as David against the Goliath of F1's governing body, Stoddart constantly hit the headlines as he tried to get a more equal share of the sport's billions. Ultimately, he failed and Red Bull has now bought the team. Despite a petition of 15,000 names, the Minardi name has vanished from the F1 grid and true motorheads miss it. This is the one and only inside account, with exclusive, comprehensive interviews with bosses, drivers and engineers. 140 unique photos complete this revalationary tale.

In 1982, a car overturns on a remote West Australian road. Nobody is hurt, but the impact is felt for decades. Nicole and Samantha Cooper both remember the summer day when their mother, Tina, lost control of their car – but not in quite the same way. It is only after Tina’s death, almost four decades later, that the sisters are forced to reckon with the repercussions of the crash. Nicole, after years of aimless drifting, has finally found love, and yet can’t quite commit. And Samantha is hiding something that might just tear apart the life she’s worked so hard to build for herself. *The Spill* explores the cycles of love, loss and regret that can follow a family through the years – moments of joy, things left unsaid, and things misremembered. Above all, it is a deeply moving portrait of two sisters falling apart and finding a way to fit back together.

The Complete Book of Jaguar

Tony Willard has been--amongst many other things in motor publishing motoring correspondent of the Birmingham Evening Mail and Editor of Automotive Management (now called AM)--the best read trade paper for the motor retail trade. There are now stacks of ways to buy cars in the UK. So many that it is really hard for consumers to know where to get best choice, best value, best service, best after-care, best credit or

whatever it is that they prioritise. In addition to franchised dealers there are: manufacturers selling direct to the public; rental car companies doing the same; car-buying agents; car supermarkets; used car dealers; internet traders; importers; auctions; and personal shoppers. Most car buying guides concentrate on WHAT to buy whether it be new or used. This book covers that, but assumes the buyer knows roughly what he wants. What has been missing until now is a guide through the jungle of places and prices which tells you WHERE to buy and HOW to pay not a penny more than necessary.

Forthcoming Books

In 1935, when a small company in Coventry, England, launched a sporting saloon (i.e., sedan) called the Jaguar SS, it set in motion an inexorable process that would lead to Britain's most beloved line of high-performance automobiles. The Complete Book of Jaguar covers the SS and all of the Jaguar's subsequent production models, from the original SS Jaguar to today's F-Type sports cars, F-Pace SUV, X-Type sedans, as well as concept cars. As with other books in the Complete Book Series, author Nigel Thorley organizes the content chronologically with entries for each year. Narratives for each discuss the cars and technology, while spec tables highlight key technical and performance specifications. Originally begun by a couple of motorcycle enthusiasts—William Lyons and William Walmsley—as a firm called the Swallow Sidecar Company, Jaguar would become one of the world's most celebrated automakers. In

England's bleak postwar years, Jaguar became a shining star—first with its XK120, followed by the XK140 and XK150. Sporting sedans like the Mark 2 and Mark X set the bar for luxury four-door transport in the '50s and '60s. Then Jaguar stunned the world with the achingly beautiful E-Type in 1961, a genuine 150 mph super sports car. Along the way, the company competed on road courses around the world, going head to head with greats like Ferrari and Aston Martin. Though Jaguar lost its way periodically in the modern era, it has bounded back stronger than ever in the twenty-first century with a strong lineup, including the new F-Type sports car and F-Pace SUV. The Complete Book of Jaguar is the essential guide to this important chapter in the history of sports and luxury automobiles.

The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy

industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.
