Feminism and the Politics of Travel After the Enlightenment

Gathers tales about an unusual spotted creature, a group of frightened farm animals, a baby bird, dogs, two birds looking for a place to nest, and a young rabbit, that originally appeared in books published by Beginner Books.

Goodbye Yeats and O'Neill

A young girl's astonishing, poignant first look into the turbulent heart of things "I had in my care that summer four dogs, three cats, the Moran kids, Daisy, my eight-year-old cousin, and Flora, the toddler child of a local artist. There was also, for a while, a litter of wild rabbits, three of them, that had been left under our back steps. " Alice McDermott's haunting and enchanting new work of fiction--her first since the bestselling *Charming Billy*, winner of the 1998 National Book Award--is narrated by a woman who was born beautiful. Her parents decided that her best chance in life was to marry a wealthy man, so she was raised on the east end of Long Island, among the country houses of the rich. On the cusp of fifteen, she is the town's most sought-after babysitter--cheerful, beloved, a wonder with children and animals, but also a solitary soul with an already complex understanding of human nature--when her favorite cousin, Daisy, comes to spend the summer. The narrator's witty, piquant, deeply etched evocation of all that was really transpiring under the surface during that seemingly idyllic season gives her wry tale--infused with suppressed passion, disappointment, and enduring hope--its remarkable vividness and impact. Once again, Alice McDermott explores the mysterious depths of what seems like everyday life with unforgettable insight and resonant emotional power.

Goodbye Yeats and O'Neill is a reading of one or two books recently written by the following major authors: Roddy Doyle, Colm Tóibín, John McGahern, William Trevor, Seamus Deane, Nuala O'Faolain, Patrick McCabe, Colum McCann, Nick Laird, Gerry Adams, Claire Boylan, Frank McCourt, Tim O'Brien, Michael Patrick MacDonald, Alice McDermott, Edward J. Delaney, Beth Lordan, William Kennedy, Thomas Kelly, and Mary Gordon. The study argues that farce has been a major mode of recent Irish and Irish-American fiction and memoir—a primary indicator of the state of both Irish and Irish-American cultures in the early twenty-first century. Edward A. Hagan is Professor of Writing at Western Connecticut State University. He is the author of *High Nonsensical Words: A Study of the Works of Standish James O'Grady* (Whitston, 1986). In addition to numerous journal articles, he has edited and introduced three volumes in the University College Dublin Classics of Irish History Series—*To the Leaders of Our Working People* by Standish James O'Grady (2002), *Sun and Wind* by Standish James O'Grady (2004), and *The Green Republic* by W.R. MacDermott (2004).

Put yourself in the place of Kim Rendall, a handsome, idealistic young man living on a distant planet ruled by a super-efficient government. Here is industrialization carried to its illogical conclusion. Kim Rendall lives in the shadow of mechanized terror, for machines have taken over, and the disciplinary circuit keeps the inhabitants in check . . .

Child of My Heart

In the terrible aftermath of the moorland battle of Culloden, the Highlanders suffered at the hands of their own clan chiefs. Following his magnificent reconstruction of Culloden, John Prebble recounts how the Highlanders were deserted and then betrayed into famine and poverty. While their chiefs grew rich

on meat and wool, the people died of cholera and starvation or, evicted from the glens to make way for sheep, were forced to emigrate to foreign lands. 'Mr Prebble tells a terrible story excellently. There is little need to search further to explain so much of the sadness and emptiness of the northern Highlands today' The Times.

A Walker's Guide to Old Western Landmarks in Shanghai

From the top-selling author on the subject, Philip Haythornthwaite, comes the ultimate authoritative work on the weapons and equipment of the Napoleonic wars. Infantry and cavalry weapons and tactics, artillery and engineers, staff and supplies, uniforms and equipment, and living conditions are brought to life with startlingly vivid period reproductions. Detailed battle plans explain infantry

formations, troop deployments, and skirmishes. Among the breathtaking images included: British squares resisting the French cavalry at Waterloo and the raising of the siege of Thionville, with the French infantry routing the Hungarians. British drill exercises and troop formations are outlined in full. Unsurpassed as the basic illustrated guider, this is ideal for historians, modelers, wargamers, and reenactors.

There are over 2000 registered historic buildings in Shanghai, with hundreds more waiting to be added. Most are pre-War structures and are either Western buildings, or Chinese-style buildings with a distinct Western influence. These include villas, offices, apartment buildings and shikumen (a house of both wood and brick). Structures were selected for this book because of the interesting stories behind them or because they were related to a topical news event.

I Call on the LORD in My Distress, and He Answers Me. Psalm 120:1

The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians. Topics include the relative roles played by money and credit in financing the economy, whether credit could compensate for shortages of coin, and whether it could counteract the devastating mortality of the Black Death. Drawing on a detailed analysis of the Statute Merchant and Staple records, the articles chart the chronological and geographical changes in the economy from the late-thirteenth to the early-sixteenth centuries. This period started with the triumph of English merchants over alien exporters in the early 1300s, and concluded in the early 1500s with cloth exports overtaking wool in value. The articles assess how these changes came about, as well as the degree to which both political and economic forces altered the pattern of regional wealth and enterprise in ways which saw the northern towns decline, and London rise to be the undisputed financial as well as the political capital of England.

The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork

house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, *Steak* is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

The Northmen's Fury

Arthur Mailey's classic autobiography, first published in 1958, is a wry and engaging account by a talented cricketer from a very different era - full of zest, varied, quick, shifting the point of attack, sometimes extravagant, frequently brilliant and always thoughtful. For fifty years, Arthur Mailey played and watched first-class cricket. During his Test career he played against many of the greats, and on one notable occasion dismissed his idol, Victor Trumper, to his immediate regret: 'I felt like a boy who had killed a dove.' *10 for 66 and All That* is a reminder of the glory days of cricket - amateurs and professionals, Bradman, Noble and Trumper batting, and Barnes, O'Reilly and Fleetwood-Smith with the ball.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

The Northmen's Fury tells the Viking story, from the first pinprick raids of the eighth century to the great armies that left their Scandinavian homelands to conquer larger parts of France, Britain and Ireland. It recounts the epic voyages that took them across the Atlantic to the icy fjords of Greenland and to North America over four centuries before Columbus and east to the great rivers of Russia and the riches of the Byzantine empire. One summer's day in 793, death arrived from the sea. The raiders who sacked the island monastery of Lindisfarne were the first Vikings, sea-borne attackers who brought two centuries of terror to northern Europe. Before long the sight of their dragon-prowed longships and the very name of Viking gave rise to fear and dread, so much so that monks were reputed to pray each night for delivery from the Northmen's Fury. Yet for all their reputation as bloodthirsty warriors, the Vikings possessed a sophisticated culture that produced art of great beauty, literature of abiding power and kingdoms of surprising endurance. The Northmen's Fury describes how and why a region at the edge of Europe came to dominate and to terrorise much of the rest of the continent for nearly three centuries and how, in the end, the coming of Christianity and the growing power of kings tempered the Viking ferocity and stemmed the tide of raids. It relates the astonishing achievement of the Vikings in forging far-flung empires whose sinews were the sea and whose arteries were not roads but maritime trading routes. The blood of the Vikings runs in millions of veins in Europe and the Americas and the tale of their conquests, explorations and achievements continues to inspire people around the world.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."
