Netter's Advanced Head and Neck Flash Cards E-Book

Featuring an array of coloring and labeling activities, Dental Anatomy Coloring Book, 2nd Edition, provides an easy, fun, and effective way to memorize the structures of the head and neck region as well as the basic body systems affecting dentistry. Each chapter includes several images that you are asked to color and connect with corresponding labels. This edition adds more illustrations and NEW review questions with references to specific chapters in core textbooks where more in-depth explanations can be found. Developed by Margaret Fehrenbach, a nationally renowned authority in dental professional education, this coloring book makes it easier to identify anatomical landmarks and understand the complex interrelationships involved in dental anatomy and physiology. A comprehensive focus on dental anatomy covers all the structures of head and neck anatomy and the basic body systems that are essential to the practice of dentistry, with varying views of structures, including differing orientations and levels of detail. An easy-to-follow organization begins with an overview of body systems and then breaks down dental anatomy in the following chapters, providing information in small chunks and providing a clear picture of interrelationships. 220 detailed anatomical illustrations, including corresponding labels, make both coloring and identification easy. Perforated pages allow for easy removal so that you can study pages while on the go or submit them to your instructors. NEW! Review questions are included with each illustration - 10 fill-in-the-blank questions based on the content in two

various parts and systems of the human body, your search ends here! Anatomy Coloring Book for Health Professions is a fresh, fun way for students to grasp the big picture of human anatomy through a regional approach (head and neck and limbs). Anatomy Coloring Book for Health Professions is designed for the most effective learning possible: The left-hand page features a numerated structure list. The right-hand page has illustrations correlating to the numerated structure list. Simply choose a color and shade in a term on the left and the correlated structure on the right. Repeat for each structure in the list. White space is provided to enable you to transfer anatomy and clinical information from your lecture notes to the appropriate illustration or term. After an illustration is fully colored and notes have been transferred you will have created your own personalized textbook specific to your anatomy course! You will find that coloring imprints on your mind the shape and location of each body part, making later visualization much easier. The connection between eye and hand when coloring anatomic structures will prove to be an active and effective way to learn human anatomy.
