Combining classic international economics with straight-from-the-headlines immediacy, Feenstra and Taylor's text seamlessly integrates the subject's established core content with topic areas and ideas that have emerged from recent empirical studies. A MODERN APPROACH FOR THE 21ST CENTURY International economics texts traditionally place greater emphasis on theory and a strong focus on the advanced countries. Feenstra/Taylor links theory to empirical evidence throughout the book, and incorporates coverage of emerging markets and developing economies (India, China, SE Asia) to reflect the evolving realities of the global economy. The new edition has been extensively revised and updated, especially in light of the ongoing world financial crisis. NOTE: Feenstra/Taylor, International Economics, Second Edition, is available in four versions: International Economics, 2e: 1-4292-3118-1 International Trade, 2e: 1-4292-4104-7 International Macroeconomics, 2e: 1-4292-4103-9 Essentials of International Economics, 2e: 1-4292-7710-5

Adapted by Paul Krugman and Robin Wells from their bestselling macroeconomics textbook, *Macroeconomics in Modules* is the only text for the principles of macroeconomics course organized in the supremely accessible, highly effective modular format. Instead of chapters of standard length, the book covers the fundamentals of macroeconomics in 49 brief (4-10 page) modules divided into 14 sections. *Macroeconomics in Modules* offers the best of what makes Krugman/Wells a classroom favorite (story-telling approach, engaging writing, fascinating examples and cases), in a format students and instructors will love. Extensive educational research shows that students absorb more from shorter reading assignments than longer ones. And with coverage in self-contained modules, instructors can assign specific topics without asking students to read entire chapters.
