Hot Works Permit

Anna and Banana must cook up a solution when her jealousy gets her into some hot water in the sixth book of this “fast-paced, fun, and funny” (Megan McDonald, bestselling author of the Judy Moody series) illustrated chapter book series about the joys and challenges of elementary school friendships. After watching the contestants on The Batter-Up Bake-Off Show whip up sweet treats, Anna, Isabel, Sadie, and Banana are ready to put their culinary chops to the test. The plan? To make the best-ever cookie recipe for the town library’s bake sale! There’s only one problem: Isabel and Sadie have started hanging out with a girl named Monica, and suddenly she’s all they can talk about. Anna’s sure she, Sadie, and Isabel are complete as a trio, and winning the bake sale will prove it. But when Monica shows up with Sadie and Isabel for their big baking day things quickly turn from sweet to sour. Can Anna win back the attention of her two besties, or will she learn that friendship—like cookies—is best when shared?

Season of Water and Ice

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men’s struggles to become invulnerable increase vulnerability. Through an

analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Applied Statistics In Business And Economics

Set in 1957 in rural northern Michigan, *Season of Water and Ice* is the story of a pivotal few months in the life of young teen Danny DeWitt, who lives alone with his father following the sudden departure of his mother. Bookish and relatively friendless, Danny becomes acquainted with Amber, a pregnant teenager abandoned by her boyfriend and rejected by her family. Both outsiders—one because of disposition, the other because of social stigma—Danny and Amber form an unusual, openhearted alliance that helps each deal with their separate challenges. Their friendship is tested when Amber's abusive boyfriend returns and Danny's mother withdraws more permanently from her family, leading eventually to a crisis that threatens Amber and her unborn child, as well as Danny's concept of love and manhood. Danny struggles to understand himself and the confusing and, at times, frightening world in which he lives. His analytically oriented mind attempts to make sense of the rigid stereotypes of the 1950s, revealing startling truths about the abiding issues of love and family and the

dangers to which these ideals are continually exposed. Danny straddles the uncertain gap between childhood and adulthood in this novel that is underscored by themes of independence and obligation, love and sexuality, courage and surrender. This realistic work will appeal to both adult and young adult readers.

The role of the local school board in delivering quality education is examined in this booklet, which provides a set of expectations and principles for drastic change in the role and operation of school boards. Now that fundamental, systemic change is

being called for, the performance of school boards is under greater scrutiny. Following the preface and introduction, chapter 1 analyzes national trends in changes external to schooling and new demands placed upon schools and their boards by business and other leadership sectors. The interrelationships between education and other children's services for children's success are also explored. Chapter 2 examines reform strategies of the 1980s, particularly those implemented by Kentucky and Chicago. The major theme of these reforms was the intensification of the existing system rather than restructuring. Chapter 3 discusses state-local relations, and the fourth chapter presents governance lessons from Canada, Great Britain, and Japan. The fifth chapter presents findings of a survey conducted from 1988-90 of 266 school boards from 16 states. Superintendents from 128 of the districts completed a questionnaire. The results indicate that local boards are weakest in the areas necessary for effectiveness in changed school systems. Chapter 6 offers conclusions and recommendations for improving board performance and endorses state action that changes the roles and responsibilities of local boards. One figure, 15 tables, and chapter endnotes are included. (Contains 61 references.) (LMI)

Critical Human Resource Development

Travel Law

In the five years since the first edition of this classic book was published, Internet use has exploded. The commercial world has rushed headlong into doing business on the Web, often without integrating sound security technologies and policies into their products and methods. The security risks--and the need to protect both business and personal data--have never been greater. We've updated Building Internet Firewalls to address these newer risks. What kinds of security threats does the Internet pose? Some, like password attacks and the exploiting of known security holes, have been around since the early days of networking. And others, like the distributed denial of service attacks that crippled Yahoo, E-Bay, and other major e-commerce sites in early 2000, are in current headlines. Firewalls, critical components of today's computer networks, effectively protect a system from most Internet security threats. They keep damage on one part of the network--such as eavesdropping, a worm program, or file damage--from spreading to the rest of the network. Without firewalls, network security problems can rage out of control,

dragging more and more systems down. Like the bestselling and highly respected first edition, *Building Internet Firewalls, 2nd Edition*, is a practical and detailed step-by-step guide to designing and installing firewalls and configuring Internet services to work with a firewall. Much expanded to include Linux and Windows coverage, the second edition describes: Firewall technologies: packet filtering, proxying, network address translation, virtual private networks Architectures such as screening routers, dual-homed hosts, screened hosts, screened subnets, perimeter networks, internal firewalls Issues involved in a variety of new Internet services and protocols through a firewall Email and News Web services and scripting languages (e.g., HTTP, Java, JavaScript, ActiveX, RealAudio, RealVideo) File transfer and sharing services such as NFS, Samba Remote access services such as Telnet, the BSD "r" commands, SSH, BackOrifice 2000 Real-time conferencing services such as ICQ and talk Naming and directory services (e.g., DNS, NetBT, the Windows Browser) Authentication and auditing services (e.g., PAM, Kerberos, RADIUS); Administrative services (e.g., syslog, SNMP, SMS, RIP and other routing protocols, and ping and other network diagnostics) Intermediary protocols (e.g., RPC, SMB, CORBA, IIOP) Database protocols (e.g., ODBC, JDBC, and protocols for Oracle, Sybase, and Microsoft SQL Server) The book's complete list of resources includes the location of many publicly available firewall construction tools.

Building Internet Firewalls

In this #1 New York Times bestseller in Sue Grafton's Alphabet series, private investigator Kinsey Millhone has her hands full when a job that should be easy money takes a turn for the worse. Reba Lafferty was a daughter of privilege, the only child of an adoring father. Nord Lafferty was already in his fifties when Reba was born, and he could deny her nothing. Over the years, he quietly settled her many scrapes with the law, but wasn't there for her when she was convicted of embezzlement and sent to the California Institution for Women. Now, at thirty-two, she's about to be paroled, having served twenty-two months of a four-year sentence. Her father wants to be sure Reba stays straight, stays home and away from the drugs, the booze, and the gamblers It seems a straightforward

assignment for Kinsey: babysit Reba until she settles in, make sure she follows all the niceties of her parole. Maybe a week's work. Nothing untoward—the woman seems remorseful and friendly. And the money is good. But life is never that simple, and Reba is out of prison less than twenty-four hours when one of her old crowd comes circling round
