How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and

rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. A Slice of the Pie will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

The Routledge Handbook to Global Political Economy

The Routledge Handbook to Global Political Economy provides a comprehensive guide to how Global Political Economy (GPE) is conceptualized and researched around the world. Including contributions

that range from traditional International Political Economy (IPE) to GPE approaches, the Handbook gathers the investigations, varying perspectives and innovative research of more than sixty scholars from all over the world. Providing undergraduates, postgraduates, teachers and researchers with a complete set of traditional, contending and regional perspectives, the book explores current issues, conceptual tools, key research debates and different methodological approaches taken. Structured in five parts methodologically correlated, the book presents GPE as a field of global, regional and national research: • historical waves and diverse ontological axes; • major theoretical perspectives; • beyond traditional perspectives; • regional inquiries; • research arenas. Carefully selected contributions from both established and upcoming scholars ensure that this is an eclectic, pluralist and multidisciplinary work and an essential resource for all those with an interest in this complex and rapidly evolving field of study.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

Hydrogen Fuel Cells for Road Vehicles addresses the main issues related to the application of hydrogen fuel cell technology in the road transportation sector. A preliminary treatment is given on fuel resources and atmospheric pollution concerns which are closely related to the current technology (internal combustion engine) used for moving people and goods. The authors deal, in particular, with the problems that can hinder a widespread hydrogen market (production, storage and distribution), as well as giving an analysis of fuel cell technologies available for utilization of this energy carrier in the automotive field. *Hydrogen Fuel Cells for Road Vehicles* also examines the concerns faced during the design and realization of a PEM fuel

cell system with optimal size and efficiency, evidencing the impact of the individual auxiliary components on energy losses and dynamic stack performance. The book ends with the analysis of two practical case studies on fuel cell propulsion systems. Hydrogen Fuel Cells for Road Vehicles is a useful text for researchers, professionals and advanced students in the fields of automotive and environmental engineering.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even

better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

The Lola T70 was the car that Eric Broadley wanted to

build for Ford instead of the GT40. He thought the GT40 too conservative in specification for a state-of-the-art sports racing car, so he split with the giant corporation to build the T70 under the aegis of his own company: Lola. Immediately successful, the T70 carried John Surtees to the Championship in the 1966 Can-Am series. The cars were also very successful in Group 7 races until the series ended in 1966, by which time the likes of Denny Hulme, David Hobbs and Brian Redman had all driven T70s to victory. Under continuous development until the Mk IIIb Coupé of 1969, the T70 was never a great endurance racer but achieved major successes in shorter events such as the TT and Martini races. Today, the T70 is a leading force in historic racing. Over many years, John Starkey – T70 owner and ex-Curator of the famous Donington racing car collection – has compiled a huge amount of information on the cars and interviewed many past and present owners and drivers about their experiences with the T70. Uniquely, this book contains the history and specification – where known – of each individual T70 chassis. Available again after an absence of several years, here is the definitive development and racing history of the Lola T70.

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon,

Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the

success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff’s clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, Howling at the Moon is a blistering You’ll Never Eat Lunch in this Town Again of the music industry.

The Complete Guide to Four-wheel Drive

Some of the finest writing and reporting on the events of September 11 was done by Der Spiegel, Germany's magazine of record. With its main office in Hamburg,

base of operations for terrorist ringleader Mohamed Atta and many of the others, Der Spiegel's journalists were on the front lines of the earliest investigation into the identities of those who brought holy war to America. The award-winning team from Spiegel was also at Ground Zero, talking to people, gathering stories, interviewing survivors, seeking the words that might express the interconnections of horror and heroism. The words come from those who had been inside and somehow gotten out. Inside 9-11 gives us some of their accounts, taking us as close as we can get to what happened. The "why" of September 11 may remain beyond understanding. But here we learn who the terrorists were, and how they were able to take so many innocent lives by sacrificing their own. The profiles in this book render a chilling, alien mindset that has become part of our daily reality. Combining first-class investigative journalism and writing of great clarity, Inside 9-11 is a heartbreaking and gripping reconstruction of the events that changed us all. Translated from the German by Paul De Angelis and Elisabeth Kaestner, with contributions from Margot Dembo and Christopher Sultan.
