Purpose draws potential. Potential brings to life destiny. "Understanding you have a purpose is the first brick on the road to destiny!" —Otis Teague This book asked the question, is the church the world's only hope? That with all the challenges and changes people are facing within today's society in the game called life, when there is an ever-increasing need for hope, where is the church, and has the church simply been sidelined with injuries? One of the greater questions is, have we lost sight of the things in this world that really matter? Do people still matter, or has that focus been lost behind all the distractions, turmoil, and mentalities of how much I can I gain in the here and now? A book that speaks to your heart about how much you matter to God, letting you know that God loves and that no matter what you have done or where you are in your life that you can make it! If you would just get to know him, trust that he is a keeper of his word, and simply give him a chance to show you yourself. The challenges we face are never more than we could handle, though we never think about that while we are going through them. But after you live through that significant life-changing event, you should realize and know that nothing can overtake you unless you let it, and nothing is greater than the love God has for you.

### **The Advance**

An honest discussion of free trade and how nations can sensibly chart a path forward in today's global economy. Not so long ago the nation-state seemed to be on its deathbed, condemned to irrelevance by the forces of globalization and technology. Now it is back with a vengeance, propelled by a groundswell of populists around the world. In *Straight Talk on Trade*, Dani Rodrik, an early and outspoken critic of economic globalization taken too far, goes beyond the populist backlash and offers a more reasoned explanation for why our elites' and technocrats' obsession with hyper-globalization made it more difficult for nations to achieve legitimate economic and social objectives at home. Ranging over the recent experiences of advanced countries, the eurozone, and developing nations, *Straight Talk on Trade* charts a way forward with new ideas about how to reconcile today's inequitable trends with liberal democracy and social inclusion.

### **Normal Instructor and Primary Plans**

Relates stories from the author's upbringing to reconcile the contradictions between the opportunities of modern life and the constrictions of Orthodox practice.

Succeeding in today's corporate and not-for-profit boardrooms is tougher than ever before, with new and established board directors facing myriad new and rapidly globalizing governance challenges. Directors and aspiring board candidates need a survival guide to beat the odds and avoid crises—the best credentials and the best of intentions aren't enough. This book is that guide. • Supplies frank advice and straight talk for current board directors and future directors that warn of the various kinds of troubling developments that can arise in and outside the boardroom • Breaks down the core requirements, expectations, and commitments directors must make to protect shareholders based on the coauthors' deep and varied board and executive leadership experience • Provides a roadmap for anyone who wants to serve on a board or advisory board—be it for a company, institution, not-for-profit, or government or community organization—or those who currently serve on boards but need guidance and advice • Explains why most boards aren't more diverse and what today's directors can and should do to rectify this issue

After the pioneers, the second generation of African American anthropologists trained in the late 1950s and 1960s. Expected to study their own or similar cultures, these scholars often focused on the African diaspora but in some cases they also ranged further afield both geographically and intellectually. Yet their work remains largely unknown to colleagues and students. This volume collects intellectual biographies of fifteen accomplished African American anthropologists of the era. The authors explore the scholars' diverse backgrounds and interests and look at their groundbreaking methodologies, ethnographies, and theories. They also place their subjects within their tumultuous times, when antiracism and
