The Last Grizzly and Other Southwestern Bear Stories

This is a reproduction of the original artefact. Generally these books are created from careful scans of the original. This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. We're happy to make these classics available again for future generations to enjoy!

New Mexico Magazine

Recounts the author's experiences with the reclusive Tarahumara Indians, whose techniques allow them to run long distances with ease, and describes his training for a fifty-mile race with the tribe and a number of ultramarathoners.

Tracks Across New Mexico

This collection of true stories about grizzly and black bears in the greater southwest from the 1820s to present day demonstrates changing attitudes toward bears and the preservation of the animals and their habitats

iGila Libre!

"The new book Mapping Ecosystem Services provides a comprehensive collection of theories, methods and practical applications of ecosystem services (ES) mapping, for the first time bringing together valuable knowledge and techniques from leading international experts in the field." (www.eurekalert.org).

The Future of Arid Grasslands

Read Book Mogollon Mountain Man Nat Straw 1856 1941 Grizzly Hunter And Trapper

After years of cowboying, Charles A. Siringo had settled down to store-keeping in Caldwell, Kansas, when a blind phrenologist, traveling through, took the measure of his "mule head" and told him that he was "cut out" for detective work. Thereupon, Siringo joined the Pinkerton National Detective Agency in 1886. A Cowboy Detective chronicles his twenty-two years as an undercover operative in wilder parts of the West, where he rode with the lawless, using more stratagems and guises than Sherlock Holmes to bring them to justice and escaping violent death more often than Dick Tracy. He survived the labor riots at Coeur d'Alene, Idaho, in 1892 (his testimony helped convict eighteen union leaders), hounded moonshiners in the Appalachians, and chased Butch Cassidy's Wild Bunch. Once described as "a small wiry man, cold and steady as a rock" and "born without fear," Charlie Siringo became a favorite of high-ups in the Pinkerton organization. Nevertheless, the Pinkertons, ever sensitive to criticism, went to court to block publication of Siringo's book. Frank Morn, in his introduction to this Bison Books edition, discusses the changes that resulted from two years of litigation. Finally published in 1912 without Pinkerton in the title or the text, A Cowboy Detective has Siringo working for the "Dickensen Detective Agency" and meeting up with the likes of "Tim Corn," whom every western buff will recognize. The deeper truth of Siringo's book remains. As J. Frank Dobie wrote, "His cowboys and gunmen were not of Hollywood and folklore. He was an honest reporter."

The Fourth Wife

Meet Mr. Grizzly, first published in 1943, is the memoir of Montague Stevens – a Cambridge-educated Englishman who was a cattle-rancher in New Mexico, and who had a passion for hunting grizzly bears (with the help of his hunting dogs). The book chronicles some of his many adventures of hunting, dog- and horse-training, and on the natural history of the region. Included are 15 pages of illustrations.

U.S. History

From the author of Guns, Germs and Steel, Jared Diamond's Collapse: How Societies Choose to Fail or Survive is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's Collapse uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's Collapse also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

Contributions from the United States National Herbarium

A natural history of the jaguar that discusses its distribution, habitats, hunting and breeding characteristics, folklor, and the status and management of Arizona-Mexico borderland jaguars.

Contributions from the National Herbarium

The diverse people of the Hopi, whose name means "the peaceful ones," are today united on the Hopi Reservation, which is composed of 12 villages on more than 2,500 square miles in northeastern Arizona. In fact, the village of Orayvi is considered the oldest continuously inhabited settlement in the United States, dating back more than a millennium. Often referred to as a "corn culture," the Hopis have developed dry-farming techniques that have sustained them in the harsh, arid landscape, where annual precipitation is often only 12 inches or less. The Hopi people are hardworking and spiritual, and their lifestyle has survived for centuries, only minimally changed by influences from the outside world.

Gila Country Legend

If there was ever a "ring-tailed roarer" of the backwoods of New Mexico, he was Quentin Hulse (1926-2002). Hulse lived and worked most of his life at the bottom of Canyon Creek in the Gila River country of southwestern New Mexico, but his reputation spread far and wide. His western image appeared on a tourist postcard and souvenir license plate in the 1950s. Footage of a lion hunt led by Hulse and his hounds appeared on the Men's Channel in 2005, three years after his passing. Hulse grew up primarily in western New Mexico when that ranch and mining country was still remote and raw. At the age of ten he witnessed a point-blank shooting, the culmination of an old-fashioned frontier feud. He followed his parents between mines and towns until his father established a ranch at Canyon Creek. While serving in the navy during World War II, he landed on the bloody beach at Okinawa. After returning from the war, he was shot in a bar near Silver City during a night of carousing. Hulse was most at home in the rugged Gila Wilderness, in which he ranched and guided for fifty years. With compassion and nuance, Nancy Coggeshall tells the compelling biography of a unique western rancher constantly adjusting to the inroads of modernity into his traditional way of life. Drawing on oral history, archival sources, and her personal association with Hulse and the Gila, she brings this unique westerner, and New Mexican, to life.

Publications of the Texas Folklore Society

This book is a joint project of the Utah Division of Indian Affairs and the Utah State Historical Society. It is distributed to the book trade by Utah State University Press. The valleys, mountains, and deserts of Utah have been home to native peoples for thousands of years. Like peoples around the world, Utah's native inhabitants organized themselves in family units, groups, bands, clans, and tribes. Today, six Indian tribes in Utah are recognized as official entities. They include the Northwestern Shoshone, the Goshutes, the Paiutes, the Utes, the White Mesa or Southern Utes, and the Navajos (Dineh). Each tribe has its own government. Tribe members are citizens of Utah and the United States; however, lines of distinction both within the tribes and with the greater society at large have not always been clear. Migration, interaction, war, trade, intermarriage, common threats, and challenges have made relationships and affiliations more fluid than might be expected. In this volume, the editor and authors endeavor to write the history of Utah's first residents from an Indian perspective. An introductory chapter provides an overview of Utah's American Indians and a concluding chapter summarizes the issues and concerns of contemporary Indians and their leaders. Chapters on each of the six tribes look at origin stories, religion, politics, education, folkways, family life, social activities, economic issues, and important events. They provide an introduction to the rich heritage of Utah's native peoples. This book includes chapters by David Begay, Dennis Defa, Clifford Duncan, Ronald Holt, Nancy Maryboy, Robert McPherson, Mae Parry, Gary Tom, and Mary Jane Yazzie. Forrest Cuch was born and raised on the Uintah and Ouray Ute Indian Reservation in northeastern Utah. He graduated from Westminster College in 1973 with a

Read Book Mogollon Mountain Man Nat Straw 1856 1941 Grizzly Hunter And Trapper

bachelor of arts degree in behavioral sciences. He served as education director for the Ute Indian Tribe from 1973 to 1988. From 1988 to 1994 he was employed by the Wampanoag Tribe in Gay Head, Massachusetts, first as a planner and then as tribal administrator. Since October 1997 he has been director of the Utah Division of Indian Affairs.

Journal of a Trapper

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Mapping Ecosystem Services

Hopi Summer

Documents the story of the cross-cultural friendship between wealthy New Englander Maud Melville and Hopi potter Ethel Muchvo, who shared years of personal triumphs and sorrows as well as a traditional "Hopi summer" before tragic changes were inflicted on Pueblo culture, in an account based on diaries, letters, and personal photos. Original.

History Of Utah's American Indians

A Cowboy Detective

A biography and a complete bibliography of New Mexico's leading independent historian.

Marc Simmons of New Mexico

As the Ice Age waned, Clovis hunter-gatherers began to explore and colonize the area now known as Colorado. Their descendents and later Paleoindian migrants spread throughout Colorado's plains and mountains, adapting to diverse landforms and the changing climate. In this new volume, Robert H. Brunswig and Bonnie L. Pitblado assemble experts in archaeology, paleoecology-climatology, and paleofaunal analysis to share new discoveries about these ancient people of

Read Book Mogollon Mountain Man Nat Straw 1856 1941 Grizzly Hunter And Trapper

Colorado. The editors introduce the research with scientific context. A review of seventy-five years of Paleoindian archaeology in Colorado highlights the foundation on which new work builds, and a survey of Colorado's ancient climates and ecologies helps readers understand Paleoindian settlement patterns. Eight essays discuss archaeological evidence from Plains to high Rocky Mountain sites. The book offers the most thorough analysis to date of Dent--the first Clovis site discovered. Essays on mountain sites show how advances in methodology and technology have allowed scholars to reconstruct settlement patterns and changing lifeways in this challenging environment. Colorado has been home to key moments in human settlement and in the scientific study of our ancient past. Readers interested in the peopling of the New World as well as those passionate about the methods and history of archaeology will find new material and satisfying overviews in this book. Contributors include Rosa Maria Albert, Robert H. Brunswig, Reid A. Bryson, Linda Scott Cummings, James Doerner, Daniel C. Fisher, David L. Fox, Bonnie L. Pitblado, Jeffrey L. Saunders, Todd A. Surovell, R. A. Varney, and Nicole M. Waguespack.

A Book-lover's Holidays in the Open

Silver City

Frontiers in Colorado Paleoindian Archaeology

Silver City is located at the southern boundary of the vast Gila Wilderness in a region of soaring mountains, lush river valleys, and bountiful mineral deposits. Ancient ruins give evidence of prehistoric occupation, followed by a historic parade of Native Americans, Spaniards, Mexicans, miners, outlaws, and settlers, resulting in a community celebrating a rich cultural blend. When silver was discovered in 1870 at La Cienega de San Vicente, prospectors rushed in despite the danger from Apache Indians who traditionally occupied that land. Newcomers flooded into southwestern New Mexico Territory, and Silver City became the county seat the following year. Soon there were businesses, saloons, and homes. Silver City became the supply center for the widespread mining district with a brick plant and lumberyard. By 1883, a narrow-gauge railroad connected the town with the outside world.

An extraordinary story of forbidden love, set against the background of the Mexican Revolution.

America, History and Life

Assessment of Nontimber Forest Products in the United States Under Changing Conditions

A Book-Lover's Holidays in the Open is a classic literary work by Teddy Roosevelt which describes the US president's adventures in the great American outdoors. The man should have youth and strength who seeks adventure in the wide, waste spaces of the earth, in the marshes, and among the vast mountain masses, in the northern forests, amid the steaming jungles of the tropics, or on the deserts of sand or of snow. He must long greatly for the lonely winds that blow across the wilderness, and for sunrise and sunset over the rim of the empty world. His heart must thrill for the saddle and not for the hearthstone. He must be helmsman and chief, the cragsman, the rifleman, the boat steerer. He must be the wielder of axe and of paddle, the rider of fiery horses, the master of the craft that leaps through white water. His eye must be true and quick, his hand steady and strong. His heart must never fail nor his head grow bewildered, whether he face brute and human foes, or the frowning strength of hostile nature, or the awful fear that grips those who are lost in trackless lands.

Men Who Matched the Mountains

Flora of New Mexico

Meet Mr. Grizzly

For many years farmers and ranchers have been building ponds for livestock water and for irrigation. By 1980 more than 2.1 million ponds had been built in the United States by land users on privately owned land. More will be needed in the future. The demand for water has increased tremendously in recent years, and ponds are one of the most reliable and economical sources of water. Ponds are now serving a variety of purposes, including water for livestock and for irrigation, fish production, field and orchard spraying, fire protection, energy conservation, wildlife habitat, recreation, erosion control, and landscape improvement. This handbook describes

embankment and excavated ponds and outlines the requirements for building each. The information comes from the field experience and observation of land users, engineers, conservationists, and other specialists.

The Hopi People

The Americans

Born to Run

The aim of this book is to update knowledge and summarise recent research on pseudocereals, particularly regarding their botanical characteristics, composition, structure, use, production, technology and impact on human health. In the last few years, pseudocereals – in particular amaranth and quinoa – have acquired increased importance (which is also due to the increased demand for gluten-free food). Worldwide, the demand for amaranth and quinoa has risen immensely, as seen in rising prices for amaranth and quinoa. At the same time, research in all relevant fields has intensified. At present there is some confusion surrounding the term ‘pseudocereals’ and what it does and does not include, for example kiwicha which is *Amaranthus caudatus* or kaniwa which is *Chenopodium pallidicaule*. Sometimes other grains are included in the pseudocereal group like chia (*Salvia hispanica* L), an oleaginous seed. One of the aims of the book is to clear up some of the confusion over what is included in the group of pseudocereals. The book will include: the origin, production and utilization of pseudocereals; structure and composition of kernels; carbohydrates/fibre/bioactive compounds of kernels; proteins and amino acids of kernels; lipids of kernels; pseudocereal dry and wet milling: processes, products and applications; food uses of whole pseudocereals; pseudocereals in gluten free products; and the nutritional and health implications of pseudocereal intake.

Borderland Jaguars

Nontimber forest products (NTFPs) are fundamental to the functioning of healthy forests and play vital roles in the cultures and economies of the people of the United States. However, these plants and fungi used for food, medicine, and other purposes have not been fully incorporated into management, policy, and resource valuation. This report is a forest-sectorwide assessment of the state of the knowledge regarding NTFPs science and management information for U.S. forests and rangelands (and hereafter referred to as the NTFP assessment). The NTFP assessment serves as a baseline science synthesis and provides information for managing nontimber forest resources in the United States. In addition, this NTFP assessment provides information for national-level reporting on natural capital and the ecosystem services NTFPs provide. The report also provides technical input to the 2017 National Climate Assessment (NCA) under development by the U.S. Global Change Research Program (USGCRP).
