PEDIATRIC FEVER. Fever in a child is a common emergency department presentation. About 20% will have fever without an identifiable source, and a small but significant number of these children will have an occult, serious bacterial infection (SBI) (1). UTIs are the most common occult SBI (2), especially in children

Emergency Medicine | IU School of Medicine

We love talking about what we do, but when it comes to demonstrating the impact we've had in emergency medicine, we thought some figures might be just what the doctor ordered. Helped 25m+ patients last year; Provided 300,000+ hours of CME credit; High job satisfaction with a 92% clinician retention rate

The American Academy of Emergency Medicine (AAEM) is the specialty society of emergency medicine. AAEM is a democratic organization committed to the following principles: Every individual should have unencumbered access to quality emergency care provided by a specialist in emergency medicine.

Pediatric Fever Without A Source | Emergency Medicine

Pediatrics (also spelled paediatrics or pædiatrics) is the branch of medicine that involves the medical care of infants, children, and adolescents. The American Academy of Pediatrics recommends people be under pediatric care through the age of 21 (though usually only minors are required to be under pediatric care). In the United Kingdom, pediatrics covers patients until age 18.
