Discipline in the Secondary Classroom

Secondary Classroom Management presents an introduction to classroom management in secondary schools. Written in a lively, engaging, conversational style, it combines what research has to say about effective classroom management with

knowledge culled from practice. This text focuses on real decisions made by real teachers as they manage the complex environment of the secondary classroom. The text integrates the thinking and the actual management practices of four real secondary school teachers into discussions of research-based management principles. Readers come to "know" these teachers. We hear about the classes they teach and about the physical constraints of their rooms. We hear them reflect on their rules and routines and watch as they teach these rules and routines to students. We listen as they talk about motivating students and building community, and as they discuss appropriate ways to deal with misbehavior. Secondary Classroom Management is well-organized and more comprehensive than many classroom management texts, with chapters on building safer, more caring classrooms; working with families; using time effectively; motivation; working with troubled students; and violence prevention. Teaching Inquiry Science in Middle and Secondary Schools

Instructional Strategies for Middle and High School Social Studies: Methods, Assessment, and Classroom Management is an exciting methods-based text that integrates appropriate management and assessment techniques with seven distinct teaching strategies. Writing explicitly for pre-service social studies teachers, veteran teacher educator Bruce E. Larson offers detailed descriptions of a range of instructional strategies, along with guidelines for deciding how and when to use each. Part I offers the foundations for teaching and learning in a social studies classroom, and explores contextual, theoretical, and policy factors that all teachers need to consider before entering the classroom. Part II delivers a range of comprehensive strategies for providing instruction that is appropriate for particular lessons, student abilities, and classroom environments. The practical strategies in Part II build upon the learning theories described in Part I, positioning Instructional Strategies for Middle and High School Social Studies to be the go-to, all-inclusive teacher's guide to the social studies classroom. New to this Edition A list of goals before each chapter presents an overview of the chapter's content focus, and

provides an outline for the chapter review. Extensively revised Part I (chapters 1–4) provides an updated review of national standards developed for teaching history, geography, civics, and economics. In-depth applications of the Common Core State Standards for the social studies are also explored. New "Reality Check" feature provides directions for integrating field-based experiences into the chapters, and contextualizes the ideas in the book for a classroom setting. Each chapter in Part II (chapters 5–11) has been expanded to include a section labeled "Enhancing Student Learning with Technology," offering websites, links, and other resources for integrating recent technologies into the classroom. Chapters 5–11 include a new "Making Your Lesson More Meaningful for ELLs" feature, which provides ideas—based on current research and theories about learning language—for engaging ELLs, specific for each instructional strategy. Expanded discussion of the "Understanding by Design" model equips teachers to design learning experiences that promote student understanding by intentionally designing what happens in the classroom, and developing authentic formative assessments of student learning.

Effective Classroom Management

Inspiring Middle and Secondary Learners

Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In *Better Than Carrots or Sticks*, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to *

- * Establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills;
- * Develop a nonconfrontational rapport with even the most challenging students; and
- * Implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger-pointing and retribution.

Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching,

and constructive environments built on collective respect and focused on student achievement.

Middle and Secondary Classroom Management: Lessons from Research and Practice

Written in a lively, engaging, conversational style that teacher education students appreciate, Elementary Classroom Management combines what research has to say about effective classroom management with knowledge culled from practice. The text is scholarly and research-based, yet realistic and practical. The text shows how four masterful teachers (grades 1, 3, 4 and 5/6) in very different school settings create classrooms that are orderly and productive, yet humane and caring. By integrating into discussions of research-based management principles, both the thinking and the actual management practices of four real elementary teachers, readers come to "know" these teachers and their classrooms. We hear about the classes they teach and about the physical constraints of their rooms, hear them reflect on their rules and routines, and watch as they teach those rules and routines to students. We listen as they talk about motivating students and building community and as they discuss appropriate ways to deal with misbehavior. Well-organized and more comprehensive than many classroom management texts, Elementary Classroom Management includes chapters on building safer, more caring classrooms; working with families; using time effectively; motivation; working with troubled students and students with special needs; and violence prevention. It also addresses the managerial challenges involved in a variety of instructional formats, such as seatwork, recitations and discussions, and groupwork. The third edition features updated and expanded coverage. The revision stresses the need to build caring, supportive relationships with and among students. It responds to current concerns about students' alienation, isolation, apathy, and lack of motivation so that prospective and beginning teachers see that classroom management is not simply about rules, rewards, and consequences, but also about building connections with students and creating safer, more caring classrooms.

Classroom Discipline

This book shows middle and high school teachers in differentiated classrooms how to integrate assessment into the teaching and learning process. With examples from real classrooms, this book demonstrates how to use a wide variety of

Differentiated Assessment for Middle and High School Classrooms

This practical book examines models of classroom management by discipline, system, and instruction. Written in an easy-to-read, clearly understandable style, it reviews the latest research on classroom management, addresses the current INTASC standards (nationally-recognized benchmarks for effective teaching), and offers readers a solid foundation for selecting one of the models presented to suit their own style and need. Case studies and scenarios place the reader into real classrooms with real learners, giving them a “snapshot” of these models in action. Coverage includes: classroom management as discipline (behavioral approaches, assertive discipline, positive discipline, and cooperative discipline); classroom management as system (reality therapy and choice therapy, discipline with dignity, building community, and classroom organization); classroom management as instruction (inner discipline, skillstreaming, conflict resolution and peer mediation, and judicious discipline); and developing a personal system (classroom management in a diverse society, and creating a personal system). An excellent resource for teachers of children of all ages and from all backgrounds; its comprehensive glossary and its coverage of INTASC standards makes this an invaluable reference tool.
