the exotic Mercedes-Benz SLR McLaren with its supercharged 5.5 litre quad-cam

The book focuses on the effects of shock waves on vacancies and their clusters in fcc crystals. It is shown that high-speed cooperative atomic displacements represent a powerful tool for the purposeful modification of defect structures in crystalline bodies. The results are important for radiation material science, nano-engineering, the study of shock wave effects and the ultrasonic treatment of materials. Keywords: Computer Modelling of Nanopores, Molecular Dynamics, Fcc Metals, Defect Structures in Crystals, Radiation Material Science, Nano-Engineering of Materials, Ultrasonic Treatment of Materials, Radiation Induced Defects, Vacancy Clusters, Shock Wave Effects, Radiation-Resistant Materials, Thermomechanical Processing, Energy Transfer Mechanism, Nanopore Nucleation, Nanopore Based Filters, Nanopore Based Detectors, Cooling Elements in Nano-Electronics.

Mercedes Benz Automobile History & Maintenance Book

In 1955, Mercedes-Benz wins the sports car world championship with the racing car 300 SLR (W 196 S). In addition to the titles achieved that same year in the formula 1 world championship and the European touring car championship, this success is proof of the unprecedented dominance of a single manufacturer on the stage of international automobile racing. Stirling Moss and Juan Manuel Fangio, the most successful drivers of their era, celebrate impressive double victories in the 300 SLR at the most demanding road races in the world, triumphs that continue to afford this unparalleled racing car lasting fame to this day. Based on extensive research in the archives of Mercedes-Benz Classic, this book provides exhaustive and authentic documentation of the technical development of the W 196 S. All of the races as well as the biography of each individual vehicle are presented with the aid of images and illustrations, some of which have never before been published. Its high-quality design and exquisite features make the book a true collector's item. (German edition ISBN 978-3-7757-4000-5)
