institutionalizing social hierarchies. This book focuses specifically on an enigmatic type of public, monumental sculpture known as the 'potbelly' that traces its antecedents to earlier, small domestic ritual objects and ceramic figurines. The cessation of domestic rituals involving ceramic figurines along the Pacific slope coincided not only with the creation of the first monumental potbelly sculptures, but with the rise of the first state-level societies in Mesoamerica by the advent of the Late Preclassic period. The potbellies became central to the physical representation of new forms of social identity and expressions of political authority during this time of dramatic change.

in the writings of Mormon and Moroni. We also read about the Jaredites, who were the first to inherit the land, long before Lehi's family arrived. as the Codex Mexicanus, includes records pertaining to the Aztec and Christian calendars, European medical astrology, a genealogy of the Tenochca royal house, and an annals history of pre-conquest Tenochtitlan and early colonial Mexico City, among other topics. Though filled with intriguing information, the Mexicanus has long defied a comprehensive scholarly analysis, surely due to its disparate contents. In this pathfinding volume, Lori Boornazian Diel presents the first thorough study of the entire Codex Mexicanus that considers its varied contents in a holistic manner. She provides an authoritative reading of the Mexicanus's contents and explains what its creation and use reveal about native reactions to and negotiations of colonial rule in Mexico City. Diel makes sense of the codex by revealing how its miscellaneous contents find counterparts in Spanish books called Reportorios de los tiempos. Based on the medieval almanac tradition, Reportorios contain vast assortments of information related to the issue of time, as does the Mexicanus. Diel masterfully demonstrates that, just as Reportorios were used as guides to living in early modern Spain, likewise the Codex Mexicanus provided its Nahua audience a guide to living in colonial New Spain.

In this revised and updated edition of a book first published in 1981, the authors synthesize recent research, focusing on three intensively studied regions, the Valleys of Oaxaca and Mexico and the Maya lowlands. The University Museum has been involved in Mesoamerican archaeology for more than a century. Its collections include material from northern Mexico to Costa Rica and represent all of the major cultures of the region. This guide allows the visitor to gain on-site understanding and the off-site reader to grasp how the Museum's collections fit into current archaeological theory. The text underscores some of the pan-Mesoamerican aspects of pre-Columbian peoples and the way each group interpreted underlying similarities to create individual customs and beliefs, burials and caches, beauty and adornment. The guide focuses on the unique aspects of the collection, much of it stemming from the Museum's own excavations, including eight large carved limestone monuments from its historic early excavations at Piedras Negras, Guatemala (1931-39) and Caracol, Belize (1951-53), the only group of original Maya monuments on display in an American museum. The inscriptions on these monuments are reproduced in detail, accompanied by translations and explanations drawing on the latest epigraphic research. Also included are important pieces from the Guatemala highlands; figurines and carvings collected in the early nineteenth century by the U.S. ambassador to Mexico; as well as significant material from Central America, including the famous carved alabaster vases from the Uloa Valley in Honduras.

The Aztecs and Mixtecs of ancient Mexico recorded their histories pictorially in images painted on hide, paper, and cloth. The tradition of painting history continued even after the Spanish Conquest, as the Spaniards accepted the pictorial histories as valid records of the past. Five Pre-Columbian and some 150 early colonial painted histories survive today. This copiously illustrated book offers the first comprehensive analysis of the Mexican painted history as an intellectual, documentary, and pictorial genre. Elizabeth Hill Boone explores how the Mexican historians conceptualized and painted their past and introduces the major pictorial records: the Aztec annals and cartographic histories and the Mixtec screenfolds and lienzos. Boone focuses her analysis on the kinds of stories told in the histories and on how the manuscripts work pictorially to encode, organize, and preserve these narratives. This twofold investigation broadens our understanding of how preconquest Mexicans used pictographic history for political and social ends. It also demonstrates how graphic writing systems created a broadly understood visual "language" that communicated effectively
