University" Drawing upon research from leading scholars in the fields of social psychology, organization behavior, sociology, and cognitive psychology, this invaluable resource for both young managers and seasoned executives alike covers both basic and cutting-edge team building and management principles as it outlines in a clear, step-by-step fashion how to improve the functioning of teams within an organization. Introduces the basic building blocks for analyzing and perfecting teamwork; addresses the assessment of a team's performance and productivity; and discusses when and how to reward teamwork in organizations. Focuses on "internal dynamics," i.e, structuring tasks, selecting people, and fostering team relationships; how teams communicate, process information, and create a collective team intelligence; and ways to bring out a team's maximum creativity. Covers "external dynamics," i.e, team boundaries, inter-team relations, networking, and boundary-spanning; dual-tasks of effective leadership; issues of conflict and competition between teams in the organization; and

the impact of information technology on both global and local teamwork. Begins each chapter with a case study of a real team and company, and includes practical appendices that include tips on how to run a meeting; discussions on how to build and maintain an effective study group; and examples of 360-degree evaluations. For organizational managers and team leaders.

hard-to-believe real examples will keep them reading throughout the course. Baltzan's approach discusses various business initiatives first and how technology supports those initiatives second. The premise for this unique approach is that business initiatives drive technology choices in a corporation. Therefore, every discussion addresses the business needs first and addresses the technology that supports those needs second. This approach takes the difficult and often intangible MIS concepts, brings them down to the student's level, and applies them using a hands-on approach to reinforce the concepts. A derivative of the Baltzan; Business Driven Technology version, this M: Information Systems provides the foundation that will enable students to achieve excellence in business, whether they major in operations management, manufacturing, sales, marketing, etc. M: Information Systems is designed to give students the ability to understand how information technology can be a point of strength in an organization.

### **Information Systems for Business**

Appropriate for any course introducing management information systems from a business perspective. This casebook will serve as an ideal complement to most MIS/CIS textbooks. Designed to demonstrate how software can support managerial decision-making activities, this casebook features 24 cases (more than another casebook currently on the market) covering a wide range of functional areas throughout the business, including finance/accounting, HR, production, and information systems. The cases are

spread across three difficulty levels basic, intermediate, and advanced. They present common managerial issues and problems, and encourage students to actually use their models to make decisions for the cases characters. They require students to apply spreadsheet, database, Web-page development, and/or presentation graphics software, often in an integrated manner. Many of the cases require students to prepare both written and oral presentations on their solutions. Among the topics covered in MIS Cases: Decision Making with Application Software Second Edition: forecasting, inventory decisions, what-if analyses, pricing strategies, billing decisions, and much more.

been adapted in line with the feedback from our many readers." "The book explores the key themes and issues in one of the most challenging and fascinating areas of business, organisational and social life. It does so in a manner that enables you to sharpen your insights and practical skills. "Understanding Cross-Cultural Management" offers a selective but broad view of classic and contemporary thinking on cultural management and encourages you to apply theories and ideas to practice - and to relate them to your own experience - through various examples and cases from the business world as well as through a range of practical activities, including: Cross-cultural concepts, which explain key ideas from leading theorists, thinkers and practitioners. Case studies (many of them based on articles from the "Financial Times"), dilemmas and points for reflection, which enable you to reflect internally and interact externally. Spotlights in every chapter, which briefly illustrate the concepts being described. Mini-cases with questions, which give consistent application of theory to practice. Activities at the end of each chapter, as well as at the end of each of the book's three parts, which provide a broader and more integrated perspective on the material in question. These encourage you to develop both your cross-cultural management skills and a critical view of research done in this area. This book has been written for undergraduate and postgraduate students, as well as practising managers and professionals, who are studying cross-cultural and international management as part of either specialist international business programmes or general business-related qualifications.
