The Vampire's Bride

Instead of Going Out of Your Mind, Get into His. The only American to study and work with the renowned Barbara Woodhouse, Brian Kilcommons solves all those "bad dog" problems that drive owners crazy-

and shows you how to raise a puppy into a happy, perfectly behaved dog. The trick is to understand how dogs think, read their body language, and, with the secrets Kilcommons shares in this book, be "fun, fair, and firm." A dog-training guide that gives you immediate results even with an adult dog, this manual trains you, as it gives owners everything they need and everything dogs need to become Good Owners, Great Dogs Includes specific tips on how to: * housebreak both puppies and adult dogs * teach your dog to come to you regardless of what he's doing * end annoying habits like jumping, food stealing, and barking * prevent aggression and, in many cases, stop it after it has become a problem * use games to teach your dog to obey and much more.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area

known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

The topic for this book incorporates photography, surrealism and print advertisement by advertisers to garner attention towards the products and services that they promote. The term "Photo-surrealism" is developed by the author in this book. The word "Photo" is derived from the photography technique used in advertising and "Surrealism" from the surrealism style. This book discusses the characteristics of Photo-surrealism style, its importance and effectiveness in print advertising today.

Avid North American birders share wit, wisdom,

advice, and what fuels their passion for birds. Birding gets you outside, helps you de-stress, exercises your body and mind, puts your day-to-day problems in perspective, and can be lots of fun. Birders know this, and in this collection of thirty-seven brief essays, birders from diverse backgrounds share their sense of wonder, joy, and purpose about their passion (and sometimes obsession). From the Pacific Ocean to Central Park, from the rainforest in Panama to suburban backyards-no matter what their habitat, what good birders have in common is a curiosity about the natural world and a desire to share it with others. In these delightful essays, each accompanied by an endearing drawing, devoted birders reveal their passion to be fulfilling, joyful, exhilarating, and maybe even contagious. Contributors include many well-known birders, such as Richard Crossley, Pete Dunne, Kenn Kaufman, Michael O'Brien, Bill Thompson, and Julie Zickefoose. A portion of the proceeds goes to the American Birding Association, North America's largest membership organization for active birders.

Our Working-girls and how to Help Them

He is Layel, king of the vampires, a master seducer no woman can deny. But since a rogue horde of dragons killed his beloved over two centuries ago, Layel has existed only for vengeance...until he meets Delilah. Wary of love, the beautiful Amazon wants nothing to do with the tormented vampire. Yet there's no denying their consuming desire every time he nears her. Neither trusts the other—nor can they survive alone. For in an impossible game of the gods' devising, they've been trapped on an island, about to face the ultimate challenge: surrender to the passion that will bind them forever...or be doomed to an eternity apart.

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored. The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

Annotation Advanced guide to distributed applications using PowerBuilder 9. This book addresses development Web and Intranet-based systems, including Web Services, Portals, Application-Servers, XML, and Mobile Access. Content provides both specific implementation techniques and architectural patterns for distributed application development. PowerBuilder 9, to be released Q4 2002, introduces many highly-anticipated distributed development features including support for Web Services and Java application servers. Version 9 of PowerBuilder introduces many features designed specifically to blend the traditional strength of PowerBuilder as a rapid Client/Server application development tool with the new emerging models for distributed application development. PowerBuilder developers need PowerBuilder-specific information on interacting with Java application servers, such as WebSphere, WebLogic, and Sybases Enterprise Application Server (EAServer), and Web Service development. This book presents the new capabilities of PowerBuilder 9 along with the architecture and patterns required to create distributed systems in PowerBuilder. William Green and his team of writers are among the most prominent members of the Sybase community, having helped found TeamSybase in 1994. They have written

and served on the advisory boards for every major PowerBuilder publication and have authored three books -- PowerBuilder 5 Object-Oriented Design and Development, PowerBuilder Foundation Class (PFC), and Secrets of the PowerBuilder Masters. They respond to several hundred newsgroups and listserv postings daily. They are active consultants implementing PowerBuilder-based solutions and serve on key community advisory panels within Sybase.

"Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students."---Hal Harris, University of Missouri-St. Louis

"McQuarrie's book is extremely well written, the order of topics is logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book."---Mark Kearley, Florida State University

This new fourth edition of General Chemistry takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all-new illustrations, it is available in a soft-cover edition to offer professors a fresh choice at an outstanding value. Student supplements include an online series of descriptive chemistry Interchapters, a Student

Solutions Manual, and an optional state-of-the-art Online Homework program. For adopting professors, an Instructor's Manual and a CD of the art are also available.

The Vixen Manual

Rayment Kirby shows you how to execute complex image concepts with simple tools. Working in a small studio with simple lighting, Kirby uses digital technology to flawlessly transform images of models, props, and small-scale sets into dramatic composites. Building on these transformative processes he also explores how everyday locations can be infused with

a fantasy element for more evocative results. For each final image, the author presents a lighting diagram and alternate or procedural images to reveal the process used. Easy-to-follow text detailing the process makes it easy to adapt his inventive approaches to your own images for more exciting and compelling nude images. Packed with DIY solutions for big looks, this book is sure to stoke your creative fires!

"Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind."--Alibris.

As daring and defiant as Kirk Douglas journeying "20,000 Leagues Under the Sea," there's no stopping diver Hawk Ridley as he takes the plunge into a briny world of untold riches and danger. The Caribbean is a fortune hunter's dream, salted with the gold of galleons long ago claimed by the deep. Now Hawk's headed for the Windward Passage of Haiti to stake his claim. But a rival team has also picked up the scent, and they're willing to turn the sea red with blood to get to the gold first. Fighting off ruthless competitors is nothing new to Hawk but fighting off a beautiful woman is a different story. Is she an innocent stowaway or a seductive saboteur? Between the cool millions lying on the bottom of the ocean, and the boiling - hot race to grab it, Hawk's about to find the answer and make a discovery "Twenty Fathoms Down" that will blow you out of the water. When it came to research, Hubbard was not one to head for the library. He always went to the source - in this case a U.S. navy deep - sea diver who agreed to show him the ropes and the danger. Hubbard admits it was daunting - even frightening - but he returned from the experience with all the first - hand knowledge he needed to fathom the true nature of life and death underwater. Wiring a House

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of

other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

This book records the growth of telegraphy over two centuries, depicting the discoveries and ingenuity of the experimenters and engineers involved, the equipment they designed and built, and the organization, applications and effects on society. The two main phases - cable-based techniques that began in the early 19th century and then wireless transmission in the 20th century - parallel the changes in voice and information communications seen recently. Modern methods of data compaction, coding and encryption in today's communications all have their routes in the techniques of the telegraph pioneers.
