Peritoneal dialysis (PD) is in widespread use for the treatment of acute and chronic renal failure. A considerable amount of knowledge about the various procedures and problems associated with this form of treatment has accumulated over recent years, particularly since the introduction of continuous ambulatory peritoneal dialysis (CAPD). However to date the information regarding the more technical or

practical aspects of PD has been largely scattered in various books and journals. There appears to be no straightforward text concerned with these points suitable for recommending to junior doctors or nurses dealing with patients receiving this therapy. Though in-house-training is of considerable value it takes time and I have noticed that on a number of occasions in our own unit, technical problems with PD have not been dealt with quickly because of lack of knowledge in the staff on duty. There thus appeared to me to be a need for a short book giving firm advice on how to perform the various procedures and how to deal with problems as they arose. This manual is an attempt to fulfil that aim. Initially it was tried and tested on the renal unit in the Cardiff Royal Infirmary for 3 years. Prior to publishing it has been extensively revised and updated.

Most people have prayed for something or someone in earnest, seeking God's will, only to be left confused by God's response. Sometimes we ask, "Why would a good God allow bad things to happen to good people?" In *Amazed and Confused*, Heather Zempel tackles this question head-on by exploring the book of

Habakkuk. When the prophet Habakkuk prayed that God would bring change to the backsliding nation of Israel, this issue came to the forefront. Habakkuk begged God for revival and that He would turn the hearts of faithless people back to Him. God's answer to Habakkuk was, "Take a look at the nations and watch what happens! You will be shocked and amazed" (1:5, The Voice). The vision God gave Habakkuk was one of warfare and exile. How do you respond when God answers your prayers in a way that seems out of line with his character and promises? Amazed and Confused proceeds systematically through the book of Habakkuk, exploring the prophet's prayer, God's response, and the prophet's journey from confusion to worship. This interactive Bible study is the perfect choice for those who are hurting and confused about God's responses to their prayers. Features include: Helpful guidance on a question without an easy answer Practical tools for studying the Minor Prophets Easy-to-understand, accessible language

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the

world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and

present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

This eye-opening, insightful exploration of Sufism, the spiritual tradition that has supported Islam for more than a thousand years, shows why it offers a promising foundation for reconciliation between the Western and Muslim worlds. Many Americans today identify Islam with maniacal hatred of the West. The Other Islam transforms this image and opens the way to finding common ground in our troubled times. Sufism, a blend of the mystical and rational tendencies within Islam, emerged soon after the revelation of Muhammad. A reforming movement against the increasing worldliness of Muslim society, it focuses on Islam's spiritual dimension. Described as "Islam of the Heart," Sufism has attracted adherents among both Sunni and Shi'a Muslims, as well as Jews, Christians, Hindus, and Buddhists. In *The Other Islam*, Stephen Schwartz traces the origins and history of Sufism, elucidates its teachings, and illustrates its links to the other religions. He comments on such celebrated Sufi poets and philosophers as Rumi and Al-Ghazali, and narrates their influence on the Kabbalah, on the descendants of the Jewish philosopher Maimonides, and on Christian mystics like Saint John of the Cross and Saint Teresa of Ávila as well as the American transcendentalists. Furthermore,

Schwartz presents a fresh survey of Sufism in today's Islamic world, anticipating an intellectual renaissance of the faith and alternatives to fundamentalism and tyranny in Iraq, Saudi Arabia, Turkey, and Iran.

While perturbative QCD methods fully describe experimental results at high energies, and chiral perturbation theory is the low energy effective theory of the strong interactions, a form of duality is observed connecting these two regimes. In these intermediate kinematics, a wide variety of reactions are observed which can be described simultaneously by single particle (quark) scattering, and by exclusive resonance (hadron) scattering. The contributions in this proceedings volume discuss recent and existing results, and aim to foster current and future research, investigating the phenomenon of quark-hadron duality. This unique volume contains research work by scientists from different arenas of hadronic physics, dealing with different manifestations of quark-hadron duality.

"Old maps lead you to strange and unexpected places, and none does so more ineluctably than the subject of this book: the giant, beguiling Waldseemüller world map of 1507." So begins this remarkable story of the map that gave America its name. For millennia Europeans believed that the world consisted of three parts: Europe, Africa, and

Asia. They drew the three continents in countless shapes and sizes on their maps, but occasionally they hinted at the existence of a "fourth part of the world," a mysterious, inaccessible place, separated from the rest by a vast expanse of ocean. It was a land of myth—until 1507, that is, when Martin Waldseemüller and Matthias Ringmann, two obscure scholars working in the mountains of eastern France, made it real. Columbus had died the year before convinced that he had sailed to Asia, but Waldseemüller and Ringmann, after reading about the Atlantic discoveries of Columbus's contemporary Amerigo Vespucci, came to a startling conclusion: Vespucci had reached the fourth part of the world. To celebrate his achievement, Waldseemüller and Ringmann printed a huge map, for the first time showing the New World surrounded by water and distinct from Asia, and in Vespucci's honor they gave this New World a name: America. The Fourth Part of the World is the story behind that map, a thrilling saga of geographical and intellectual exploration, full of outsize thinkers and voyages. Taking a kaleidoscopic approach, Toby Lester traces the origins of our modern worldview. His narrative sweeps across continents and centuries, zeroing in on different portions of the map to reveal strands of ancient legend, Biblical prophecy, classical learning, medieval exploration, imperial ambitions, and more. In Lester's telling the map comes alive: Marco Polo and the early Christian missionaries trek across Central Asia and China; Europe's early humanists travel to monastic libraries to recover ancient texts; Portuguese merchants round up the first West African slaves; Christopher Columbus and Amerigo Vespucci make

their epic voyages of discovery; and finally, vitally, Nicholas Copernicus makes an appearance, deducing from the new geography shown on the Waldseemüller map that the earth could not lie at the center of the cosmos. The map literally altered humanity's worldview. One thousand copies of the map were printed, yet only one remains. Discovered accidentally in 1901 in the library of a German castle it was bought in 2003 for the unprecedented sum of \$10 million by the Library of Congress, where it is now on permanent public display. Lavishly illustrated with rare maps and diagrams, *The Fourth Part of the World* is the story of that map: the dazzling story of the geographical and intellectual journeys that have helped us decipher our world.

To the admirer of farm machinery in all its gritty splendor, the tractor is more than the mechanical workhorse of the modern field. It is a testament to American know-how, a work of mechanical art truly in the American grain. Among these hard-working machines, Ford tractors hold a special place after nearly a century of bringing innovation, dependability, and good old American muscle to farms and fields worldwide. This book provides a hands-on guide to restoring these venerable machines from the ground up, from the first models made to those produced as recently as 1965. With hundreds of full-color photographs, the guide is not just clear and easy-to-follow, but also a feast for the eyes for tractor aficionados. Beginning at the beginning--how to

In straightforward terms he covers everything from troubleshooting and disassembly to engine and gearbox rebuilds, electrical work, reassembly, painting, and post-restoration care and maintenance. Informative photographs and proven tips, techniques, and money-saving advice from experienced restorers make the book an invaluable resource for amateur mechanic and professional alike. Also included is an appendix listing sources for parts, decals, tires, etc., as well as addresses for tractor clubs and collector associations.

### **Little Sheep Gets Lost**

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Just before the start of the 2002 Wales v Scotland match in Cardiff, the stadium announcer asked people to stand and acknowledge Bill McLaren's great contribution to the sport. The whole ground rose, leaving McLaren choking back the tears. Then came a voice in his ear: 'Cue, Bill' Coping with his emotions on that day was obviously not straightforward, even for a commentator of Bill McLaren's experience, used to being caught up in some of the most dramatic moments rugby has ever seen. But Bill also talks frankly about the greatest tragedy of his life: the death of his younger daughter from cancer at 46, the three years of agony and the trauma of her final day. Bill wanted to stay at her bedside but she insisted he go and carry out a commentating duty in Edinburgh on the Saturday afternoon. He did so, rushed back to the hospital, but she had died that afternoon while he was on air. McLaren, himself, had almost died of TB in his youth and he tells of the days and nights when he hid under the sheets in bed at the Scottish hospital where he was kept for 19 months, 'crying myself to sleep each night as they took away my friends who had died that day. I was certain I would be next'. He has excellent memories of his war years and delves deep to recall some harrowing times as a forward observation spotter when he came within inches of being killed by a German sniper. Later, he also

remembers leading his men one day into a small northern Italian town where they discovered 1500 corpses piled up in the square. 'That was the day I became a man, rather quickly,' he says. He was 21. As well reliving the highlights of his illustrious career as a commentator, Bill talks of the game today and his regrets that rugby went professional. He is a fierce critic of what this has led to and fears for the future health and safety of rugby players because he regards the modern game as dangerously physical. His story amounts to a history of the game itself and reaffirms McLaren's status as something of a global treasure.

The Guenther family appears to have originated in Switzerland. Members of the family converted to the Anabaptist movement and were forced to flee first to Moravia and later to the valley of the Vistula in Poland and west Prussia. Eventually members of the family became Mennonites and moved to the Ukraine where a number of Germans were settling. One of the Guenthers to move there was Franz Günther (1827-1900) who married Maria Warkentin and was the father of six children. In 1878 Franz, Maria and four of their children immigrated to America. The definitive book on steak has never been written—until now. "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence—Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley—where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs—a breed revived by the Nazis after four hundred years of extinction—Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, *Steak* is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

French Aeroplanes Before the Great War is a catalog of the aeroplanes of the nearly 700 French builders who worked before the onset of World War I. Most of these aeroplanes flew â some did not â some were never even finished â but all of them reflect the extraordinary vitality and sense of optimism that powered the aeronautical world before the future of the aeroplane began to become clearer in wartime. If the Wrights had not flown in 1903, one of the early French builders would very quickly have won the laurels for the first flight. Some of the machines appear in these pages probably for the first time in print; others are rarely seen. This collection serves as a kind of super Exposition Internationale de Locomotion Aérienne; readers are invited to enter the Grand Palais, as they might have in 1908 or 1909, to enjoy these marvelous aircraft.
