### **Mycotoxins in Aquaculture**

Presents the life of the soldier who committed a massive national security breach by releasing thousands of classified documents to WikiLeaks, exploring the influence of his political views and gender identity issues on his actions.

### **Pioneering Solutions in Supply Chain Performance Management**

Until the 1990s, it was generally accepted that medicines were first developed for adults and their use in children was investigated later, if at all. One of the main tasks of hospital pharmacies was the manufacturing of child-appropriate formulations in a more or less makeshift way. The first change came in 1997 with U.S. legislation that rewarded manufacturers to do voluntary pediatric research. Ten years later, the European Union passed legislation that required manufacturers to discuss all pediatric aspects, including formulations, with the regulatory authorities as a condition of starting the registration procedure. In consequence, manufacturers must now cover all age groups, including the youngest ones. So far, pediatric formulations were more a focus for academic researchers. Through the changed regulatory environment, there is now a sudden high commercial demand for age-appropriate formulations. This book begins by highlighting the anatomical, physiological and developmental differences between adults and children of different ages. It goes on to review the existing technologies and attempts to draw a roadmap to better, innovative formulations, in particular for oral administration. The regulatory, clinical, ethical and pharmaceutical framework is also addressed.

This book constitutes the refereed proceedings of the 8th International Conference on Web Reasoning and Rule Systems, RR 2014, held in Athens, Greece in

September 2014. The 9 full papers, 9 technical communications and 5 poster presentations presented together with 3 invited talks, 3 doctoral consortial papers were carefully reviewed and selected from 33 submissions. The conference covers a wide range of the following: semantic Web, rule and ontology languages, and related logics, reasoning, querying, searching and optimization, incompleteness, inconsistency and uncertainty, non-monotonic, common sense, and closed-world reasoning for the web, dynamic information, stream reasoning and complex event processing, decision making, planning, and intelligent agents, machine learning, knowledge extraction and information retrieval, data management, data integration and reasoning on the web of data, ontology-based data access, system descriptions, applications and experiences.

A concise reference that provides an overview of the design of high speed off-road vehicles High Speed Off-Road Vehicles is an excellent, in-depth review of vehicle performance in off-road conditions with a focus on key elements of the running gear systems of vehicles. In particular, elements such as suspension systems, wheels, tyres, and tracks are addressed in-depth. It is a well-written text that provides a pragmatic discussion of off-road vehicles from both a historical and analytical perspective. Some of the unique topics addressed in this book include link and flexible tracks, ride performance of tracked vehicles, and active and semi-active suspension systems for both armoured and unarmoured vehicles. The book provides spreadsheet-based analytic approaches to model these topic areas giving insight into steering, handling, and overall performance of both tracked and wheeled systems. The author further extends these analyses to soft soil scenarios and thoroughly addresses rollover situations. The text also provides some insight into more advanced articulated systems. High Speed Off-Road Vehicles: Suspensions, Tracks, Wheels and Dynamics provides valuable coverage of: Tracked and wheeled vehicles Suspension component design and characteristics, vehicle ride performance, link track component design and characteristics, flexible track, and testing of active suspension test vehicles General vehicle configurations for combat and logistic vehicles, suspension performance modelling and measurement, steering performance, and the effects of limited slip differentials on the soft soil traction and steering behavior of vehicles Written from a very practical perspective, and based on the author's extensive experience, High Speed Off-Road Vehicles provides an excellent introduction to off-road vehicles and will be a helpful reference text for those practicing design and analysis of such systems.

### **Death in Kenya**

As competition between value chains on globalized markets is constantly getting fiercer, there is a growing trend to achieve closer collaboration and integration within these value chains and increasingly more complex supply networks. Additionally, in the wake of the thrilling possibilities of using information technology and its potential in boosting the performance of supply chains,

researchers are increasingly looking for technology-enabled solutions for a better supply chain performance management. This volume, edited by Thorsten Blecker, Wolfgang Kersten and Christian Ringle, provides valuable insights into: - Maritime Logistics - Challenges and Opportunities - Leveraging Logistics Processes for Supply Chain Performance Management - Innovative Technology Solutions in Supply Chains - Knowledge Management in Logistics. This volume appeals to researchers and practitioners alike, who are interested in current contributions by international authors, providing theoretical, empirical and case-study oriented background and information on their research work.

Written by celebrated author M. M. Kaye, *Death in Kenya* is a wonderfully evocative mystery. When Victoria Caryll is offered a position at Flamingo, her aunt's family estate in Kenya's Rift Valley, she accepts-knowing full well that the move will give her a chance to see Eden DeBrett once again, the man she was previously engaged to. But she doesn't realize that coming to her aunt's home will introduce her to an unstable region still recovering from the bloody Mau Mau revolt, and to a household thrown into grief by a recent murder. Distinguished by its mystery, romance, and exotic setting, *Death in Kenya* is as graceful as it is chilling-it is the beloved novel of one of our finest and most accomplished writers.

Sally Hogshead believes the greatest value you can add is to become more of yourself. Hogshead rose to the top of the advertising profession in her early 20s, writing ads that fascinated millions of consumers. Over the course of her ad career, Sally won hundreds of awards for creativity, copywriting, and branding, and was one of the most awarded advertising copywriters right from start of career, including almost every major international advertising award. She frequently appears in national media including NBC's Today Show and the New York Times. Hogshead was recently inducted into the Speaker Hall of Fame, the industry's highest award for professional excellence. Her advertising work hangs in the

Smithsonian Museum of American History. The science of fascination is based on Hogshead's decade of research with 250,000 participants, including dozens of Fortune 500 teams, hundreds of small businesses, and over a thousand C-level executives.

## **Maintenance Engineering Handbook**

Provides a unique overview of energy management for the process industries  
Provides an overall approach to energy management and places the technical issues that drive energy efficiency in context  
Combines the perspectives of freewheeling consultants and corporate insiders  
In two sections, the book provides the organizational framework (Section 1) within which the technical aspects of energy management, described in Section 2, can be most effectively executed  
Includes success stories from three very different companies that have achieved excellence in their energy management efforts  
Covers energy management, including the role of the energy manager, designing and implementing energy management programs, energy benchmarking, reporting, and energy management systems  
Technical topics cover efficiency improvement opportunities in a wide range of utility systems and process equipment types, as well as techniques to improve process design and operation

Advanced Apex Programming focuses entirely on the Apex language and core design patterns. You'll learn how to truly think in Apex - to embrace limits and bulk patterns. You'll see how to develop architectures for efficient and reliable trigger handling, and for asynchronous operations. You'll discover that best practices differ radically depending on whether you are building software for a specific organization or for a managed package. And you'll find approaches for incorporating testing and diagnostic code that can dramatically improve the reliability and deployment of Apex software, and reduce your lifecycle and support costs. Based on his experience as a consultant, Salesforce MVP, and architect of major AppExchange packages, Dan Appleman focuses on the real-world problems and issues that are faced by Apex developers every day, along with the obscure problems and surprises that can sneak up on you if you are unprepared.

Many readers already regard the Maintenance Planning and Scheduling Handbook as the chief authority for establishing effective maintenance planning and scheduling in the real world. The second edition adds new sections and further develops many existing discussions to make the handbook more comprehensive and helpful. In addition to practical observations and tips on such topics as creating a weekly schedule, staging parts and tools, and daily scheduling, this second edition features a greatly expanded CMMS appendix which includes discussion of critical cautions for implementation, patches, major upgrades,

testing, training, and interfaces with other company software. Readers will also find a timely appendix devoted to judging the potential benefits and risks of outsourcing plant work. A new appendix provides guidance on the "people side" of maintenance planning and work execution. The second edition also has added a detailed aids and barriers analysis that improves the appendix on setting up a planning group. The new edition also features "cause maps" illustrating problems with a priority systems and schedule compliance. These improvements and more continue to make the Maintenance Planning and Scheduling Handbook a maintenance classic.

Incorporated amidst the turmoil of the American Revolution, Foxborough has a long tradition of patriotic commitment to the nation and has continued from generation to generation to serve admirably when the country has called. However, it is not only the wartime record that measures a community, but it is a town's innovations and responses to times of prosperity and catastrophe that truly shape its character and reputation. Foxborough's varied history, from Minute Men to the famed female straw hat braiders, certainly distinguishes it as an uncommon town in the American experience. Foxborough: Gem of Norfolk County chronicles the remarkable story of a small village's growth and development from its first settlement in the 1600s to the present, highlighting significant events and personalities that formed the town's identity. Through this unique comprehensive narrative, readers will be transported across four centuries of a changing landscape and will explore their hometown's schools, residences, businesses, and factories of yesteryear.

## **Metallography in Failure Analysis**

THE STORY: Furthering the theme of political consciousness expressed so forcefully and eloquently in his earlier play *One for the Road*, the author's present play takes place in an anonymous country where individual liberties have been forfeited to the state. Set in a prison where the inmates are forbidden to speak their own language, the play is comprised of four terse, arresting scenes which make masterful use of nuance and subtle understatement (with sudden bursts of violence) to create an overwhelming sense of terror and shocking futility. In one scene uniformed officers taunt and belittle the women who have come to visit their men, who are political prisoners; in another a mother and son are allowed to speak only in the language of the capital, which they do not know; in the third scene a young woman accidentally sees a guard holding a limp, tortured man whom she knows to be her husband; and, in the final scene the old woman reunited with her bloody, trembling son and, though told she may now speak, she has been silenced so long that she cannot, or will not, do so. Quintessentially Pinteresque in its skillful use of pregnant pauses, resonant images and nightmarish utterances, the play is both enthralling theatre and a stirring reminder of what can happen when the power of the state becomes all-encompassing and the rights of the individual are forfeited, whether through neglect or weakness of will.

## **The Troubled Adolescent**

This book is written for students and clinicians who want to learn about adolescent behavioral health and psychosocial development. It focuses on the experiences of culturally diverse adolescents and families including, but not limited to, diversity based on race, ethnicity, gender identity, sexual orientation, spirituality, ability/disability status, age, nationality, language, and socioeconomic status. Written from a bioecological and strength-based perspective, it views adolescents as having the power to initiate growth and recover from setbacks.

Originally published in 1994, this second edition of Corrosion in the Petrochemical Industry collects peer-reviewed articles written by experts in the field of corrosion that were specifically chosen for this book because of their relevance to the petrochemical industry. This edition expands coverage of the different forms of corrosion, including the effects of metallurgical variables on the corrosion of several alloys. It discusses protection methods, including discussion of corrosion inhibitors and corrosion resistance of aluminum, magnesium, stainless steels, and nickels. It also includes a section devoted specifically to petroleum and petrochemical industry related issues.

Many plants have large variations in operating conditions. To ensure smooth running it is essential to find a simple fixed gain controller that guarantees rapidly decaying and well-damped transients for all admissible operating conditions.

Robust Control presents design tools, developed by the authors, for the solution of this design problem. Examples of simple and complex cases such as a crane, a flight control problem and the automatic and active four-wheel steering of a car illustrate the use of these tools. This book is intended for anyone who has taken an undergraduate course in feedback control systems and who seeks an advanced treatment of robust control with applications. Drawing on the resources and authoritative research of a leading aerospace institute, it will mainly be of interest to mechanical and electrical engineers in universities, institutes and industrial research centres.

## **Web Reasoning and Rule Systems**

Detailed analyses of failures of material components have proved to be valuable in many ways; by preventing further failures, by assessing the validity of designs and the selection of materials, by uncovering shortcomings in the processing of the materials involved through characterizations of defects, and by revealing problems introduced during the manufacture or fabrication of the component. Increased recognition of the value of performing failure analyses has caused the field to develop into a very active area of technical endeavor. Failure analysis has been employed in numerous different technical disciplines and has proven beneficial. The increased activity has caused many new and improved methods for performing these analyses to be developed. Among these are many methods which can be characterized as generally belonging to the field of metallography. In recognition of the important role that metallography plays in the performance of failure analyses, the absence of a text that specifically discusses this subject, and the belief that communication of information on the subject would be of technical interest, The American Society for Metals and The International Metallographic Society co sponsored a symposium. The intent was to bring together world-recognized authorities working in various aspects of the failure analysis and metallographic fields to share methods they use, results they have obtained, and the purposes to which they utilized these results. The symposium, entitled "Metallography in Failure Analysis", was held in Houston, Texas, USA, July 17-18, 1977.

This book reports the state of the art of energy-efficient electrical motor driven system technologies, which can be used now and in the near future to achieve significant and cost-effective energy savings. It includes the recent developments in advanced electrical motor end-use devices (pumps, fans and compressors) by some of the largest manufacturers. Policies and programs to promote the large scale penetration of energy-efficient technologies and the market transformation

are featured in the book, describing the experiences carried out in different parts of the world. This extensive coverage includes contributions from relevant institutions in the Europe, North America, Latin America, Africa, Asia, Australia and New Zealand.

Book 75 offers a bulleted step by step walk through of one of the most famous yet most often over looked occult book: Initiation into Hermetics by Franz Bardon. The original manuscript was full of great information for the development of the mind and Will but on many occasions run together and often hard to follow. The author of Book 75 has re-engineered the text making the steps more defined and reworked it towards a more Left Hand Path sentiment. As Initiation into Hermetics was dedicated to the traditional first Tarot card the author has dedicated this text to the First Luciferian Tarot card created by writer Michael Ford and artist Nico Claux. Introduction by Michael Ford and edited by Lillyn Armany.

With the current trend for the replacement of the fishmeal content of aquaculture feeds, the issue of antinutrients contained in plant-based materials is of growing concern in aquaculture production. Mycotoxins are known antinutrients; however, their role in aquaculture feeds has still to be fully elucidated. Mycotoxins in Aquaculture is a comprehensive guide, commencing with a chapter covering general concepts, to help the reader to become familiar with the topic. The book then covers the potential implications of the presence of mycotoxins, with chapters on aquatic species defense mechanisms, mycotoxins in aquaculture and in feeds, the analysis of mycotoxin content in commodities and feeds, and fighting mycotoxins. This important book brings together the authors' experience from work with terrestrial animals to identify the targets of these antinutrients in aquatic species. It offers a new tool to whoever is approaching aquaculture in this era of finite resources.

This remarkable book provides a portrait of the lesser-known peoples of Sarawak, New Zealand: the Land Dayaks. Written by an anthropologist who came to know these people during a two-year stay in their remote village, the study--introduced by a folktale imparted to the author by the leading spirit-medium in the village--is a

masterly analysis based on sound anthropological techniques and informed with understanding, affections, and humor. Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from, but also their similarities to the greater world of humanity outside their community. Originally published in 1957, this study has lost none of its freshness or fascination.
