### **The Making of the New Spirituality**

1904 in three parts - Astrology, Chiromancy, and Physiognomy. Also, chapters on the significance of the moles of the body astrologically considered, the mystical wheel of Pythagoras and the methods of working it. Content: Astrology, the Alphabet of AS.

### **The David Suzuki Reader**

Uses the two sides of the human brain as a metaphor for understanding how the information age came about throughout the course of the past generation, counseling readers on how to survive and find a place in a society that is marked by rising affluence, job outsourcing, and computer technology at the expense of inventiveness, empathy, and meaning. 35,000 first printing.

### **Hope Points North**

To the "natural thinker" the supernatural is unnatural. But to the person with a renewed mind, the supernatural becomes the new normal! In this book you will learn how to renew your mind so that kingdom power becomes natural to you. You will learn how to overcome ordinary thinking and expectations, and how to connect to heaven and release kingdom power that flows through you so that you can create miracles and blessings for yourself and for others - in all areas of life. You no longer will have to endure pain, suffering, illnesses, unhappiness, loneliness, financial problems, nor any other problem. This book will show you how to eliminate these afflictions through the release of kingdom power the betterment of yourself,

your loved ones and mankind! This book reveals the only way to release supernatural power and blessings into our life without engaging in dangerous occult practices and reaping the unwelcome consequences thereof. Once we let go of traditional thinking and ordinary thinking and replenish our minds with the true words of God, then we are connected to heaven and kingdom power can flow through us so that we can create miracles for ourselves and other. Do you REALLY believe in miracles? Do you know anybody who does? Is there Supernatural evidence of God's presence today on earth? We will reveal much evidence in this book. The supernatural is difficult to accept or witness if you have a "natural" mindset. When you operate and live in the natural your mind refuses to accept anything that is supernatural. We can experience the kingdom of God right here in the now when we plug into supernatural power from heaven. When the Lord went to heaven he delegated to you and I (the church) the honor to expand his kingdom throughout the earth. The gospel of the kingdom is supernatural because it brings heaven down to earth. God is a supernatural God and when we are connected with him we become his representatives to release supernatural power to administer his works here on earth. In heaven the supernatural is the normal. Heaven is not this place way out of reach in outer space. Heaven can exist here and now! Invisible heaven becomes visible here and now when others witness miracles and healing before their very eyes, through the works of empowered individuals.

## **Waking Remembering**

New York Times Bestseller An exciting--and encouraging--exploration of creativity from the author of When: The Scientific Secrets of Perfect Timing The future belongs to a different kind of person with a different kind of mind: artists, inventors, storytellers-creative and holistic "right-brain" thinkers whose abilities mark the fault line between who gets ahead and who doesn't. Drawing on research from around the world, Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others) outlines the six fundamentally human abilities that are absolute essentials for professional success and personal fulfillment--and reveals how to master them. A Whole New Mind takes readers to a daring new place, and a provocative and necessary new way of thinking about a future that's already here.

## **Zompoc Survivor**

\*\*\*A Reader Views Award winner and Eric Hoffer Award finalist\*\*\* The Dark Forest is moving and a horde of bloodthirsty monsters is on the hunt. For the peaceful denizens of Erla, time is running out. Two thousand years have passed since the three clans fled the world of humans through Eon's Door to find sanctuary in a realm called Erla, and now a prophecy left to them by the ancient race that created the tree portal is coming true. A trusted sage has stolen the portal's key and is using the awesome power that separated the worlds to tear apart the very soul of Nature. The key must be taken back and Eon's Door closed--before it's too late. Hope lies with a "child of doubt" from the world the clans left behind and the courageous

young Erlan who's been sent to find him. Together they must retrieve the key and close Eon's Door. It won't be easy. Abominations of beasts and trees stand between them and their goal. Even worse, the sage knows the prophecy and is expecting them. "Avatar meets The Lord of the Rings." "A captivating storyline with a lovely surprise at the end beautiful imagery, and a great read." Sift Book Reviews

## **The Rock of the Lion**

Talsy and Chanter return to the peaceful vale, where she gives birth to his son - a creature of the chaos. Travain has stunted Mujar powers and a Trueman personality, making him dangerous and unpredictable, and he is also angry at his father's apparent neglect. Mujar, however, do not care for their children, who are born fully formed and independent. Travain grows quickly, and is everything Chanter warned Talsy he might be. Chanter finds the last piece of the broken Staff of Law and makes it whole, but the laws are lost. His first son is born on the eastern continent they left behind so long ago, but he is blinded by strange golden lights in his mind. He names himself Law, and finds shelter in a hive of semi-ants. The next generation are manants, and attack him, forcing Law to flee into the chaos. In his search for shelter, he travels to the western continent, where Truemen capture him. The wind informs Chanter of his plight, and Talsy insists that they save him. That means venturing into the chaos once more, and now it is far worse than it was before.

## **Love Rises**

Reproduction of the original: A Journey in Other Worlds by John Jacob Astor

## **The Ark of Asylum**

New Brain, New World uses cutting-edge brain research to show how the ongoing evolution of the human brain could bring about a shift in human consciousness, ultimately creating a better world. We all know that over millions of years the human brain has evolved in many significant ways - so why would we assume that this process is not still happening? Based on a lifetime of research into brain function, the science of consciousness, and brain wave training, this book looks at how our brains may yet evolve, and the exciting implications that these developments may have for human consciousness. The author maintains that the global crisis facing us is basically a crisis of consciousness, and it is the human ego with its destructive feelings and insatiable greed that stands in the way of a new and better world. He believes that the evolution of the human brain can make that world a reality. This book explores: • the science of consciousness • the evolution of the human brain - how it has developed over millions of years, and how there is a huge potential latent in the part of the brain called the frontal cortex • expanding human consciousness - the effects on the brain of meditation, feeling release therapy,

and the drinking of ayahuasca • kundalini: an evolutionary energy in man • awareness as a driving force in consciousness development - how we can play our own parts in helping our brains to evolve and access higher levels of consciousness by using alpha brain wave training for body-awareness and 'grounding', and frontal gamma wave training for focus and presence • the new human brain • looking towards a new future - the exciting possibilities for positive change and increased peace, love and compassion in the world if the human brain evolves.

### **Ephaidria**

Three months outbound from Earth and the starship Desio approaches its planetary destination, her crew eager to commence a mission of scientific discovery. Kyle Lorenzo, however, has a personal reason for being on board--an inner conflict that will ultimately propel him to explore not only of the furthest reaches of an enigmatic ocean world but the nebulous recesses of his inner psyche. During the long and isolating interstellar journey a physical relationship develops between Kyle and the ship's physician, Kelly Takara. That part is easy. Understanding the reasons for avoiding the emotional commitment desired by Kelly is harder. So, too, is trying to penetrate the mind of Larry Melhaus, the mission's brilliant and reclusive physicist - a failure to communicate made exponentially more troublesome when the scientist's disturbing behavior begins to threaten the crew. While Kyle struggles to comprehend himself and Melhaus, the ship's crew, led by their strong-willed commander, Bruce Thompson, attempt to fathom a planet where none of the precepts of science seem to apply. A world where every preconceived notion of what constitutes life must be re-examined and challenged. Two journeys: One inward, one outward. Culminating at the same destination.

### **A Journey in Other Worlds**

Welcome to the nightmarish future of The Theta Timeline, where '1984' meets 'Slaughterhouse-Five.' Leaders who rely on war and fear. The men and women who refuse to accept a tyrannical government. And an unreliable means of time travel in which most people don't survive. Freedom was not stolen overnight, but gradually chipped away through a campaign of war and terror. People were told new laws and restrictions were for their own good. But the reality was a monstrous regime bent on controlling its subjects. Now, there is only one way to stop the Tyranny: go back in time and prevent it from ever starting. At times eloquent, funny, satirical, and infuriating, The Theta Timeline is not only Dietzel's most powerful book, it is as important as any dystopian vision created to date.

### **Turtle Island**

This textbook introduces the reader to the new and emerging field of Conservation Psychology, which explores connections

between the study of human behavior and the achievement of conservation goals. People are often cast as villains in the story of environmental degradation, seen primarily as a threat to healthy ecosystems and an obstacle to conservation. But humans are inseparable from natural ecosystems. Understanding how people think about, experience, and interact with nature is crucial for promoting environmental sustainability as well as human well-being. The book first summarizes theory and research on human cognitive, emotional, and behavioral responses to nature and goes on to review research on people's experience of nature in wild, managed, and urban settings. Finally, it examines ways to encourage conservation-oriented behavior at both individual and societal levels. Throughout, the authors integrate a wide body of published literature to demonstrate how and why psychology is relevant to promoting a more sustainable relationship between humans and nature.

## **A Whole New Mind**

Reproduction of the original: The Rock of the Lion by Molly Elliot Seawell

## **New Trends and Developments in the World of Islam**

Four clairvoyant Earthlings are summoned to a distant galaxy, to assist an abducted race of humans; struggling to defeat an invasion of astral entities. This epic sci-fi/fantasy draws us out of ordinary reality and into multiple worlds of extraterrestrial beauty, fabled history, and life-and-death stakes. Read and be transported.

## **Mastyr Phrenzy**

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, The Power of Now is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

## **The Theta Timeline**

Do you ever wonder why age old prophesies continue to fascinate us? Somewhere in a deep corner in your mind, you must

sense some truth in these age old beliefs that we conveniently call myths. Yes, this is true with other people living in faraway lands, who do not understand your thoughts and culture. Jake, a NYC cop is hot on the trail of Rashid a terrorist who is planning attacks on American soil. Ram an Indian scientist is poised to achieve one of biggest scientific breakthroughs in history. Little do they realize that their paths are about to cross, a long time ago a Mayan priest had prophesized the end of the world. Tick tock, the clock is ticking. The universe began with a bang; will a Mayan priest, or a terrorist on the run, maybe an evil cop or even a scientist change the future? Will the end of the world be good or bad?

### **New World New Mind**

The Alplai have lived in peace and prosperity for centuries, spreading beyond their homeworld's single continent into floating cities on its vast oceans, and colonizing the planets and moons of their solar system. Now, a massive alien vessel has come, carrying over a million colonists in cryogenic stasis from a devastated world. Ganak, the recently appointed Commissioner for Space Exploration, advocates that the Terai be allowed to settle in the newly prepared Eastern Sector of the planet Totrana. The proposal is approved, and the avian-descended Alplai work with this strange mammalian species to help them build a new home. But not all the Alplai welcome these creatures. Many are concerned about their warlike past, and when a new disease erupts on Totrana, the aliens are quickly blamed. Despite their contributions, the Terai face discrimination and harassment. How far can Ganak use his influence to help, and what leaders will emerge amongst them as they strive to build a new life?

### **The New World**

What if dreams are more than dreams? This magical realism novel is the first in a trilogy that is historical fiction, love story and spiritual quest. It is about magic and mysticism, faith and initiation. It is about the soul of art. Woven through history is a love story of many parts, remembered and built upon through the centuries. A great love passes on through generations in some undeniable memory in the flesh, and also reappears in new lives from distant places. Mystical love calls to couples throughout time to bring them together again and again. This remembering travels both ways in time, existing in that place beyond time where love lives. There are vague memories, subtle warnings and obscure communications between individuals separated by centuries. Lives weave together throughout more than five hundred years, paralleling contemporary events. Religious intolerance, fear and greed generate the Spanish Inquisition and the religious wars in Europe that reach a decisive moment with the defeat of the Spanish Armada. Ninety-six years earlier, in the same year that Ferdinand and Isabella sent the three ships that discovered the New World, Spain's power had begun to weaken with the expulsion of the Jews and Muslims. The wisdom and skills of the Islamic and Jewish citizens was what had helped make Spain what it was, but fear caused the end of that golden age. These two critical points in history and what follows are the

setting for this novel, but other times are connected over many thousands of years. The story opens in Spain in the 15th Century, with Jewish, Islamic and Christian children playing together as innocents without prejudice or fear. Throughout the book, there is an underlying theme of Hope and Faith manifested in mystical ways. This faith lives in ancient Celtic traditions, as well as Jewish, Islamic and Christian forms, both Catholic and Protestant. Truth is truth, no matter what form it chooses to wrap itself inside. Love empowers many characters in various ways and transforms them into their best. The world of nature sometimes comes to their aid in miraculous ways, and enemies who are treated with love become allies. There are no greater mysteries than time and consciousness and the memories that connect us to the whole of our lives and beyond. The *deja vu* and vague precognitive experiences that all of us have felt to some degree are the tip of the iceberg of this mystery. The supernatural in our lives is often liberated by powerful emotions like love and fear. We all are familiar with stories about mothers who have sensed when their children are in danger or when a loved one is in crisis. There is an undeniable connection that doesn't fit neatly into our view of everyday physical life. There is a larger world we glimpse as we timidly awake. Editorial Review: Lyrical, hauntingly beautiful. This is storytelling at its best. -- Phyllis Tickle - Founding editor of the Religion Department of Publishers Weekly and author of dozens of books, including *The Great Emergence: How Christianity Is Changing and Why*

## **The Influence of the Stars**

A 2004 ECPA Gold Medallion Finalist! One of Preaching magazine's 2004 "Top Ten Books Every Preacher Should Read"! Neopaganism. The paranormal. Astrology. Nature religion. Holistic thinking. Healing. New Age. New spirituality. A massive shift in Western religious attitudes has taken place almost without our noticing it. The Judeo-Christian tradition of Western culture has slowly but steadily been eclipsed by a new way of viewing spirituality. This shift has been in the making for some three hundred years. James A. Herrick tells the story of how the old view has been dismantled and a new one created not primarily through academic or institutional channels but by means of popular religious media--books, speeches, magazines and pamphlets, as well as movies, plays, music, radio interviews, television programs and websites. Although the new spirituality is diffuse and eclectic in its sources and manifestations, Herrick demonstrates a significant convergence of ideas, beliefs, assumptions, convictions and images in the myriad ways this New Religious Synthesis makes its way into our culture. In fact, the new spirituality, says Herrick, directly calls into question each major tenet of Judeo-Christian tradition and so represents a radical alternative to it. Interest in spirituality increases while participation in institutional religion wanes. Many welcome this evolution of religion. However, few are familiar with its roots, and fewer still have critically examined its prospects. As we stand at a spiritual crossroad, Herrick questions whether we are wise to discard the Western religious tradition and adopt the new spirituality.

## **The Power of Now**

This book is published by Floricanto Press. [www.floricantopress.com](http://www.floricantopress.com) Chelo fled Cuba in search of freedom in 1961. Born in a small village near Havana in 1921, she married Adolfo Llano in 1944. The couple resided in Artemisa, the cradle of the Cuban Revolution of 1959. They came in contact with some of its most prominent leaders and endured the cruel communist tyranny, which ended their prosperity and cut short their bliss. The Llanos left the island empty-handed. Chelo's steel-forged nerves and resourcefulness steered her family to success in their new world. It would have been easier to be a fake revolutionary like Fidel Castro—who used deception and wielded a gun to suppress the free will of his people—than to be a real fighter and do what she did day after day. Her life stood out as a monument to Cuban tenacity. History books did not record the events because she had lacked political ambitions and had not tortured or killed anyone. Yet, her anonymity would have been an irreparable loss. When does a memoir become, not only an individual's tale, but a testimony of historical events? When the narration weaves dramatic personal stories within a country's history, and when each historical event as it evolved impacted on people's lives and destinies. Louis Villalba's "Cuban Seeds" tells an astonishing tale centered on Chelo, a politically quiet and a towering figure, and the Llanos family, whose struggles against a Communist dictatorship and yearnings for freedom led them to America in 1961. This book is highly recommended. LatinoBooks.Net Louis Villalba was born in Cadiz, Spain, and has resided in the U.S. since 1970. He graduated from the University of Seville, Spain, with a doctor of medicine degree. He completed his training in neurology at the Chicago Medical School, where he taught for thirty years. His passion for literature prompted him to study creative writing at Northwestern University. His first book, *The Silver Teacup* (Createspace, 2012) or its Spanish version, *La Tacita de Plata*, contains short stories that take place in his hometown, Cadiz, Spain, shuttling the reader to a different world full of history, human drama, and fantasy. Kirkus Indie Review praised his novel "The Stranger's Enigma" (Createspace, 2014) as "a provocative character study of a man facing a personal and professional crisis." "Afterlife Tracks: Glimpses of the Occult" (Createspace, 2015), his first non-fiction work, narrates his experience with paranormal events in his neurology practice.

## Lamikorda

## New World New Mind

Globalization, economic development and changes in social environments have put the relationships between work, leisure, social structure and quality of life under the spotlight. Profound transformations in the nature and organization of work are occurring, with potentially far-reaching social and economic consequences. Increasingly, organizations demand greater flexibility from their workforces and are introducing new technologies and practices in response to global competitive pressures. At the same time many employees are experiencing long working hours, increasing workloads and job insecurity, along with the challenge of balancing work and domestic responsibilities. These changes threaten long-term gain in leisure

time while, simultaneously, the leisure environment is also changing radically, as we see increasing commercialization and professionalization of leisure services and experiences, the influence of the Internet, the rise of gambling and the decline of community-based activity. Exploring all of these issues, this book brings together specially commissioned chapters from international experts in a wide range of disciplines concerned with work, leisure and well-being. Each author takes stock of the current position, identifies core practical and theoretical issues and discusses possible future trends in order to provide an invaluable resource for all policy-makers, educators, employers and researchers in the field.

## **Work and Leisure**

### **Staff of Law**

Readers will feel they know someone just like the characters in this timely novel on social status and social media. Steen Sand, CEO of Stensure Networks, is the head honcho at an IT firm that's developed an Internet service to monitor, compute, and publish people's social status. His chief operating officer, Irene Lund, serves as his muse. He needs her to be part of his world, or he can't achieve anything of significance. But does she feel the same? Chief financial officer, Michael Jensen, is a hard-core pessimist who has learned the hard way not to speak up against the status quo, in spite of his natural inclination to do so. Jensen's a numbers guy. He relates to spreadsheets better than he does to people. Will this cost him in the end? Louise Hald, chief marketing officer, joined Stensure's management team after leaving her post as an assistant professor at a business school. She's beginning to wonder if she'll ever move past the "assistant" part in the eyes of her coworkers. What can she do to ensure she gets ahead? And then there's Sophie Bech. She's made the long trip back to Denmark from South Africa for her own private reasons, and everything looks different to her now. She wonders what her return will hold for her. Was it a mistake? Will her fresh set of eyes-and values-help or hinder the team? Reductionism-understanding complex things by reducing them to fundamental parts and interactions-comes up against social status, so subtle, intricate, and sought-after, in this intriguing modern-day novel. Will these characters-and their supporting players-make the changes they need to survive in today's world? Or will they succumb to the allure of using easy but underhanded methods to get ahead?

### **A Whole New Mind**

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different.

Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

## **Whitby After Dark**

In the continuing debate of how to confront the challenges of climate change, individuals, advocacy groups, and political parties in the United States offer arguments and solutions based on economic and political viewpoints. But what if we are beginning from a distorted view? In this book, F. Stephan Mayer argues that our psychological representation of the world is at the heart of the underlying causes of climate change. Mayer posits that we need to change the way we see the world if we are to effectively take a new course of action to address this threat. Through an alternative worldview based on Aldo Leopold's concept of land ethic, Mayer furthers the conversation by promoting a clearer vision of our relationship to nature and how it leads to a different path directed toward environmental sustainability. Based on over 20 years of psychological research examining the impact of the land ethic on pro-environmental behavior and personal well being, Mayer's accessible tone invites readers to place their worldview within a broader framework, draw connections to their lives, and spark ideas of next steps that individuals and groups can take to transition to this alternative worldview and rectify this situation.

## **Eon's Door**

LOVE RISES is pure, well, not so pure, fiction based on fact. A young Confederate lieutenant and a daring, older woman break all the taboos of the South in their efforts to survive a war-shattered world. When the Civil War ends, dashing Confederate Lieutenant Charlie Irving helps Julia's husband, General Robert Toombs, flee to France to avoid Union charges for treason. For years, Charlie has lusted after Julia even though she is a married woman twenty years his senior, and the South's most celebrated beauty. Under Charlie's smoldering looks, Julia goes weak in the knees and dreams of falling with Charlie on the thick, Persian carpet in her mansion's parlor. The aftermath of war offers a world based on survival and a chance to explore their passion if the two can survive the North's continuing effort to crush the South. But Julia still loves

her husband, and code-of-honor-bound Charlie has sworn to take care of Julia in the General's absence. Is General Toombs' desperate plea to Charlie to do whatever is necessary to keep his wife safe and happy, curse or blessing on what the future holds?

## **More Than Money**

Back in 2014, the year of the original LieDeck Revolution, humanity couldn't cope with reality as laid bare by the infallible lie detector. To avoid total chaos, a coup transforms the UN into a military world government called the World Democratic Authority (WDA), and only WDA agents are allowed to use LieDecks, for policing purposes. In 2033, there emerges a widespread demand for the democratization of the military world government and public access to the LieDeck device. The opposition is led by "Evolution," a social movement that has involved hundreds of millions throughout the world in a new way of living—a new way of being, really. Their new "consciousness" is accomplished by never lying, which is in turn achieved by pretending that their spoken words are being openly checked by the banned LieDeck device. One WDA agent, Lilly Petrosian, is chosen by her superiors to live in and LieDeck-monitor an Evolutionary "clan" named Victor-E, and finds herself caught between these two worlds.

## **Constructed**

A compass is a very helpful tool—as long as its wielder knows the direction he wants to go. This wasn't often the case in the sixties in America, when many felt directionless, with an unpopular war that had the country's moral compass spinning. "Hope Points North" is a coming-of-age experience that takes place on Long Island during this turbulent period. Of the three boys, Chris McKellar is the conventional one of the group—the glue that binds the troubled Teddy and smart, introverted Charlie together. The story is Chris's adult recollection of the time when he, Teddy, and Charlie decide to travel on their own to Grumman Aerospace Company, the builders of the Lunar Excursion Model—the craft that will eventually deliver man to the moon. Just as the boys embark on their journey, the dark-hearted preacher Lovejoy ambushes them. Teddy's grandpa has amassed a secret fortune, but it's no secret to Lovejoy, who is seducing Teddy's mother and will do anything to get the money. But the boys resist the preacher's attack in a way that leaves him dead in the creek or so they think. In shock, they follow their compass, toward the fraternity of hopes, dreams and, unsuspectingly, manhood.

## **Transforming Psychological Worldviews to Confront Climate Change**

In this revised and expanded edition of his collected writings, David Suzuki continues to explore the themes that have informed his work for more than four decades — the interconnectedness of all things, our misguided elevation of economics

above all else, the urgent need to deal with climate change — but with an increased emphasis on solutions to the myriad problems we face, his inspiring vision for the future, and the legacy he hopes to leave behind. There is also more emphasis on the personal, as he recounts episodes from his childhood and early adulthood and speaks eloquently about old age, death, and the abiding role of nature and family in his life. Written with clarity, passion, and wisdom, this book is essential for anyone who is an admirer of David Suzuki, who wants to understand what science can and can't do, or who wants to make a difference.

## **The LieDeck Revolution - the Sequel**

In the wake of endless terrorist attacks that have taken the U.S. to the brink of societal collapse, a kind of rabid zombie is born that catapults the world beyond the brink and into unprecedented levels of terror. And on the eve of the apocalypse, only three types may survive: the wealthy, the fortunate, and the well prepared. A long string of terrorist attacks has humanity on edge, which prompts John, a very rich man, and his family to buy a mountain in the Rockies and build a massive bomb shelter there. It's their own version of NORAD-and their salvation. Unwilling to leave any family members behind, John also builds a house with a bomb shelter for his niece, Maggie, who is going to college in Boulder. Meanwhile, an ex-military biologist, Simon, and his son, Peter, have been living above a bomb shelter in a Denver suburb for years, and they are more than prepared, or so they think. After the attacks subside for a few years, protests against the government roar up across the country. Rampant and uncontained, the situation forces the police to use an experimental tear gas. However, the tear gas has been tampered with, which causes a kind of human rabies, creating a kind of zombie effect in anyone infected. Suddenly, "uncontrollable" means something all together different. Not even John, Maggie, Simon, and Peter, despite their preparations, can anticipate what is to come. When the infected spread outside the major protest cities, it cripples the country and makes it vulnerable to further attack. An eventual nuclear attack will force the president to respond by attacking the suspected countries, thus creating a domino effect that will become full-out nuclear war, World War 3, and, eventually, the Apocalypse.

## **Cuban Seeds**

This book introduces readers to the global conspiracy--The New World Order. The Anti-Christ, Freemasonry conspiracy and Satanic Symbols are just a few of the secret goodies that lie within this book. If you are interested in events that are taking place behind the scenes, then you owe it to yourself to read this book this is volume one of a two volume set.

## **Eternal Stimulation Activation Quotes**

Help your child learn multiplication with Nikki, and learn some valuable lessons in this adorable chapter book! Nikki is a young, creative girl who just loves everything about creativity sometimes a bit more than everyone else. In a world full of color, resources, and beauty; it is hard for Nikki not to want to plaster the walls in stamps and glitter. Nothing scares her, not even scissors. In this book, we see exactly how much Nikki's struggle with balancing her creative genius and the ordinary world around her that is full of people that just do not see how beautiful everything COULD be, so she wants to show them.

## **Nikki's Creativity: The Chapter Book**

Lenore Lee wants nothing more than to make new friends in her new town of Whitby, Yorkshire, and to forget about the disturbing dreams that hold her captive at night. But what she discovers in Whitby, might be even more disturbing than the dreams. Dreams which may hold the key to her survival in the hidden world of the Supernatural

## **Awaken the Supernatural You!**

Includes section "Book reviews."

## **Future Survey Annual 1991**

Eternal insight that travels into the inner system to stimulate higher awareness of oneself along this life journey.

## **Conservation Psychology**

Argues that the human mind has failed to comprehend the modern world and suggests that it must be trained to notice large gradual changes as well as short sudden ones

## **Orb**

Dave Stewart has survived the inferno of Kansas City and come out the other side. To the rest of the world his fate is uncertain, and by now even Agent Keyes knows better than to assume he's dead. As Keyes and his rogue DHS agents continue their search for him, Dave knows that Plan A, as usual, won't work. His only chance is to keep moving until he can find a safe way to make contact with Nate Reid and figure out his next move. As Dave's odyssey across a zombie infested America continues, he encounters the best and the worst in his fellow survivors. He will find new allies, learn more about

the true nature of the Asura virus, and his role in even bigger designs than he ever imagined. But, in a land filled with enemies both living and dead, is all the skill, wit and courage in the world enough to help him survive? Or will this be Dave Stewart's last journey?

## **The Days Before**

A call for a paradigm shift in human thinking in recognition of the interconnectedness of all things--a new mind for a new world • Explains how the instability of our current time is part of a larger cycle of human evolution that will soon turn toward renewal and regeneration • Reveals how to participate in the process of conscious evolution to maintain resilience during these transitional times • Examines new findings in quantum physics and quantum biology on the interconnectivity of all life and how to utilize this for conscious evolution For centuries, indigenous wisdom traditions have talked of an epochal shift on the horizon, of a spiritual renaissance for the earth and her living family. Now the timelines are converging and the potential for an energetic “upgrade” for humanity is here, but first we must survive and evolve through the current period of transition. Explaining that evolution is not a gradual process but more like a “shock to the system”--radical waves of transformation after a period of dormancy--author Kingsley Dennis reveals that we are currently undergoing an evolutionary leap and shows not only how to survive but also thrive in this period of global upheaval and change. Examining the nature of evolutionary cycles, he explains that the instability we are now experiencing--climate change, economic meltdowns, and increasing political polarization--is the convergence of complex systems that have reached a critical state. What we need in order to push through to the coming spiritual renaissance is a paradigm shift in human thinking and perception, a conscious evolution in recognition of the interconnectedness of all things--a new mind for a new world. Examining new findings in quantum physics and quantum biology on the interconnectivity of all life as well as opportunities for us to reawaken our slumbering souls, this book offers a glimpse of the new global society to come, a renewed humanity for the 21st century, and how each of us can best participate during the process of planetary transformation.

## **New Consciousness for a New World**

There is no longer sufficient time to rely on the normal pace of cultural evolution to deal with today's dilemmas. Human beings have always been the most adaptable creatures on the planet, and they should be able to chart a new course for themselves. Some of that charting is already being done. The old mind today is being challenged and changed by many scattered efforts. Can we bring these efforts together to produce a large-scale program for a rapid 'change-of-mind'? We know what the problem is. The 'solution' is not simple - to generate the social and political will to move a program of conscious evolution to the top of the human agenda.

## **New Brain, New World**

Ryan McMillan believes hard work and perseverance are the keys to success, not games of chance. When he receives an instant lottery ticket, he never expects to win a dime, much less walk away with the grand prize. Collette Russo is no stranger to hardship. Loss has taught her valuable lessons in grace and modesty, traits Ryan can't help but notice on the winner's cruise. Collette is the only other passenger not obsessed with material things and their mutual humility sparks an attraction neither of them anticipates. As good fortune continues to favor Ryan, his relationship with Collette turns into a romance filled with affection and laughter, and his career begins to take off. Yet when his loyalty is tested, an old friendship turns sour. Ryan chalks it up to greed and arrogance, and finds comfort in Collette's experience with both. But an unthinkable event reveals that nothing is as simple as it seems. Envy and greed threaten to ruin everything. Has Ryan's luck finally run out? Can he take back control? Will Collette stand by him in the aftermath? Only time will tell if love is worth more than money.\* Due to language and sexual content, this book is intended for readers 18 and older.
