### **Misinformation Wants to Be Free**

More than fifty years ago, John Coltrane drew the twelve musical notes in a circle and connected them by straight lines, forming a five-pointed star. Inspired by Einstein, Coltrane put physics and geometry at the core of his music. Physicist and jazz musician Stephon Alexander follows suit, using jazz to answer physics' most vexing questions about the past and future of the universe. Following the great minds that first drew the links between music and physics-a list including Pythagoras, Kepler, Newton, Einstein, and Rakim-The Jazz of Physics reveals that the ancient poetic idea of the Music of the Spheres," taken seriously, clarifies confounding issues in physics. The Jazz of Physics will fascinate and inspire anyone interested in the mysteries of our universe, music, and life itself.

## **Women's Literary Collaboration, Queerness, and Late-Victorian Culture**

This practical book presents concrete examples of what is being done in countries, communities, and enterprises around the world to help adults better reconcile work and family responsibilities. The book argues that conflicts between work and family responsibilities are increasing because of changes in family structures and the work environment. Looking at evidence from a variety of countries, the volume first considers the reasons why intervention to reduce work-family conflict is in the interests of governments and the social partners. It then considers the wide range of policies at national and community levels that can help reduce work-family conflict, highlighting the role of government in setting the legislative and policy framework and stimulating dialogue. A separate chapter is devoted to policies and practices for a family-friendly workplace. *Reconciling Work and Family Responsibilities* provides extensive information on different kinds of care arrangements for those responsible for children, the elderly, the sick, and the handicapped. It also considers how working conditions can make work more compatible with family, in particular various types of leave entitlements (such as maternity, paternity, and parental leave) as well as flexible work schedules, part-time work, and teleworking.

In *Noise* from the Writing Center, Boquet develops a theory of "noise" and excess as an important element of difference between the pedagogy of writing centers and the academy in general. Addressing administrative issues, Boquet strains against the bean-counting anxiety that seems to drive so much of writing center administration. Pedagogically, she urges a more courageous practice, developed via metaphors of music and improvisation, and argues for "noise," excess, and performance as uniquely appropriate to the education of writers and tutors in the center. Personal, even irreverent in style, Boquet is also theoretically sophisticated, and she draws from an eclectic range of work in academic and popular culture—from Foucault to Attali to Jimi Hendrix. She includes, as well, the voices of writing center tutors with whom she conducted research, and she finds some of her most inspiring moments in the words and work of those tutors.
