A GLOSSARY

A former Navy SEAL and current bad boy bar owner learns to trust a free spirit in this steamy novel of unexpected romance from the bestselling author of *Body Shot* and the *Heller Brothers* series. Marco Solis knows that if he gets too close to people they disappear. His parents were deported back to Mexico when he was fourteen, his fiancée married someone else while he was in the military, and now his business partner's spending more time with his girl than with Marco. For better or worse, that's how Marco meets Carrie Garner. She's legitimately model-hot. She's also a nut—a wild, artsy, unapproachable nut. So why is Marco so interested in cracking her shell? Although Carrie Garner is a natural in front of the camera, her dream is to make it as a photographer. Soon she'll be heading to Spain for design school, and she'll miss her best friend, Hayden, like crazy. She'll even miss Hayden's boyfriend, Beck—but she won't miss Beck's partner, Marco. Bossy, brooding, and annoyingly sexy, Marco really pushes her buttons, though he obviously wouldn't mind pushing her buttons in an up-against-the-wall, hard-and-fast kind of way. The craziest part is, if Carrie lets him do that, well . . . she may never want to leave. Twelve

New York Times Notable Book: "An exceptional, assured debut [that] captures the zeitgeist of confused adolescents and a sick culture post-Columbine."—Hartford Courant A national bestseller that inspired a major motion picture, this chilling novel follows prep school dropout White Mike through the week between Christmas and New Year's 1999, as he deals an alluring new drug to his privileged peers on Manhattan's Upper East Side. The kids of Twelve have it all; Chris and Claude and Hunter and Laura have the best, and most, of everything, but are constantly looking for something more exotic, and more dangerous. But Twelve is not a coming-of-age story, because these kids never had a childhood—their parents are off

on holiday in Bali or business in Brussels, leaving hired help to look the other way as the kids stay home alone in their multimillion-dollar town houses, partying, surrounded by drugs and sex—and, in the end, much worse. “Renders Manhattan’s cosseted Upper East Side with both the casual authority of an insider and the wry distance of an observer...impressive.”—Jennifer Egan, *The New York Times Book Review* “Riveting in its no-holds-barred depiction of teenage nihilism.”—Jon Land, *Providence Journal*

At the height of the Great Depression three fun-loving young musicians from the flatlands of Central Indiana began broadcasting a fifteen minute daily radio show on WOWO in Fort Wayne. Veterans of the vaudeville circuits, they performed without pay to promote local appearances for \$15 per night. The show quickly drew a large following and this led to an opportunity to join the WLS National Barn Dance in Chicago. Their happy, sometimes zany antics proved to be exactly what a Depression-weary country needed. The line that began many of their songs, "Are you ready, Hezzie?" became part of the American lexicon. The Hoosier Hot Shots went on to make hundreds of phonograph records, appear in 22 movies and have their own nationwide radio show. This account of their boy-makes-good lives includes more than 80 photos, illustrations, letters written by one of the original Hot Shots, movie highlights, a discography and more.

Hotshot

The true story behind the events that inspired the major motion picture Only the Brave. A "unique and bracing" (Booklist) first-person account by the sole survivor of Arizona's disastrous 2013 Yarnell Hill Fire, which took the lives of 19 "hotshots"--firefighters trained specifically to battle wildfires. Brendan McDonough was on the verge of becoming a hopeless, inveterate heroin addict when he, for the sake of his young daughter, decided to turn his life around. He enlisted in the Granite Mountain Hotshots, a team of elite firefighters based in Prescott, Arizona. Their leader, Eric Marsh, was in a desperate crunch after four hotshots left the unit, and perhaps seeing a glimmer of promise in the skinny would-be recruit, he took a chance on the unlikely McDonough, and the chance paid off. Despite the crew's skepticism, and thanks in large part to Marsh's firm but loving encouragement, McDonough unlocked a latent drive and dedication, going on to successfully battle a number of blazes and eventually win the confidence of the men he came to call his brothers. Then, on June 30, 2013, while McDonough--"Donut" as he'd been dubbed by his team--served as lookout, they confronted a freak, 3,000-degree inferno in nearby Yarnell, Arizona. The relentless firestorm ultimately trapped his hotshot brothers, tragically killing all 19 of them within minutes. Nationwide, it was the greatest loss of firefighter lives since the 9/11 attacks. Granite

Mountain is a gripping memoir that traces McDonough's story of finding his way out of the dead end of drugs, finding his purpose among the Granite Mountain Hotshots, and the minute-by-minute account of the fateful day he lost the very men who had saved him. A harrowing and redemptive tale of resilience in the face of tragedy, Granite Mountain is also a powerful reminder of the heroism of the people who put themselves in harm's way to protect us every day.

Never Home Alone

Annabeth Albert's Hotshots series continues—the emotions and intensity of Chicago Fire with the raw, natural elements of Man vs. Wild. Smoke jumping is Garrick Nelson's life. Nothing, not severe injuries nor the brutal physical therapy that follows, is going to stop him from getting back with his crew. But when a lost dog shows up on his front porch, he can't turn her away, and he can't take care of her on his own. Thankfully, help comes in the form of his new sexy, dog-loving neighbor. As they work together, trying to re-home their little princess, Garrick can't resist his growing attraction for the other man, even though he knows this guy isn't the staying type. Rain Fisher doesn't take anything too seriously. He dances through life, one adventure at a time, never settling in one place for too long. When his hot, conveniently buff, neighbor shows up on his doorstep, dog in tow, Rain's determined to not just save the adorable puppy, but her reluctant owner as well. He never expects their flirtation might tempt him into stay put once and for all. Danger lurks everywhere for Central Oregon's fire crews, but the biggest risk of all might be losing their hearts. Don't miss the Hotshots series from Annabeth Albert: Burn Zone, High Heat, and Feel the Fire.

From two of the world's top scientists and one of the world's top science writers (all parents), *Dirt Is Good* is a q&a-based guide to everything you need to know about kids & germs. "Is it OK for my child to eat dirt?" That's just one of the many questions authors Jack Gilbert and Rob Knight are bombarded with every week from parents all over the world. They've heard everything from "My two-year-old gets constant ear infections. Should I give her antibiotics? Or probiotics?" to "I heard that my son's asthma was caused by a lack of microbial exposure. Is this true, and if so what can I do about it now?" Google these questions, and you'll be overwhelmed with answers. The internet is rife with speculation and misinformation

about the risks and benefits of what most parents think of as simply germs, but which scientists now call the microbiome: the combined activity of all the tiny organisms inside our bodies and the surrounding environment that have an enormous impact on our health and well-being. Who better to turn to for answers than Drs. Gilbert and Knight, two of the top scientists leading the investigation into the microbiome—an investigation that is producing fascinating discoveries and bringing answers to parents who want to do the best for their young children. *Dirt Is Good* is a comprehensive, authoritative, accessible guide you've been searching for.

She Explores

A natural history of the wilderness in our homes, from the microbes in our showers to the crickets in our basements. Even when the floors are sparkling clean and the house seems silent, our domestic domain is wild beyond imagination. In *Never Home Alone*, biologist Rob Dunn introduces us to the nearly 200,000 species living with us in our own homes, from the Egyptian meal moths in our cupboards and camel crickets in our basements to the lactobacillus lounging on our kitchen counters. You are not alone. Yet, as we obsess over sterilizing our homes and separating our spaces from nature, we are unwittingly cultivating an entirely new playground for evolution. These changes are reshaping the organisms that live with us -- prompting some to become more dangerous, while undermining those species that benefit our bodies or help us keep more threatening organisms at bay. No one who reads this engrossing, revelatory book will look at their homes in the same way again.
