This is the Report of the Committee on the Judiciary regarding the Impeachment of Donald J. Trump, President of the United States. This report accompanies House Resolution 755 and was released on December 16th, 2019. The House Committee on the Judiciary has completed the consideration of two articles of impeachment against President Donald J. Trump. The first article charges that the President used the powers of his office to solicit and pressure a foreign government, Ukraine, to investigate his domestic political rival and interfere in the upcoming United States Presidential elections. The second article charges that the President categorically obstructed the Congressional impeachment inquiry into his conduct. Taken together, the articles charge that President Trump has placed his personal, political interests above our national security, our free and fair elections, and our system of checks and balances. He has engaged in a pattern of misconduct that will continue if left unchecked. Accordingly, President Trump should be impeached and removed from office.

"Hippolyte Adolphe Taine (21 April 1828 ? 5 March 1893) was a French critic and historian. He was the chief theoretical influence of French naturalism, a major proponent of sociological positivism and one of the first practitioners of historicist criticism. Literary historicism as a critical movement has been said to originate with him."--Wikipedia.

Celebrating the centenary of the Los Angeles Times, the second-largest U.S. newspaper, Berges presents a candid story of its growth and development, along with portraits of its owners, publishers, editors and other personnel. Beginning with the pioneering days of founder Harrison Gray Otis who began the Times in a tiny printing shop, he describes how under the Chandlers it evolved from a provincial newspaper into an award-winning publication. Member of the current staff of the Times, the author describes the diverse workings of a modern newspaper and how stories and journalists are made, and conveys how staff members like Robert Scheer, book review editor Art Seidenbaum, cartoonist Paul Conrad, and columnist Jack Smith work. ISBN 0-689-11427-3 : \$17.95.

Tahiti Nui is an account of the survival of a Polynesian society in the face of successive settlements of missionaries, traders, and administrators. Beginning with the first explorers and Captain Cook's scientific observations at Point Venus, Dr. Newbury has separated the various strands interwoven in the fabric of Tahitian society, tracing their development and showing how they interacted at successive stages. Missionaries and foreign traders, administrators and Polynesians, planters and immigrant Chinese have all contributed to the distinctive flavor of French Polynesia, with Tahiti and Tahitians becoming increasingly dominant, not just as the focus of the French administration in Pape'ete, but in the social networks and trading patterns that have evolved.

During the past five years, the threat of bioterrorism has become a subject of widespread concern. Journalists, academics, and policy analysts have considered the subject, and in most cases found much to alarm them. Most significantly, it has captured the attention of policy makers at all levels of government in the United States. Unfortunately, bioterrorism remains a poorly understood subject. Many policymakers and policy analysts present apocalyptic visions of the threat, contending that it is only a matter of time before some terrorist uses biological agents to cause mass casualties. In contrast, other analysts argue that the empirical record provides no basis for concern, and thus largely dismiss the potential threat. Neither approach is helpful. Imagining catastrophic threats inevitably leads to a requirement for impossibly large response capabilities. In contrast, denying the potential danger altogether leads to the kind of tunnel vision that led U.S. intelligence officials to totally ignore the emergence of Aum Shinrikyo in Japan, despite its overtly hostile attitude towards the United States. This study takes an intermediate course. It provides empirical evidence to support the views

of those who argue that biological agents are difficult to use. It also provides abundant evidence that some people have desired to inflict mass casualties on innocent populations through employment of biological agents. Fortunately, these accounts also suggest that such people lacked the capability to follow through with their plans. The research also casts considerable doubt on our ability to predict which biological agents a perpetrator might employ. While some analysts assume that terrorists will use those agents that proved of most interest to state weapons programs, bioterrorists and biocriminals have acquired and used agents of little or no value as weapons of war.

John Bull

This book explains why AI is unique, what legal and ethical problems it could cause, and how we can address them. It argues that AI is unlike any other previous technology, owing to its ability to take decisions independently and unpredictably. This gives rise to three issues: responsibility--who is liable if AI causes harm; rights--the disputed moral and pragmatic grounds for granting AI legal personality; and the ethics surrounding the decision-making of AI. The book suggests that in order to address these questions we need to develop new institutions and regulations on a cross-industry and international level. Incorporating clear explanations of complex topics, Robot Rules will appeal to a multi-disciplinary audience, from those with an interest in law, politics and philosophy, to computer

The impact of colonial dispossession and the subsequent social and political ramifications place a unique burden on governments having to establish equitable means of addressing previous injustices. A Common Hunger considers the efforts by both of these countries to reconcile the damage left by colonial oppression, in part, looking back with a critical eye, but also pointing the way toward a solution that will satisfy the common need for human dignity.

Most Muslim-majority countries have legal systems that enshrine both Islam and liberal rights. While not necessarily at odds, these dual commitments nonetheless provide legal and symbolic resources for activists to advance contending visions for their states and societies. Using the case study of Malaysia, *Constituting Religion* examines how these legal arrangements enable litigation and feed the construction of a 'rights-versus-rites binary' in law, politics, and the popular imagination. By drawing on extensive primary source material and tracing controversial cases from the court of law to the court of public opinion, this study theorizes the 'judicialization of religion' and the radiating effects of courts on popular legal and religious consciousness. The book documents how legal institutions catalyze ideological struggles, which stand to redefine the nation and its politics. Probing the links between legal pluralism, social movements, secularism, and political Islamism, *Constituting Religion* sheds new light on the confluence of law, religion, politics, and society. This title is also available as Open Access.

of the World Trade Organization (WTO), thereby threatening to destroy the WTO's dispute settlement system, one of the most active dispute settlement systems in international law and a central pillar of the multilateral trading system. The United States justifies its blockage with allegations of judicial overreach, claiming that the Appellate Body in its jurisprudence has not complied with the WTO treaties. This book analyzes in detail the main allegations of the United States, which concern issues of procedure and interpretive approach, and places them in the context of broader US trade policy.
