Nursing Diagnosis Handbook - E-Book

With a strong focus on health and wellness, this gerontological nursing text offers you a holistic perspective to caring for older adults. Designed to facilitate the healthiest adaptation possible, this text identifies potential problems that may occur and the means to address complications, alleviate discomfort, and help older adults lead healthy lives. Disease processes are discussed in the context of healthy adaptation, nursing support, and nursing responsibilities to help you gain an understanding of your clients' experience. Focus on health and wellness establishes a positive perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help you understand these important considerations when caring for older adults. Healthy aging strategies maximize the healthiest behaviors of clients with dementia and their caregivers. Consistent chapter organization includes learning objectives, research, and study questions/activities to make information easy to find and use. Incorporates assessment guidelines throughout provide useful tools for practice. End-of-chapter activities and discussion questions help you expand your knowledge and understanding of the content. Resource lists provide you with additional means to explore ways to care for the older adult. Incorporates the core competencies identified by the AACN and the Hartford Foundation Institute for Geriatric Nursing.

Healthy People 2010 boxes assist you in integrating knowledge about healthy aging considerations. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Expanded sexuality-related content includes older adults living with AIDS and STDs. Genetics section reflects the emergence of the role of genetics in gerontological assessment.

Caring for Older People in Nursing

"PAR is the ultimate in social justice practice. I suggest that PAR should be the basis for all nursing research. This book will provide you with the basics for getting started." óPatricia J. Kelly, PhD, MPH, APRN University of MissouriñKansas City (From the Foreword) Participatory action research is a qualitative research method conducted in collaboration with a community of people in order to effect changes in the community that are relevant to the residents. This is a practical, "how-to" resource for conducting participatory action research that guides readers, step by step, through planning, conducting, and disseminating nursing research using this qualitative design. It is part of a unique series of seven books devoted to nursing research using qualitative designs and methods. Examples from actual research along with author commentary illustrate potential pitfalls and challenges that may occur during the process and how to resolve them. Written by a leading scholar of nursing research and nurse experts in participatory action research, the book describes its philosophical underpinnings and state-of-the-art techniques, and provides a concrete road map for planning and conducting studies. It considers why this particular research method is best suited for a particular study, ethical considerations, and potential obstacles. The book also discusses how to ensure rigor during a study, providing examples from scholarly literature and the authors' own work. Each case example features a description of the study, including why the investigator decided to use participatory action rather than another research design, how he or she solved gatekeeper and access-to-sample issues, and institutional review board concerns. Also included is a discussion of how to collect and analyze data and how to disseminate findings to both the scientific community and research participants. With a focus on practical problem solving throughout, the book will be of value to novice and experienced nurse researchers, graduate teachers, in-service educators, students, and nursing research staff at health care institutions. Key Features: Describes, step by step, how to plan, conduct, and disseminate participatory action research Delivers new designs and methods Focuses on solving practical problems related to the conduct of research Features rich nursing exemplars in a variety of health/mental health clinical conditions in the United States and internationally

Facilitating Aging in Place: Safe, Sound, and Secure, An Issue of Nursing Clinics,

Nursing for Wellness in Older Adults

This edition captures the underlying new approach in patient centred care and thinking from a multidisciplinary perspective. It highlights the most recent ideas

and experiences of policy analysts, nurses, doctors, allied health professionals and the consumer experience from both Australia and Internationally. Contemporary research compliments the vignettes of practice and in conjunction with accompanying 'video' clips serve to capture the realities of caring for older people in our society. Change in focus of health care system with the patient centered care taking precedence and this new philosophy is incorporated into the third edition Key focus on issues and innovations in aged care, with evidence-based examples and clinical vignettes included throughout the new edition Cases are incorporated into each chapter to re-enforce and highlight many issues faced by nurses and health care workers in aged care Written by experts in the field of aged care Accompanying DVD, provides video clips of interviews with health practitioners and it highlights innovations to health care demands; issues such as dementia and broader aging issues. These serve to re-enforce the underpinning interdisciplinary and innovative approach of the third edition. An Evolve ebooks will be available of this title This text reflects new thinking in care; include the ideas and experiences of policy analysts, nurses, doctors, allied health professionals and the consumer experience mainly from Australia but with international contributions and be based on contemporary research. It will also point readers to 'the evidence' where it exists, and include vignettes of practice and 'video' clips where appropriate.

Critical Care Nursing of Older Adults

Nursing Care for the Hospitalized Older Patient is a comprehensive, quick-reference resource for registered and advanced practice nurses working with older patients in a hospital setting. Organized in user-friendly format, the book provides vital information on all aspects of hospital care and the full range of health issues encountered by elderly patients. The book is organized into four major sections. The first section provides an overview of the aging patient, including demographics, normal aging changes, and the general impact of hospitalization. The second section covers proper health assessment, providing guidance on history taking and evaluating laboratory values. The third section is the largest part of the book and is made up of short, similarly-structured chapters dedicated to individual clinical issues ranging from burns to depression. These chapters are organized by body system to maximize ease of use. The book concludes with a section on special considerations that cross common clinical areas, such as palliative care, pain management, fall prevention, and discharge planning.

Basic Geriatric Nursing - E-Book

Now in its Sixth Edition, this foremost leadership and management text incorporates application with theory and emphasizes critical thinking, problem solving, and decision making. More than 225 case studies and learning exercises promote critical thinking and interactive discussion. Case studies cover a variety of settings, including acute care, ambulatory care, long-term care, and community health. The book addresses timely issues such as leadership development, staffing, delegation, ethics and law, organizational, political, and personal power, management and technology, and more. Web links and learning exercises appear in each chapter. An Instructor's CD-ROM includes a testbank and PowerPoint slides.

Magnet Environments: Supporting the Retention and Satisfaction of Nurses, An Issue of Nursing Clinics - E-Book

Diabetes presents differently in older people and normal ageing processes, predisposition to specific complications, and other co-morbid conditions complicate its management. The underlying philosophy of this book is that there are opportunities for prevention, health maintenance and rehabilitation for older people with diabetes, which can realistically improve their quality of life. This book is an easy to follow essential guide to providing skilled and effective care for older people with diabetes in community, acute and residential care settings. It aims to provide nurses and other health professionals with the knowledge needed to accurately diagnose, treat and care for older people with diabetes. It draws upon guidance from the National Service Frameworks for Diabetes and Care of Older People (UK) and the Department of Human Service Standards (Australia) and provides an ideal companion to Care of People with Diabetes.

Nursing Older Adults

This issue of Nursing Clinics of North America will focus on Magnet Hospitals. Article topics will include nursing workforce data on magnet versus non-magnet hospitals, magnet culture and satisfaction, best practices in ensuring engagement among nurses, nursing retention, partnerships between academics and practice, and nursing retention strategies.

Aged Care Nursing

With increased life expectancy, the aged population has grown markedly throughout the world, but there is a shortage of experienced nurses with expertise in the holistic care of the elderly. This book is written to inspire and empower such nurses. Care of the aged has a long and noble history within the nursing profession. Respect for the dignity of the elderly and a commitment to their well-being have inspired generations of nurses. But it is only in more recent times that aged-care nursing has really 'come of age' with the provision of sound evidence-based nursing practice. The traditional ethical approach to aged-care nursing has thus become combined with sound scientific knowledge in a modern holistic model of care. Aged Care Nursing: A Guide to Practice is written by clinicians for clinicians. Each chapter describes contemporary nursing practice in a specific area of aged care. The inclusion of evidence-based and outcome-based practices throughout the book ensures that all readers, be they novices or experts, will have a reliable and beneficial reference to guide their practice. The chapter authors are from several countries, and the content of each chapter is presented generically to ensure international applicability. Each author is a recognised expert in his or her subject area, and all present their topics with a focus that is practical, rather than academic.

Psychiatric & Mental Health Nursing - E-Book

Restorative Care Nursing for Older Adults

Prepare for a successful career in caring for geriatric populations with Williams' Basic Geriatric Nursing, 6th Edition. This easy-to-read bestseller includes the latest information on health care policy and insurance practices, and presents the theories and concepts of aging and appropriate nursing interventions with an emphasis on health promotion. Part of the popular LPN/LVN Threads series, it provides opportunities for enhanced learning with additional figures, an interactive new Study Guide on Evolve, and real-world clinical scenarios that help you apply concepts to practice. Complete coverage of key topics includes baby boomers and the impact of their aging on the health care system, therapeutic communication, cultural considerations, spiritual influences, evidence-based practice in geriatric nursing, and elder abuse, restraints, and ethical and legal issues in end-of-life care. Updated discussion of issues and trends includes demographic factors and economic, social, cultural, and family influences. Get Ready for the NCLEX® Examination! section at the end of each chapter includes key points along with new Review Questions for the NCLEX examination and critical thinking which may be used for individual, small group, or classroom review. UNIQUE! Streamlined coverage of nutrition and fluid balance integrates these essential topics. Delegation, leadership, and management content integrated throughout. Nursing Process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders. Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply knowledge to clinical scenarios. LPN/LVN Threads make learning easier, featuring an appropriate reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design. UNIQUE! Complementary and Alternative Therapies boxes address specific therapies commonly used by the geriatric population for health promotion and pain relief. Health Promotion boxes highlight health promotion, disease prevention, and age-specific interventions. Home Health Considerations boxes provide information on home health care for the older adult. Coordinated Care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Clinical Situation boxes present patient scenarios with lessons for appropriate nursing care and patient sensitivity. Critical Thinking boxes help you to assimilate and synthesize information. 10th grade reading level makes learning easier.

Nursing Research Using Participatory Action Research

Named a 2013 Doody's Essential Purchase! "This is a terrific text with good basic information and a level of detail, tools, and practicality that make it a useful resource to get older adults mobilized in any setting."--The Gerontologist "[This] book provides a practical hands-on perspective for implementing function focused care in all settings[It] is a unique resource that is relevant for all nurses and health care providers working with older adults. In addition to addressing functional decline, function-focused care provides a fresh and practical solution to many of the problems that tend to arise with older adults such as infections, falls, and pressure ulcers all known to be associated with immobility." From the Foreword by Colin Milner CEO, International Council on Active Aging "This book encourages individualization, which is difficult to achieve with more prescriptive approaches.

This second edition includes chapters on cognitively impaired adults, ethical issues, and patient-centered care, all of which are so important in long-term care. I found it to be very motivating in the way it helped me apply the philosophy and strategies to elders with whom I come in contact. I would highly recommend this book to anyone working with elders. Score: 95, 4 Stars--Doody's Medical Reviews

The purpose of restorative care nursing (often referred to as function-focused care) is to take an active role in helping older adults maintain their highest level of function, thereby preventing excess disability. This is the only volume to educate caregivers about both the philosophy of restorative care and how to integrate it into all care settings for older adults. Now in its second edition, the text contains updated content in each chapter along with two entirely new chapters on function-focused care for cognitively impaired adults, ethical issues, and patient-centered care. The book provides a complete six-week education program in restorative care for nurses and other caregivers, numerous practical suggestions for beneficial activities that will enhance function, and strategies for motivating both older adults and caregivers to engage in restorative care. Woven throughout the text is research that documents the benefits and expected outcomes of restorative care. The book also includes the requirements for restorative care across all settings, and the necessary documentation. Restorative Care Nursing for Older Adults will help formal and informal caregivers and administrators at all levels assimilate the philosophy of restorative care and be able to develop and implement successful restorative care programs. This New Edition Features: Completely updated information, including two new chapters on function-focused care for cognitively impaired adults, ethical issues, and patient-centered care A six-week education program that teaches practical application of restorative care nursing Helpful suggestions and strategies for motivating older adults and caregivers Education materials designed for nursing home, assisted living, and acute care settings, including required documentation and goal-setting forms Educational materials for family caregivers

Health Services for the Aged Under the Social Security Insurance System

This book, edited by a team of renowned older adult and nursing experts, considers the principles and practices of older adult nursing as well as the wider social considerations to do with an ageing population.

National Library of Medicine Audiovisuals Catalog

Restorative Care Nursing for Older Adults

Health resources are becoming increasingly constrained. So it is essential that professionals, and the public, recognise the need to work together in establishing local priorities and collaborate in their implementation. Priority Setting and The Public challenges many widely accepted beliefs and perceptions. It links together academic literature, critical overviews of methods and approaches with practical applications and original research. It shows the different approaches to engaging the public, challenges and how progress can be achieved. A wide number of

methods, from a range of disciplines are described, reviewed and guidance is given on factors to consider for selection. This book is essential reading for all health service and primary care organisations, especially those responsible for resource allocation, clinical governance and public health.

Nursing Care of the Hospitalized Older Patient

The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.

Ebersole and Hess' Gerontological Nursing & Healthy Aging - E-Book

Miller's Nursing for Wellness in Older Adults

Ebersole & Hess' Gerontological Nursing and Healthy Aging is the only gerontological nursing text that follows a wellness-based, holistic approach to older adult care. Designed to facilitate healthy aging regardless of the situation or disease process, this text goes beyond simply tracking recommended treatments to address complications, alleviate discomfort, and help older adults lead healthy lives. Featuring evidence-based practice boxes, safety alerts, expanded tables, and careful attention to age, gender, and cultural differences, Ebersole & Hess' Gerontological Nursing and Healthy Aging is the most complete text on the market. Focus on health and wellness helps you gain an understanding of the patient's experience. AACN and the Hartford Institute for Geriatric Nursing core competencies integrated throughout. Consistent chapter organization and pedagogy, including Learning Objectives, Glossary, and Research and Study Questions/Activities. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Careful attention to age, cultural, and gender differences helps you understand these important considerations in caring for older adults Expanded tables, boxes, and forms, including the latest scales and guidelines for proper health assessment make information easy to find and use. Activities and discussion questions at the end of every chapter equip you with the information you need to assess the patient. UPDATED! Healthy People 2020 boxes integrate information about healthy aging. NEW! Safety Alerts highlight safe practices and quality of care QSEN competencies. NEW! Chapter on Neurologic Compromise expands content on stroke and Parkinson's disease.

Ebersole and Hess' Gerontological Nursing and Healthy Aging

This new edition of Mental Health Nursing: an evidence-based approach has been fully updated to include the latest research-based guidance. A wide variety of

client problems is covered with , so that students are assured that what they learn is underpinned by a sound evidence base for treatment, and qualified mental health nurses can be confident that their practice is informed by the most up-to-date research. Skills acquisition is emphasised and experiential exercises encourage connections between theory and practice. Based on up-to-date, evidence-based information Emphasises skills acquisition Puts the nurse's role central to mental health care Contributors and editors are national and international experts in their fields Uses experiential exercises to reinforce learning and encourage connections from theory to practice

Residential Aged Care in Australia 2010-11

Now in its Fifth Edition, this text provides a comprehensive and wellness-oriented approach to the theory and practice of gerontologic nursing. Organized around the author's unique "functional consequences theory" of gerontologic nursing, the book explores "normal" age-related changes and risk factors that often interfere with optimal health and functioning, to effectively identify and teach health-promotion interventions. The author provides research-based background information and a variety of practical assessment and intervention strategies for use in every clinical setting. Highlights of this edition include expanded coverage of evidence-based practice, more first-person stories, new chapters, and clinical tools such as assessment tools recommended by the Hartford Institute of Geriatric Nursing.

Basic Geriatric Nursing - E-Book

As medical advances become more sophisticated, average life expectancies continue to grow. This presents significant challenges to the health care system, and caring for older people is now every nurse's concern. This book aims to help nursing students understand how to care for older people in any care setting. It uniquely focuses on person-centred, humanised care in addition to physical care, helping students to examine attitudes towards older people in health care and combat negative stereotypes. The book takes a positive stance on ageing, celebrating the fact that in the Western world we live longer and healthier with a focus on the well-being of the individual. Key features:

- Easy-to-read introduction for nursing students, with a chapter on making the most of placements with older people;
- Linked to the latest NMC Standards and Essential Skills Clusters for degree-level education;
- Theory is linked to practice through case studies and scenarios, emphasising the lived experiences of the older person;
- Plenty of activities help build critical thinking and graduate skills;
- Further resources on the book's website to help you in your teaching including additional questions and case studies, website links, and PDFs of useful resources.

Nursing and the Aged

Evidence Informed Nursing with Older People is an essential text for nursing students and registered nurses working with older people who are seeking to make connections between theory, evidence and value based gerontological practice. The rapidly rising aging global population requires that more attention is given to the needs and requirements of older people. This textbook is a key resource for

nursing students and registered nurses working with older people who wish to improve their practice. Evidence Informed Nursing with Older People takes a unique case-study approach, with individual chapters presenting nursing practice-based case studies on some of the most common areas of care faced by nurses working around the world with older people. Each case study illustrates the connections between practice, theory, evidence and values. User-friendly and accessible, this textbook includes key points, reflection activities, test points, and perspectives from older people throughout. Key features An up-to-date treatment of the nursing contribution to key geriatric syndromes International expert contributions from the UK, Sweden, Switzerland, Australia and China An evidence-based, case-study approach to the care of older people

Assessing the Nursing and Care Needs of Older Adults

Based on: Nursing for wellness in older adults / Carol A. Miller. 7th ed. 2015.

Retooling for an Aging America

The two-volume Manual of Nursing is a classic nursing text which broadens the student's scope of knowledge by discussing in-depth aspects of midwifery, critical care nursing, community nursing and psychiatric nursing. Each chapter has introductory notes and self-tests to assist and reinforce learning. Volumes 1 and 2 complement each other and students will find in Volume 2 the information they need to complete their study of subjects covered in Volume 1. Easy referencing ensures that the set (encapsulating the integrated nursing course) is of immediate and practical use. Volume 1 introduces certain basics of nursing theory and practice and includes a section dealing with nursing-related services. Volume 2 expands on the material in Volume 1, covering selected specialist subjects. The Manual of Nursing is an indispensable set, giving the student nurse and nurse practitioner a comprehensive overview of the diseases commonly encountered in a general hospital. Throughout, it emphasises the need to manage the patient as a bio-psycho-social being.

Nursing Older People

Prepare for a successful career in caring for geriatric populations! Williams' Basic Geriatric Nursing, 7th edition is an easy-to-read text which presents the theories and concepts of aging along with appropriate nursing interventions. This comprehensive book helps you understand the unique physiologic and psychosocial changes that affect the elderly adult. Threaded throughout this new edition are practical QSEN boxes and Nurse Alert features, which highlight safety, cultural considerations, health promotion, coordinated care, and home care specific to elderly patients. In addition, an online Study Guide, NCLEX®-PN review questions, and real-world clinical situation boxes help you to study for exams and apply concepts to practice. Coordinated Care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Clinical Situation boxes present patient scenarios with lessons for appropriate nursing care and patient sensitivity. UNIQUE! A FREE Study Guide, presented in a

comprehensive PDF format on Evolve, reinforces your understanding. 10th grade reading level makes learning easier for you. Nursing Care Plans include Critical Thinking boxes to help you to assimilate and synthesize information. Nursing Process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders. Cultural Considerations throughout text cover biocultural variations as well as health promotion for specific ethnic groups so you can provide culturally competent care. Health Promotion and Patient Teaching boxes highlight health promotion, disease prevention, and age-specific interventions. Home Health Considerations boxes provide information on home health care for the older adult. NEW! QSEN boxes provide you with the knowledge, skills, and attitudes necessary to continuously improve the quality and safety of care of the older adult. NEW! Nurse Alert feature emphasizes important safety and health promotion content specific to the elderly patient. NEW! Updated and expanded art program makes learning the material easier through clear and timely photographs and illustrations.

Evidence Informed Nursing with Older People

This convenient, concise version of the best-selling Mosby's Dictionary of Medicine, Nursing, and Health Professions provides condensed definitions to incorporate only

the most essential information. Mosby's Pocket Dictionary includes all of the information you need, including content on diseases, procedures, equipment, drugs, and so much more. Screened thumb tabs make it easy to locate definitions quickly, and a list of common medical abbreviations printed in the front and back covers make this a perfect reference for clinical practice. UNIQUE! Emphasis on nursing and health science terminology makes this the most useful pocket dictionary for students and practitioners in nursing and health professions. Its small size makes it easy to transport, and the sturdy, flexible cover increases the durability. The practical, straightforward alphabetical organization with no subentries and easy-to-use thumb tabs make it easy to find and understand information. UNIQUE! A section on nursing diagnoses with entries for all NANDA-approved nursing diagnoses prepares you for real-world practice. British spellings for selected entries help you recognize alternate spellings. Etymologies aid your understanding of medical terminology and help you develop a professional vocabulary. Pronunciations provided for key entries help you use terminology correctly in everyday practice. Includes 38,700 definitions, with over 5,000 new and 25,000 revised definitions, to reflect the latest information in all areas of nursing, medicine, and health professions. UNIQUE! Current definitions for all NANDA nursing diagnoses, NIC (Nursing Interventions Classifications) and NOC (Nursing Outcomes Classifications) ensure you have the most up-to-date information for clinical documentation, communication, and care evaluation.

Leadership Roles and Management Functions in Nursing

Ebersole and Hess' Gerontological Nursing & Healthy Aging4

Army Medical Department Handbook of Basic Nursing

2010 AJN Book of the Year Award Winner in Critical Care--Emergency Nursing! Designated a Doody's Core Title! "This evidence-based book is an excellent reference for ensuring high-quality management of the elderly and of their particular needs in the critical care setting." --AJN "[This] book's contents run the gamut of elder problems and care: physiology, pharmacology, nutrition, restraints, substance abuse.it is a compendium that can be used as a text or a resource." --Claire M. Fagin, PhD, RN, FAAN (From the Foreword) This book is an evidence-based, best-practices guide that directs the bedside care of critically ill elders. The book serves as a reference on major clinical issues for nurses working at the forefront of care-from nurses in critical care and step-down units to those in trauma and emergency departments. Nurse educators at all degree levels will also find this book to be useful as a textbook and resource for students. The authors provide evidence-based, practical guidelines for both the complex clinical and management aspects of care. The book offers comprehensive coverage of all the issues caregivers need to be up to date on, including the standards of practice for geriatric care, new technologies, pharmacotherapy, pain management issues, ethical issues, and much more. Key topics discussed: Strategies for patient safety for older patients in the intensive care setting Family responses to critical care of the older adult Infection, sepsis, and immune function Understanding and

managing sleep disorders in older patients in the ICU Heart failure in the critically ill older patient Substance abuse and withdrawal in elderly patients

Pathophysiology Applied to Nursing - E-Book

Use this convenient resource to formulate nursing diagnoses and create individualized care plans! Updated with the most recent NANDA-I approved nursing diagnoses, *Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 9th Edition* shows you how to build customized care plans using a three-step process: assess, diagnose, and plan care. It includes suggested nursing diagnoses for over 1,300 client symptoms, medical and psychiatric diagnoses, diagnostic procedures, surgical interventions, and clinical states. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) information to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. Unique! Provides care plans for every NANDA-I approved nursing diagnosis. Includes step-by-step instructions on how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. Includes pediatric, geriatric, multicultural, and home care interventions as necessary for plans of care. Includes examples of and suggested NIC interventions and NOC outcomes in each care plan. Allows quick access to specific symptoms and nursing diagnoses with alphabetical thumb tabs. Unique! Includes a Care Plan Constructor on the companion Evolve website for hands-on practice in creating customized plans of care. Includes the new 2009-2011 NANDA-I approved nursing diagnoses including 21 new and 8 revised diagnoses. Illustrates the Problem-Etiology-Symptom format with an easy-to-follow, colored-coded box to help you in formulating diagnostic statements. Explains the difference between the three types of nursing diagnoses. Expands information explaining the difference between actual and potential problems in performing an assessment. Adds detailed information on the multidisciplinary and collaborative aspect of nursing and how it affects care planning. Shows how care planning is used in everyday nursing practice to provide effective nursing care.

Nursing Care of Older People with Diabetes

The articles appearing in this geriatrics-focused issue are consistent with the collaborative and translational concepts held by a life course perspective. Each supports interprofessional collaboration and some are either authored or coauthored by interdisciplinary colleagues. Three goals are reflected in these articles: keeping community-dwelling older adults safe, sensible, and secure with solutions that will enable them to stay healthy, wise, and aware. Topics include maintaining physical functions, benefits and consequences of weight-bearing exercise on foot health; cancer prevention; managing nocturia's effect on sleep quality and safety; protection from financial exploitation; and providing safe and affordable living environments. Several articles address physical or cognitive challenges that include monitoring medication adherence, threat of anxiety and stigma in dementia, and approaches to managing self-care in the home for persons with dementia. These evidence-based articles address emerging and best practices

to support targeted interventions for persons in community-dwelling home settings. They provide a frame-work of person-centered approaches that foster good health in older age, a central tenet of aging in place and the global response to population aging.

Mosby's Pocket Dictionary of Medicine, Nursing & Health Professions - E-Book

"As one of the first books examining the core issues of accelerated nursing education, this one offers valuable information on the challenges and successes of this educational model."--Doody's Medical Reviews "Accelerated degree programs provide evidence that creativity in nursing program design can facilitate learning experiences that assure competence in the profession while also taking advantage of the knowledge, skills, and experiences the learner brings to our profession. Lessons learned from accelerated nursing programs can be applied in all our programs and enrich the education of professional nurses" Geraldine Polly Bednash, PhD, RN, FAAN CEO, AACN Over the last two decades, an unprecedented pool of nursing students-many with academic degrees and prior work experience-have entered accelerated programs. This is the first volume to examine core issues in accelerated nursing education, such as curriculum innovation, clinical immersion, recruitment and retention of students and faculty, and inter-professional education. It also addresses questions regarding: How accelerated nursing programs prepare graduates to meet changing health care needs Which curriculums and clinical models are best suited to accelerated education What teaching strategies and evidence-based practices ensure high quality results Key Features: Discusses enrollment and admission at the BSN and MSN levels Explores curriculum innovation, new teaching methods, and start-up programs Analyzes student retention and progression, with remediation strategies Presents faculty recruitment, retention, and development successes Addresses issues concerning second degree and second career students

Caring for Older People in Australia

This valuable resource is designed to provide a foundation for understanding major pathophysiological processes, applied pharmacology, and related nursing implications. It includes a holistic framework for assessing major health problems, based on fundamental concepts drawn from biological and behavioral sciences. The book's engaging case study approach builds in complexity with each chapter, illustrating applications of pathophysiology and pharmacology to nursing practice. Content has been assembled by academics and expert clinicians with input from physiologists, pharmacists, medical practitioners and other health professionals. Easy-to-follow body system organization explores pathophysiology concepts related to each system. The clinical case study approach featuring realistic scenarios emphasizes application of pathophysiology and pharmacology concepts in nursing practice. Each chapter includes questions and reflective learning exercises to reinforce important concepts. A holistic framework is presented as a method for assessing major health problems. Key aspects of biological and behavioral sciences are integrated into the chapters.

Nursing and the Aging Patient

As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

Nursing workforce recruitment and retention of nurses and nurse aides is a growing concern : statement of William J. Scanlon, Director, Health Care Issues, before the Committee on Health, Education, Labor and Pensions, United States Senate

Drawing on the multidisciplinary expertise of Australia's preeminent academics and clinicians from the aged care community, *Caring for Older People in Australia* presents undergraduate students with a holistic guide to care provision in a rapidly growing sector. In recognition that clinical competencies and 'issues' do not occur in isolation, the text integrates the most up-to-date multidisciplinary research and policy with the practical realities of caring for older people. *Caring for Older People in Australia* adopts a person-centred, primary healthcare focus to explore the most contemporary issues in aged care, such as: Sexuality Culture, diversity and spirituality Nutrition and hydration Prevention of falls Promoting continence Pharmacology and complementary therapies Attitudes and communication Care of the older person in the emergency department Rehabilitation, co-morbidity and complex care Pain and the older person Palliation Depression Understanding and responding to behaviours Bereavement *Caring for Older People in Australia* reflects the rich diversity of people, settings and approaches to care and provides students numerous opportunities for critical reflection throughout.

Manual of Nursing

The purpose of restorative care nursing is to take an active role in helping older adults maintain their highest level of function, thus preventing excess disability. This book was written to help formal and informal caregivers and administrators at all levels to understand the basic philosophy of restorative care, and be able to develop and implement successful restorative care programs. The book provides a complete 6-week education program in restorative care for caregivers, many suggestions for suitable activities, and practical strategies for motivating both older adults and caregivers to engage in restorative care. In addition, the book provides an overview of the requirements for restorative care across all settings, the necessary documentation, and ways in which to complete that documentation.
