Sebastian Blake, Earl of Merrick, long ago fled the responsibilities of his title to become the infamous pirate, Captain Phoenix. But the booty he's just captured on a merchant ship is a fierce tempered minx who claims to be a bride. . .his bride, married to him by proxy on behest of their fathers. He could shame his hated family and return his beautiful wife untouched, but no treasure has ever proved more tempting to Sebastian, and making their marriage a true one--in every sense--is his one urgent desire . . .

Lucien's Gamble Lucien Remington's reputation as a debauched libertine who plays by no one's rules--in business or the bedroom--is well deserved. He gets what he wants, social repudiation be damned. But society can keep from him the one thing he truly desires, the untouchable Lady Julianne La Coeur. Until she sneaks into his club dressed as a man and searching for her irresponsible brother. Suddenly she's in Lucien's grasp, his to take, and his mind is filled with the most wickedly sinful thoughts. A gentleman would walk away from the temptation she presents. But then, Lucien has never claimed to be a gentleman. . .

Her Mad Grace Hugh La Coeur never wanted to be the Earl of Montrose. Wine, women, and a hefty wager are preferable to responsibility of any kind. It's certainly preferable to spending the night in an eerie, neglected mansion owned by a legendary madwoman. The duchess's companion, the fiercely independent Charlotte, is another matter altogether. Hugh would be happy to spend as many nights in her bed as possible. He knows she's hiding terrible secrets, but for once in his life, Hugh has the desire to take on someone else's burden as his own, no matter what the danger. . . They're mad, bad, and totally

irresistible. . .

## **Daily Language Review**

With a veteran 's eye for the harsh and gritty details of war, David Drake depicts a futuristic analog of Vietnam-era tank combat in his Hammer's Slammers fiction. Upon this tactical foundation, Drake uses historical metaphor to provide a rich and detailed future-history that is both unique and strangely familiar. The characters that make up the Hammer's Regiment are neither cartoon heroes nor propaganda villains; rather they are competent professionals engaged in a deadly business. The inevitable conflicts

between policy, necessity, and human nature are often at the forefront of the Slammers narratives, and it is this rich fusion of elements that makes Drake's Slammers fiction instantly identifiable and utterly compelling. The Hammer's Slammers series is some of the most important and influential work in military SF. The Vietnam War made indelible marks on the science fiction genre, and Drake's service with the Blackhorse regiment during the war gives his fiction a unique perspective. It is this perspective that is sometimes lacking in military SF, and one that makes Drake's work so important to the science fiction genre as a whole. This three-volume set collects all the Slammers short fiction and novels into a set of uniform editions, and presents a new, previously uncollected piece of fiction in each volume. This first volume collects the existing short fiction, along with the background material from the original Slammers collection. The new story in this volume, "A Death in Peacetime," chronicles an important event in the Hammer's Regiment history... an event that has been implied, but never fully explained... until now.

This title explores the place of education in development debates and provides a systematic as well as a theoretical overview of the main approaches to education and development. It emphasises the fact that education is profoundly shaped by national and local cultures even if many issues are shared across institutions in different locations. Education and Development discusses different theoretical accounts from different disciplinary traditions to help students understand the complexity of the overall debate. The text does not shy away from discussions of education's negative impacts, and insists that an account of education must include consideration of early childhood development, adult, vocational and higher education, as well as the growing range of

Electrical and Electronic Engineering provides a foundation for first year undergraduates and HND students in electrical and electronic engineering. It offers exceptional breadth of coverage and detail in a clear and accessible manner. Suitable for specialists and non-specialists, it makes no excessive demands on the reader's mathematical skills. The basics of circuit theory and analysis are covered at the outset, followed by discrete devices and integrated circuits. Electrical machines, power electronics and digital logic circuits are treated thoroughly in a central group of chapters. Coverage of the essentials of computer architecture and networks is followed by a detailed chapter on microprocessors and microcontrollers. The importance of modern communications technology is reflected in the comprehensive group of chapters devoted to analogue, digital and optical fibre communications systems and telephony. Two concluding chapters deal with the important topic of electromagnetic compatibility and the basics of instrumentation and measurement that are essential for non-specialists. This fully revised third edition of this popular text uses a wealth of practical exercises and examples making it ideal as a teaching resource or a study tool.

Mind Platter is a compilation of reflections on life as seen through the eyes of an educator, student, and human who experienced her early days in silence. It is written in the words of a woman who came from Lebanon to Canada at the age of sixteen and experienced what it was like to have fate push her to a place where she didn't belong. It is written in the voice of every person who has felt unheard, mistreated, misjudged, or unseen. The book contains over 200 one-page reflections on topics we encounter in our everyday lives: love, friendship, hurt, inspiration, respect, motivation, integrity, honesty, and more. Mind Platter is not about the words it contains, but what the reader makes of them. May this book give a voice to those who need one, be a crying shoulder for those who yearn for someone to listen, and inspire those who need a reminder of the power they have over their lives.

It explores the journey children take in developing their creativity, and helps students and practitioners to nurture creativity. Written by a leading expert in creativity, development and learning in young children, *Cultivating Creativity* links theory and practice to provide a clear framework for this difficult, but vital, aspect of development and learning. Taking a broad conceptualised view of creativity, the author addresses the issue not just in terms of the arts but also the role that creativity has within sciences and humanities. This new edition covers recent and ongoing curriculum, legislative and policy changes that affect teaching in this area. Recent advances in the field are also addressed including, brain research, movement, outdoor learning and individual learning.
