For every dollar owned by the average white family in the United States, the average family of color has less than a dime. Why do people of color have so little wealth? *The Color of Wealth* lays bare a dirty secret: for centuries, people of color have been barred by laws and by discrimination from participating in government wealth-building programs that benefit white Americans. Written by five leading experts on the racial wealth divide who recount the asset-building histories of Native Americans, Latinos, African Americans, Asian Americans, and European Americans, this book is a uniquely comprehensive multicultural history of American wealth. With its focus on public policies—how, for example, many post-World War II GI Bill programs helped whites only—*The Color of Wealth* is the first book to demonstrate the decisive influence of government on Americans' net worth.

An increasing number of students and professionals are choosing to travel the globe to engage with the realities of trauma and human suffering through mental health aid. But in the field of global mental health, good intentions are not enough to ensure good training, development, and care. The risk of harm is real when outsiders deliver mental health aid in culturally inappropriate and otherwise naïve ways. This book, based on the experiences of the co-editors and their colleagues at Burma Border Projects (BBP), a nonprofit organization dedicated to the mental health and psychosocial well-being of the displaced people of Burma, sets out global mental health theory allied with local perspectives, experiences, real-life challenges, strengths, and best practices. Topics include assessment and intervention protocols, vulnerable groups and the special challenges they present, and supervision and evaluation programs. An introduction by the editors establishes the political and health contexts for the volume. Written in a style appropriate for academic audiences and lay readers, this book will serve as a fundamental text for clinicians, interns, volunteers, and researchers who work in regions of the world that have suffered the violence of war, forced displacement, human rights violations, poverty, and oppression.

Family Assessment

Historians have long discussed the interracial families of prominent slave dealers in Richmond, Virginia, and elsewhere, yet, until now, the story of slave trader Bacon Tait remained untold. Among the most prominent and wealthy citizens of Richmond, Bacon Tait embarked upon a striking and unexpected double life: that of a white slave trader married to a free black woman. In *The Secret Life of Bacon Tait*, Hank Trent tells Tait's complete story for the first time, reconstructing the hidden aspects of his strange and often paradoxical life through meticulous research in lawsuits, newspapers, deeds, and other original records. Active and ambitious in a career notorious even among slave owners for its viciousness, Bacon Tait nevertheless claimed to be married to a free woman of color, Courtney Fountain, whose extended family were involved in the abolitionist movement and the Underground Railroad. As Trent reveals, Bacon Tait maintained his domestic sphere as a loving husband and father in a mixed-race family in the North while running a successful and ruthless slave-trading business in the South. Though he possessed legal control over thousands of other black women at different times, Trent argues that Tait remained loyal to his wife, avoiding the predatory sexual practices of many slave traders. No less remarkably, Courtney Tait and their four children received the benefits of Tait's wealth while remaining close to her family of origin, many of whom spoke out against the practice of slavery and even fought in the Civil War on the side of the Union. In a fascinating display of historical detective work, Trent illuminates the worlds Bacon Tait and his family inhabited, from the complex partnerships and rivalries among slave traders to the anxieties surrounding free black populations in Courtney and Bacon Tait's adopted city of Salem, Massachusetts. Tait's double life illuminates the complex interplay of control, manipulation, love, hate, denigration, and respect among interracial families, all within the larger context of a society that revolved around the enslavement of black Americans by white traders.

There is no denying that race is a critical issue in understanding the South. However, this concluding volume of The New Encyclopedia of Southern Culture challenges previous understandings, revealing the region's rich, ever-expanding diversity and providing new explorations of race relations. In 36 thematic and 29 topical essays, contributors examine such subjects as the Tuskegee Syphilis Study, Japanese American incarceration in the South, relations between African Americans and Native Americans, Chinese men adopting Mexican identities, Latino religious practices, and Vietnamese life in the region. Together the essays paint a nuanced portrait of how concepts of race in the South have influenced its history, art, politics, and culture beyond the familiar binary of black and white.

Yellow Wife

Analyzing published and archival oral histories of formerly enslaved African Americans, Libra R. Hilde explores the meanings of manhood and fatherhood during and after the era of slavery, demonstrating that black men and women articulated a surprisingly broad and consistent vision of paternal duty across more than a century. Complicating the tendency among historians to conflate masculinity within slavery with heroic resistance, Hilde emphasizes that, while some enslaved men openly rebelled, many chose subtle forms of resistance in the context of family and local community. She explains how a significant number of enslaved men served as caretakers to their children and shaped their lives and identities. From the standpoint of enslavers, this was particularly threatening--a man who fed his children built up the master's property, but a man who fed them notions of autonomy put cracks in the edifice of slavery. Fatherhood highlighted the agonizing

contradictions of the condition of enslavement, and to be an involved father was to face intractable dilemmas, yet many men tried. By telling the story of the often quietly heroic efforts that enslaved men undertook to be fathers, Hilde reveals how formerly enslaved African Americans evaluated their fathers (including white fathers) and envisioned an honorable manhood.

The Business of Slavery and the Rise of American Capitalism, 1815-1860

"The Dred Scott suit for freedom, argues Kelly M. Kennington, was merely the most famous example of a phenomenon that was more widespread in antebellum American jurisprudence than is generally recognized. The author draws on the case files of more than three hundred enslaved individuals who, like Dred Scott and his family, sued for freedom in the local legal arena of St. Louis. Her findings open new perspectives on the legal culture of slavery and the negotiated processes involved in freedom suits. As a gateway to the American West, a major port on both the Mississippi and Missouri Rivers, and a focal point in the rancorous national debate over slavery's expansion, St. Louis was an ideal place for enslaved individuals to challenge the legal systems and, by extension, the social systems that held them in forced servitude. Kennington offers an in-depth look at how daily interactions, webs of relationships, and arguments presented in court shaped and reshaped legal debates and public attitudes over slavery and freedom in St. Louis. Kennington also surveys more than eight hundred state supreme court freedom suits from around the United States to situate the St. Louis example in a broader context."--Back cover.

Families, Health & Illness

Through a case study of community organizing in the global city of London and an examination of the legacy of Saul Alinsky around the world, this book develops a constructive account of the relationship between religious diversity, democratic citizenship, and economic and political accountability. Based on an in-depth, ethnographic study, Part I identifies and depicts a consociational, populist and post-secular vision of democratic citizenship by reflecting on the different strands of thought and practice that feed into and help constitute community organizing. Particular attention is given to how organizing mediates the relationship between Christianity, Islam and Judaism and those without a religious commitment in order to forge a common life. Part II then unpacks the implications of this vision for how we respond to the spheres in which citizenship is enacted, namely, civil society, the sovereign nation-state, and the globalized economy. Overall, the book outlines a way of re-imagining democracy, developing innovative public policy, and addressing poverty in the contemporary context.

Children don't arrive with an instruction book. Raising children and providing for their physical as well as emotional needs is a difficult job for which we receive little training. It should not be surprising that parenting has become isolating, frustrating and often robs both parent and child of the joy and satisfaction of this critical life experience. We often approach parenting reflexively, relying on what we learned from how we were parented. "Family Centered Parenting" offers families a model which will help parents develop a parenting style that reflects their unique values while providing guidelines, strategies and specific tools necessary to make thoughtful decisions about their parenting options. "Family Centered Parenting" is more than just a narrative, it contains real-life examples, dialogues and activities to help parents refine their skills and grow in confidence as they navigate the parenting journey. "Family Centered Parenting" is more a process than a program and is sufficiently flexible to be adapted to a variety of family situations--single parents, special needs children, gifted and talented children, blended families and ranges in age of children. "Family Centered Parenting" implementing effective communication principles, strategies to hold essential family meetings, discipline techniques that stress individual responsibility and information on responding to unique family needs. The ultimate goal of "Family Centered Parenting" is to create a family structure which is empowering to both parent and child and leads to a harmonious and joyful family life.

Family Finances for the Flabbergasted

In 1780 Richard Sheridan noted that merchants worked 'merely for money'. However, rather than being a criticism, this was recognition of the important commercial role that merchants played in the British empire at this time. Of course, merchants desired and often made profits, but they were strictly bound by commonly-understood socio-cultural norms which formed a private-order institution of a robust business culture. In order to elucidate this business culture, this book examines the themes of risk, trust, reputation, obligation, networks and crises to demonstrate how contemporary merchants perceived and dealt with one another and managed their businesses. Merchants were able to take risks and build trust, but concerns about reputation and fulfilling obligations constrained economic opportunism. By relating these themes to an array of primary sources from ports around the British-Atlantic world, this book provides a more nuanced understanding of business culture during this period. A theme which runs throughout the book is the mercantile community as a whole and its relationship with the state. This was an important element in the British business culture of this period, although this relationship came under stress towards the end of period, forming a crisis in itself. This book argues that the business culture of the British-Atlantic mercantile community not only facilitated the conduct of day-to-day business, but also helped it to cope with short-term crises and long-term changes. This facilitated the success of the British-Atlantic economy even within the context of changing geo-politics and an under-institutionalised environment. Not working 'merely for money' was a successful business model.
