In Jack's Arms

Looking beyond the familiar trappings of the cult of female chastity—such as hagiographies of widows and chastity shrines—in late imperial China, this book explores the cult's political significance and practical ramifications in everyday life during the eighteenth century. In the first full-length study of the subject, Janet Theiss examines a vast number of laws, legal cases, regulations, and policies to illustrate the social and political processes through which female virtue was defined, enforced, and contested. Along the way, she provides rich details of social life and cultural practices among ordinary Chinese people through narratives of criminal cases of sexual assault, harassment, adultery, and domestic violence.

Madness in Solidar

Analysis of North African revolt against authoritarianism, known as the 'Arab Spring', embraced reductionist explanations such as the social media, youth unemployment and citizens' agitations to regain dignity in societies humiliated by oppressive regimes. This book illustrates that reductionist approaches can only elucidate some symptoms of a social problem while leaving unexplained the economic and political structures which contributed to it. One outcome of quiescence, resource-based ethnic and sectarian conflicts and faulty development paradigm is deepened inequality and a wedge between winners and losers or affluence, wealth and power vis-à-vis poverty and hunger among humiliated jobless and hope-less masses. The book blends theories of development and transition to explain the complex factors which contributed to North Africans' revolt against authoritarianism and its long-term consequences for political development in the Arab World. This timely book is of great interest to researchers and students in Development Studies, Economics and Middle Eastern Studies as well as policy makers and democracy, human rights and social justice activists in the Arab world.

Psychologic is a formal system and relationship within which psychological processes are defined. The language people ordinarily use to formulate, think, and talk about psychological phenomena is organized by Jan Smedslund into a set of propositions aimed at identifying the generalities which underlie human behavior. In this way, psychologic illuminates the conceptual system of psychology embedded in ordinary language. This book continues Professor Smedslund's search for stable theoretical structures to explain the meanings that are part of all psychological investigation.

Anthropology in the Sudan

For years, scholars hypothesized about what Islamists might do if they ever came to power. Now, they have answers: confusing ones. In the Levant, ISIS established a government by brute force, implementing an extreme interpretation of Islamic law. On the opposite end of the spectrum, Tunisia's Ennahda Party governed in coalition with two secular parties, ratified a liberal constitution, and voluntarily stepped down from power. In Egypt, the Muslim Brotherhood, the world's oldest Islamist movement, won power through free elections only to be ousted by a military coup. The strikingly disparate results of Islamist movements have challenged conventional wisdom on political Islam, forcing experts and Islamists to rethink some of their most basic assumptions. In *Rethinking Political Islam*, two of the leading scholars on Islamism, Shadi Hamid and William McCants, have gathered a group of leading specialists in the field to explain how an array of Islamist movements across the Middle East and Asia have responded. Unlike ISIS and other jihadist groups that garner the most media attention, these movements have largely opted for gradual change. Their choices, however, have been reshaped by the revolutionary politics of the region. The groups depicted in the volume capture the contradictions, successes, and failures of Islamism, providing a fascinating window into a rapidly changing Middle East. It is the first book to systematically assess the evolution of mainstream Islamist groups since the Arab uprisings and the rise of ISIS, covering 12 country cases. In each instance, contributors address key questions, including: gradual versus revolutionary approaches to change; the use of tactical or situational violence; attitudes toward the nation-state; and how ideology, religion, and political variables interact. For the first time in book form, readers will also hear directly from Islamist activists and leaders themselves, as they offer their own perspectives on the future of their movements. Islamists will have the opportunity to challenge the assumptions and arguments of some of the leading scholars of Islamism, in the spirit of constructive dialogue. *Rethinking Political Islam* includes three of the most important country cases outside the Middle East-Indonesia, Malaysia, and Pakistan-

allowing readers to consider a greater diversity of Islamist experiences. The book's contributors have immersed themselves in the world of political Islam and conducted original research in the field, resulting in rich accounts of what animates Islamist behavior.
