It provides practical guidance and inspiration on the things that matter most to us — including love, sex, money, personal power, self-expression and purpose, emotional healing and well-being, and how to have peace with our families — as well as more esoteric topics, such as how to invoke the help of our spirit guides and angels. This empowering book is the work of a great emerging spiritual teacher. It is filled with tools that you can use to break free of limitations and transform your life.

Uncommon Sense

Leadership On The Line is a survival manual for leaders that explains what they need to know to survive the professional and personal perils of leading, and how to exercise leadership in a way that reduces the chances of being pushed aside.

Brainhack

The proven model that offers powerful and elegant strategies for leaders *How Great Leaders Think: the Art of Reframing* uses compelling, contemporary examples to show how more complex thinking is the key to better leadership. Leaders who understand what's going on around them see what they need to do to achieve the results they want. Bolman and Deal's influential four-frame model of leadership and organizations—developed in their bestselling book, *Reframing Organizations: Artistry Choice and Leadership*—offers leaders an accessible guide for understanding four major aspects of organizational life: structure, people, politics, and culture. Tapping into the complexity enables leaders to decode the messy world in which they live, see more options, tell better stories, and find strategies that are more effective. Case examples of leaders like Jeff Bezos at Amazon, Howard Schultz at Starbucks, Tony Hsieh at Zappos, Ursula Burns at

Xerox, and the late Steve Jobs at Apple provide concrete lessons that readers can put to use in their own leadership. The book's lessons include: How to use structural tools to organize teams and organizations for better results How to build motivation and morale by aligning organizations and people How to map the terrain and build a power base to navigate the political dynamics in organizations How to develop a leadership story that shapes culture, provides direction, and inspires commitment to excellence

Ines of My Soul

What can 21st century educators learn from the example of a 19th century president? In this intriguing and insightful book, Harvey Alvy and Pam Robbins show how the legacy of Abraham Lincoln can guide today's education leaders--principals, teachers, superintendents, and others--as they tackle large-scale challenges, such as closing the achievement gap, and everyday issues, such as communicating with constituents. The authors identify 10 qualities, attributes, and skills that help to explain Lincoln's effectiveness, despite seemingly insurmountable odds: 1. Implementing and sustaining a mission and vision with focused and profound clarity 2. Communicating ideas effectively with precise and straightforward language 3. Building a diverse and competent team to successfully address the mission 4. Engendering trust, loyalty, and respect through humility, humor, and personal example 5. Leading and serving with emotional intelligence and empathy 6. Exercising situational competence and responding appropriately to implement effective change 7. Rising beyond personal and professional trials through tenacity, persistence, resilience, and courage 8. Exercising purposeful visibility 9. Demonstrating personal growth and enhanced competence as a lifetime learner, willing to reflect on and expand ideas 10. Believing that hope can become a reality Chapters devoted to each element explore the historical record of Lincoln's life and actions, then discuss the implications for modern educators. End-of-chapter exercises provide a structure for reflection, analysis of current behaviors, and guidance for future work, so that readers can create their own path to success--inspired by the example of one of the greatest leaders of all time.

In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals

- * What poverty is and how it affects students in school;
- * What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain);
- * Effective strategies from those who have succeeded and ways to

replicate those best practices at your own school; and * How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

The Uncommon Reader

Unflinching and plainspoken, Tessa Swan is not your typical 18th-century woman. Born and bred on the western Virginia frontier along with her five brothers, she is a force to be reckoned with. Quiet and courageous, Clay Tygart is not your typical 18th-century man. Raised by Lenape Indians, he returns a hero from the French and Indian War to the fort that bears his name, bringing with him Tessa's long-lost friend, Keturah, a redeemed Indian captive like himself. Determined to avoid any romantic entanglements as fort commander, Clay remains aloof whenever he encounters the lovely Tessa. But when she is taken captive by the tribe Clay left, his hand--and heart--are forced, leading to one very private and one very public reckoning. Intense, evocative, and laced with intricate historical details that bring the past to life, *An Uncommon Woman* will transport you to the picturesque and dangerous western Virginia mountains of 1770.

An Uncommon Bond

Soulshaping is the inspiring memoir of an archetypal "male warrior"--a trial lawyer--who struggled to find his heart and a more authentic, soulful path. Rivetingly personal and profoundly universal, this book is for anyone who has heard a whisper of something truer calling out to them amid the distractions of modern life. Jeff Brown's dramatic and often funny story takes readers through remarkably human experiences--emotional, physical, and economic--as he vividly recounts his troubled childhood, his success in apprenticing with Canada's top criminal lawyer, and his ultimate decision to leave the law and begin an inner journey to discover his soul's purpose. A work of courageous self-creation, *Soulshaping* reminds us that we are all truly connected, that our seemingly isolated struggles are actually part of the shared human challenge to live a life that is heart-centered and soul-driven. Both down-to-earth and magically mystical, *Soulshaping* will meet you where you live--and where you long to live.

Sequel to Dirk Gently's Holistic Detective Agency. A passenger check-in desk at London's Heathrow Airport goes up in a ball of flame and Dirk Gently becomes very inquisitive.

Friendship with God

In this book, Hoyk and Hersey describe 45 "unethical traps" into which any one of us can fall. These traps, they say, can erupt in any organizational environment. Some of these traps distort our perception of right and wrong—so we actually

believe our unethical behavior is right. Many of them are psychological in nature, and if we are not aware of them they are like illusions—webs of deception. In the authors' analysis, these traps significantly contributed to the large-scale corporate disasters we witnessed in recent years. Hoyk and Hersey take account of these realities and offer a "real-world" method that will predict, preclude, and, if necessary, "get us out of" these traps. Given the increased scrutiny under which all executives and managers operate today, this book is a 'must read' for anyone who is charged with achieving an organization's mission—whether that mission is increasing profit, serving the common good, or both.

Dark Nights of the Soul

From one of England's most celebrated writers, a funny and superbly observed novella about the Queen of England and the subversive power of reading. When her corgis stray into a mobile library parked near Buckingham Palace, the Queen feels duty-bound to borrow a book. Discovering the joy of reading widely (from J. R. Ackerley, Jean Genet, and Ivy Compton-Burnett to the classics) and intelligently, she finds that her view of the world changes dramatically. Abetted in her newfound obsession by Norman, a young man from the royal kitchens, the Queen comes to question the prescribed order of the world and loses patience with the routines of her role as monarch. Her new passion for reading initially alarms the palace staff and soon leads to surprising and very funny consequences for the country at large. With the poignant and mischievous wit of *The History Boys*, England's best loved author revels in the power of literature to change even the most uncommon reader's life.

Leading with Soul

Shows how the networking-averse can succeed by working with the very traits that make them hate traditional networking. Written by a proud introvert who is also an enthusiastic networker. Includes field-tested tips and techniques for virtually any situation. Are you the kind of person who would rather get a root canal than face a group of strangers? Does the phrase "working a room" make you want to retreat to yours? Does traditional networking advice seem like it's in a foreign language? Devora Zack, an avowed introvert and a successful consultant who speaks to thousands of people every year, feels your pain. She found that most networking advice books assume that to succeed you have to become an outgoing, extraverted person. Or at least learn how to fake it. Not at all. There is another way. This book shatters stereotypes about people who dislike networking. They're not shy or misanthropic. Rather, they tend to be reflective - they think before they talk. They focus intensely on a few things rather than broadly on a lot of things. And they need time alone to recharge. Because they've been told networking is all about small talk, big numbers and constant contact, they assume it's not for them. But it is! Zack politely examines and then smashes to tiny fragments the dusty old rules of standard networking advice. She shows how the very traits that ordinarily make people networking-averse can be harnessed to forge an approach that is just as effective as more traditional approaches, if not better. And she applies it to all kinds of situations, not just formal networking events. After all, as she says, life is just one big networking opportunity - a notion readers can now embrace. Networking enables you to accomplish the things that are important to you. But

you can't adopt a style that goes against who you are - and you don't have to. I have never met a person who did not benefit tremendously from learning how to network - on his or her own terms, Zack writes. You do not succeed by denying your natural temperament; you succeed by working with your strengths.

The Soul of a Team

An exploration of animal spirituality and the ability of animals to communicate with humans even in the afterlife • Chronicles the author's profound relationship with her dog, Brio, his ability to read her mind and emotions, and the messages she received from him after his death • Shares the author's research with animal communicators, psychics, and scientists specializing in animal intelligence such as Rupert Sheldrake • Explores animals' thoughts and feelings, interspecies communication and telepathy, animal souls and the afterlife, and animal reincarnation • Paper with French flaps

Looking for companionship after a near-fatal car crash, Elena Mannes, an award-winning television journalist and producer, decided to get her first dog. But what she found with her dog Brio shook the foundations of her physical and spiritual worlds, sending her on a quest to discover the nature of his spiritual origins and to contemplate and seek out the possibility of interspecies communication--even after death. Soon after bringing her puppy home, Mannes realized that the master-companion relationship would not be possible with Brio, who quickly showed that he had a mind--and a spirit--of his own. A healer Mannes visited immediately focused on Brio, exclaiming that he was an old soul. Mannes's growing curiosity about the intelligence, emotions, and consciousness of Brio and other dogs led her to contact an animal psychic in California who described, with amazing accuracy, Brio's favorite walks and the author's apartment from the dog's point of view. Motivated by her experience, Mannes produced a filmed segment with Diane Sawyer featuring the same psychic, who described Sawyer's country house and her dog's favorite spots in the yard. Mannes's skeptical journalist background compelled her to investigate further. She delved into the world of animal communicators, psychics, and scientists studying animal intelligence, including Rupert Sheldrake, to find answers to her multiplying questions: Do animals have thoughts and feelings? Consciousness? Souls? Is interspecies communication possible? Can animals reincarnate? Spanning the entire life and afterlife of Brio, including his last days and his messages to the author after he passed on, this book also explores Mannes' investigations into the spiritual life of animals, offering a new understanding of the unbreakable bond between humans and animals. Mannes invites readers to move beyond the owner-pet relationship and shows us how to see animals as thinking, feeling, spiritual beings whose connections with us extend far beyond life and death.

From the heights of sacred sexuality to the depths of human foible, they ultimately have to choose—die to this love, or shrink back to mediocrity, open to the next portal of possibility or postpone it until the next lifetime. Turnaround Leadership for Higher Education

In reaction to the changes imposed on public schools across the country in the name of "education reform," the Chicago Teachers Union redefined its traditional role and waged a multidimensional fight that produced a community-wide school strike and transformed the scope of collective bargaining into arenas that few labor relations experts thought possible. Using interviews, first-person accounts, participant observation, union documents, and media reports, Steven K. Ashby and Robert Bruno tell the story of the 2012 strike that shut down the Chicago school system for seven days. *A Fight for the Soul of Public Education* takes into account two overlapping, parallel, and equally important stories. One is a grassroots story of worker activism told from the perspective of rank-and-file union members and their community supporters. Ashby and Bruno provide a detailed account of how the strike became an international cause when other teachers unions had largely surrendered to corporate-driven education reform. The second story describes the role of state and national politics in imposing educational governance changes on public schools and draconian limitations on union bargaining rights. It includes a detailed account of the actual bargaining process revealing the mundane and the transcendental strategies of both school board and union representatives.

The Ethical Executive

TV, radio, traffic, telephones, pagers - our minds are bombarded daily by constant noise and clutter. No wonder so many people find it increasingly difficult to listen and comprehend. Simple pieces of information such as names go "in one ear and out the other." Poor listening may have tragic consequences such as the Challenger disaster and the Potomac River crash of 1982, or it can result in smaller tragedies such as lost promotions, stalled marriages, and troubled children. Rebecca Shafir assures us that we can transform every aspect of our lives, simply by relearning how to listen. *The Zen of Listening* is grounded in the Zen concept of mindfulness, a simple yet profound way of learning how to filter our distractions and be totally in the present. Rather than a list of tricks, this book is an all-encompassing approach allowing you to transform your life. Readers will be amazed at how simply learning to focus intently on a speaker improves the relationship, increases attention span, and helps develop negotiating skills. Learn the great barricades of misunderstanding, find out how to listen to ourselves, discover how to listen under stress, and boost our memory. This is a fun and practical guide filled with simple strategies to use immediately to enjoy our personal and professional lives to the fullest.

With clear explanations of the entire field, from rent control and the rise and fall of businesses to the international balance of payments, this is the first book for anyone who wishes to understand how the economy functions. This fifth edition includes a new chapter explaining the reasons for large differences of wealth and income between nations. bringing out the best in a team. Networking for People Who Hate Networking

How any business leader can create an atmosphere of competitiveness for exceptional growth When Ray Davis took over the local 40-person South Umpqua Bank in 1994, many people in the industry poked fun at his insistence that employees answer the phone with a cheery "World's Greatest Bank." Eleven years, \$7 billion in assets, and 128 branches (or "bank stores" in Umpqua lingo) later, the moniker seems quite apt. Other banks scratched their heads when Davis sent his tellers to Ritz-Carlton to learn customer service and were intrigued when he hired a cutting-edge design firm to completely re-think retail layout. Now, with a top design award under their belt, a name change (there never was a North Umpqua bank), and a completely new definition of the banking business, Umpqua has become the darling of the entrepreneurial press and a growth powerhouse. The *New York Times* calls Umpqua "Starbucks with tellers." Ray Davis (Portland, OR), named by *U.S. Banker* as one of the 25 most influential people in the financial industry in 2005, is President and CEO of Umpqua Holdings Corporation. Alan Shrader (Moraga, CA) is an experienced writer and editor of business books.

Leading with Soul

In *Turnaround Leadership for Higher Education*, international authorities on organizational change Michael Fullan and Geoff Scott reveal how campus leaders can proactively meet the challenges and expectations facing their institutions. They show how certain leadership capabilities and change-capable cultures in higher education institutions must mirror each other—for the benefit of students and their futures, and for the academy and society. The authors draw on a solid knowledge base of change, which advocates for stimulating and integrating strong moral purpose and equally strong partnerships and relationships inside and outside the academy.

On God

The Elite are immediately notified. She's expected to train. To defend. To fight. Sophia is ready to conquer evil, as the dragon riders should have been doing for centuries. Beaufont isn't a girl who will be told to sit down and relax when a war is brewing that only a dragon rider can extinguish.

The Long Dark Tea-Time of the Soul

Acclaimed, award-winning essayist and novelist Brian Doyle (1956-2017)--whose writing, in the words of Mary Oliver, is "a gift to us all"--presents one hundred original prayers that evoke his deep Catholic belief in the mystery and miracle of the ordinary (and the whimsical) in human life. In *A Book of Uncommon Prayer: 100 Celebrations of the Miracle & Muddle of the Ordinary*, which was named "A Best Spiritual Book of the Year" by *Spirituality & Practice*, you will find a series of prayers unlike any of the beautiful, formal, orthodox prayers of the Catholic tradition or the warm, extemporized prayers heard from pulpits and dinner tables. Doyle's often-dazzling, always-poignant prayers include eye-opening hymns to shoes and faith and family. In Doyle's words, "the world is crammed with miracles, so crammed and tumultuous that if we stop, see, savor, we are agog," and the pages of his newest book give voice and body to this credo. By focusing on experiences that may seem the most unprayerful (one prayer is titled "Prayer on Seeing Yet Another Egregious Parade of Muddy Paw Prints on the Floor"), he gives permission to discover the joys and treasures in what he often calls the muddle of everyday life.

Lead Simply

There is no longer any doubt that the way we think affects our bodies: countless scientific studies have shown this to be true. For former pharmaceutical scientist Dr David Hamilton, the testing of new drugs highlighted how profoundly the mind and body are connected. Time and time again, the control group of patients in drug trials improved at similar rates to those who actually received the medicines. Astounded, Dr Hamilton decided to change the direction of his work to explore the relationship between the mind and the body. This bestselling acclaimed book was first published 10 years ago. In it, Dr Hamilton explores the effect of visualization, belief and positive thinking on the body, and shows how using our imagination and mental processes can stimulate our own defences and healing systems to combat disease, pain and illness. In this new edition, Dr Hamilton has added four new chapters to discuss the latest cutting-edge information and extraordinary new techniques. These include using imagery to stimulate the immune system - a method that can benefit cancer patients undergoing conventional treatment - effectively using the mind to speed up rehabilitation from stroke, and powerful visualization strategies to help facilitate recovery from injury and illness.

A Fight for the Soul of Public Education

The principles and practices of Personal Leadership help people access the inherently creative possibilities that exist when they come together from different backgrounds or with different perspectives. Instead of turning away from difference in fear or mistrust, Personal Leadership helps people engage with difference from a place of inspiration, curiosity, and full intelligence, and in alignment with their highest and best. The three authors have extensive personal experience working and living across cultures and in situations of difference, in both domestic and global contexts. The fifty stories used throughout the book to illustrate the core themes are drawn from their own lives and from those of the many Personal Leadership practitioners in global business, international education, diversity initiatives, team building, community building, international cooperation, and leadership development. Together they show how we can use Personal Leadership when we find ourselves in unfamiliar environments, in contexts that are rapidly changing, or in the midst of personal or professional transition. The book is well-written, easy to read, and intends to help us all "make a world of difference."

Personal Leadership

Learning from Lincoln

Most people believe that science arose as a natural end-product of our innate intelligence and curiosity, as an inevitable stage in human intellectual development. But physicist and educator Alan Cromer disputes this belief. Cromer argues that science is not the natural unfolding of human potential, but the invention of a particular culture, Greece, in a particular historical period. Indeed, far from being natural, scientific thinking goes so far against the grain of conventional human thought that if it hadn't been discovered in Greece, it might not have been discovered at all. In *Uncommon Sense*, Alan Cromer develops the argument that science represents a radically new and different way of thinking. Using Piaget's stages of intellectual development, he shows that conventional thinking remains mired in subjective, "egocentric" ways of looking at the world--most people even today still believe in astrology, ESP, UFOs, ghosts and other paranormal phenomena--a mode of thought that science has outgrown. He provides a fascinating explanation of why science began in Greece, contrasting the Greek practice of debate to the Judaic reliance on prophets for acquiring knowledge. Other factors, such as a maritime economy and wandering scholars (both of which prevented parochialism) and an essentially literary religion not dominated by priests, also promoted in Greece an objective, analytical way of thinking not found elsewhere in the ancient world. He examines India and China and explains why science could not develop in either country. In China, for instance, astronomy served only the state, and the private study of astronomy was forbidden. Cromer also provides a perceptive account of science in Renaissance Europe and of figures such as Copernicus, Galileo, and Newton. Along the way, Cromer touches on many intriguing topics, arguing, for instance, that much of

science is essential complete; there are no new elements yet to be discovered. He debunks the vaunted SETI (Search for Extraterrestrial Intelligence) project, which costs taxpayers millions each year, showing that physical limits--such as the melting point of metal--put an absolute limit on the speed of space travel, making trips to even the nearest star all but impossible. Finally, Cromer discusses the deplorable state of science education in America and suggests several provocative innovations to improve high school education, including a radical proposal to give all students an intensive eighth and ninth year program, eliminating the last two years of high school. *Uncommon Sense* is an illuminating look at science, filled with provocative observations. Whether challenging Thomas Kuhn's theory of scientific revolutions, or extolling the virtues of Euclid's *Elements*, Alan Cromer is always insightful, outspoken, and refreshingly original.

A passionate tale of love, freedom, and conquest from the New York Times bestselling author of *The House of the Spirits*, Isabel Allende. Born into a poor family in Spain, Inés Suárez, finds herself condemned to a life of poverty without opportunity as a lowly seamstress. But it's the sixteenth century, the beginning of the Spanish conquest of the Americas. Struck by the same restless hope and opportunism, Inés uses her shiftless husband's disappearance to Peru as an excuse to embark on her own adventure. After learning of her husband's death in battle, she meets the fiery war hero, Pedro de Valdivia and begins a love that not only changes her life but the course of history. Based on the real historical events that founded Chile, Allende takes us on a whirlwind adventure of love and loss seen through the eyes of a daring, complicated woman who fought for freedom.
