INFORMASI KAPUAS (Jilid 10)

Using the latest clinical research and diagnoses, *Principles and Practice of Psychiatric Nursing, 10th Edition* provides a holistic, biopsychosocial approach to psychiatric nursing care. It follows the popular Stuart stress-adaptation framework and includes comprehensive coverage to simplify important nursing and medical concepts, promote quality and safety in care, and address psychobiology and psychopharmacology topics integral to today's psychiatry. New to this edition is a chapter on psychiatric care of military personnel, plus the latest on health care reform, prescription abuse, and obesity issues. Written by psychiatric nursing expert Gail W. Stuart, this market-leading text makes it easy to apply classroom theory to clinical practice. An easy-to-follow writing style makes it easy to understand both simple and complex topics. A well-rounded, collaborative approach provides coverage of all major psychiatric disorders from nursing and medical perspectives. The Stuart Stress Adaptation Model of health and wellness provides a consistent nursing-oriented framework, with clear explanations of biological, psychological, sociocultural, environmental, and legal-ethical components. An evidence-based practice approach bridges the gap between clinical research and everyday practice. Learning from a Clinical Case boxes begin disorders chapters with thought-provoking questions and end chapters with answers and feedback. Summarizing the Evidence boxes in the disorders chapters examine the research and findings that support psychiatric nursing care. A family focus and discussions of outpatient care reflect current trends in psychiatric nursing. A Patient Speaks and A Family Speaks boxes present short vignettes with the patient's and family's perspectives of the caregiving process. Competent Caring: A Clinical Exemplar of a Psychiatric Nurse boxes feature the experiences and personal insights of practicing psychiatric nurses. Medical and Nursing Diagnoses boxes and Detailed Diagnoses tables emphasize the interdisciplinary approach to patient care by presenting NANDA diagnoses relevant to specific disorders and describing the essential features of the related DSM-IV-TR diagnoses. Nursing Treatment Plan Summary tables present care plans including patient goals with nursing interventions and rationales. Patient Education Plan and Family Education Plan tables include key information that you need to share with the patient and his or her family to facilitate shorter hospital stays and more outpatient care. Therapeutic Dialogue boxes offer examples of nurse-patient interactions. Clinical examples include selected nursing diagnoses. Focus Points provide a comprehensive, point-by-point review of the important information in each chapter.

Perkembangan masyarakat mempunyai pengaruh pada perkembangan hukum yang berlaku, termasuk di Indonesia. Dalam hukum pidana yang umumnya diatur dalam KUHP, karena adanya perkembangan dalam masyarakat yang semakin maju/berkembang maka peraturan-peraturan yang ada tidak memadai lagi, maka dibuatlah Undang-undang baru yang lebih sesuai dengan perkembangan zaman. Apa saja delik-delik hukum yang ada di luar KUHP?? Baca selengkapnya di buku ini Buku Delik-delik yang berada di Luar KUHP ini diterbitkan oleh penerbit deepublish dan tersedia juga versi cetaknya. --Penerbit Deepublish, Deepublish, Hukum, KUHP, Dr. Hj. Tina Asmarawati, S.H., M.H.--

Mari bersatu memberantas bahaya penyalahgunaan narkoba (naza).

This title is now out of print. A new version with e-book is available under ISBN 9780702044809. This highly acclaimed step-by-step guide provides the relevant physiology, available evidence and rationale for each clinical skill. In a highly readable format, 'Skills for Midwifery Practice' offers self-assessment and short summaries, as well as detailed instruction on achieving a range of clinical skills. Tells you everything you need to know about: Abdominal examination Assessment of maternal and neonatal vital signs Infection control Hygiene needs Elimination management Drug administration Intrapartum and other related childbearing skills Assessment of the baby Infant nutrition Phlebotomy and intravenous therapy Moving and handling Perioperative skills Wound management Restricted mobility management Cardiopulmonary resuscitation for the woman and baby An essential midwifery textbook that covers the fundamental practical tasks required of the student Clear layout ensures easy access to information Highly illustrated to aid understanding Designed to improve competency when delivering basic skills Expanded chapter on the skills used during the first stage of labour Application of national guideline for the management of care Postnatal examination Discussion of the use of infrared touch/non-touch thermometry techniques Specific information on locating pulse sites More on SATS monitoring Increased information on the skills for the second stage of labour, infant feeding and daily examination of the baby Greater reference to infection control protocols and the reduction of hospital-acquired infections.

Agama tradisional

The argument of this book begins with the proposition that there are certain things we must understand about the criminal sanction before we can begin to talk sensibly about its limits. First, we need to ask some questions about the rationale of the criminal sanction. What are we trying to do by defining conduct as criminal and punishing people who commit crimes? To what extent are we justified in thinking that we can or ought to do what we are trying to do? Is it possible to construct an acceptable rationale for the criminal sanction enabling us to deal with the argument that it is itself an unethical use of social power? And if it is possible, what implications does that rationale have for the kind of conceptual creature that the criminal law is? Questions of this order make up Part I of the book, which is essentially an extended essay on the nature and

justification of the criminal sanction. We also need to understand, so the argument continues, the characteristic processes through which the criminal sanction operates. What do the rules of the game tell us about what the state may and may not do to apprehend, charge, convict, and dispose of persons suspected of committing crimes? Here, too, there is great controversy between two groups who have quite different views, or models, of what the criminal process is all about. There are people who see the criminal process as essentially devoted to values of efficiency in the suppression of crime. There are others who see those values as subordinate to the protection of the individual in his confrontation with the state. A severe struggle over these conflicting values has been going on in the courts of this country for the last decade or more. How that struggle is to be resolved is a second major consideration that we need to take into account before tackling the question of the limits of the criminal sanction. These problems of process are examined in Part II. Part III deals directly with the central problem of defining criteria for limiting the reach of the criminal sanction. Given the constraints of rationale and process examined in Parts I and II, it argues that we have over-relied on the criminal sanction and that we had better start thinking in a systematic way about how to adjust our commitments to our capacities, both moral and operational.

MENYUSUN DAN MENGEMBANGKAN MATERI PENYULUHAN KESEHATAN

Seiring perkembangan dunia medis yang sedemikian pesatnya, maka pelayanan kebidanan dituntut untuk mampu mengikuti dan mengimbangi perkembangan pelayanan medis dan kesehatan lainnya. Pelayanan kebidanan yang bermutu adalah pelayanan yang berdasarkan standar, dan kode etik bidan serta hubungan interpersonal yang adekuat. Dalam memberikan pelayanan kebidanan yang sesuai dengan standar, bidan menggunakan pendekatan manajemen bidan. Mengetahui hal tersebut maka penting bagi para bidan untuk mengetahui konsep dasar tentang bidan. Konsep kebidanan

merupakan suatu kerangka dalam bidang keilmuan bidan.

Skills for Midwifery Practice

Passages through Recovery presents an action plan for preventing relapse, one that can help us understand how recovery works and what is needed to move from active addiction to sobriety. "Abstinence from alcohol and other drugs is only the beginning of sobriety. It's the ticket to get into the theater, not the movie we are going to see."--Passages through Recovery One of the most important things we learn in recovery is that there really is a way out of all the misery--if we know which way to go. But abstinence from alcohol and other drugs is just the beginning of our journey, not our destination. And, that journey can be a rough one if we don't know what lies ahead. Based on the experiences of thousands of recovering men and women, Passages through Recovery presents an action plan for preventing relapse, one that can help us understand how recovery works and what is needed to move from active addiction to sobriety. Gorski's pioneering work describes six stages of recovery from chemical dependency and offers sound advice for working through the challenges of each stage--challenges that can create frustration and lead to relapse. Passages through Recovery clearly demonstrates that sobriety is more than just healing the damage. "It's a way of thinking, acting, and relating to others," Gorski writes, "that promotes continued physical, psychological, social, and spiritual health. The skills necessary for long-term sobriety are all directed at finding meaning and purpose in life." Use this book as a compass in your recovery to help you stay on course.

Selamatkan generasi muda bangsa dari bahaya penyalahgunaan narkotika

From clean drinking water, to seat belts, to immunizations, the impact of public health on every individual is undeniable. For undergraduates, an understanding of the foundations of public health is an essential step toward becoming an educated citizen. Public Health 101: Healthy People--Healthy Populations provides a big-picture, population perspective on the determinants of health and disease and the tools available to protect and promote health. It examines the full range of options for intervention including use of the healthcare system, the public health system, and society-wide systems such as laws and taxation. Through case studies, vignettes, and extensive examples, readers will come away with a clear

understanding of how public health affects them in their everyday lives. They will learn and apply frameworks for thinking about the issues of public health and gain a deeper understanding about the health news they are exposed to each day. Key Features: Public Health 101 fully implements the curriculum framework, learning objectives, and "enduring understandings" of undergraduate public health education as recommended by the Association of American Colleges and Universities (AAC&U)* and the Association for Prevention Teaching and Research (APTR). Frameworks for thinking, checklists, and step-by-step examples provide students with hands-on practice. Case studies, vignettes, and extensive illustrations reinforce the materials and provide interactive exercises for classroom discussions, homework, and examinations. A full package of instructor resources is available online at <http://publichealth.jbpub.com/essential/riegelman>. * To learn more about the AAC&U initiative, The Educated Citizen and Public Health, or to download the curriculum guide, log on to: www.aacu.org/public_health. There are lots of wrong ways to bring up your kids, but there are lots of right ones, too. There's no list of instructions you have to follow to the letter if you don't want your child to end up a loser. Richard Templar's *The Rules of Parenting, Expanded Edition* presents the principles to follow which you can adapt to suit you and your children. Templar -- author of *The Rules of Life* and many other best-sellers -- has brought together 100+ parenting tips you can start using instantly. Now updated and expanded with 10 brand-new rules, Templar's rules address everything you need to know from start to finish. Beginning with the first rule "Relax" and continuing through 100+ rules, this book presents a guide to everything a parent needs to know from toddling, school, boyfriends or girlfriends, through driving lessons and college. The book begins with a section that covers the most important rules, *The Rules for Staying Sane*. The rest of the sections cover some of the big questions of parenting, including the Attitude Rules, the Discipline Rules, the Sibling Rules, the School Rules, the Teenage Rules, the Crisis Rules, all the way up to the Grown-up Rules.

The Other Side of Criminology

On preventing drug abuse and methods of treatment for narcotic addicts in Indonesia; collection of articles.

Pengantar Ilmu Kebidanan dan Standar Profesi Kebidanan

Penyalahgunaan narkotika & zat adiktif

Preventing drug abuse and methods of treatment for narcotic addicts in Indonesia.

Panduan penanggulangan penyalahgunaan narkotika, psikotrophika, alkohol serta bahan psikoaktif lainnya

Didactically, a textbook of criminology should start at the beginning. The learning process, also an emotional process, begins in criminology with the concepts, views, emotions, attitudes and ideas we have regarding crime and criminals. Exploration of these underlying factors is one of the aims of the present book. We can free our thinking only by being aware of the significance of our own feelings and thoughts about a phenomenon like crime. 'That is the basic problem confronting us. In scientific thinking implicit postulates as to the *sensus communis*, unless recognized and 1 neutralized, grow into idols.' The fight against crime is one example of such an idol. Crimes and criminals exist only by virtue of reactions to certain forms of behavior. For this reason this book will begin by examining the reactions of society to crime. Criminology is primarily a science of others than offenders. In this sense I invert criminology. The history of criminology is not so much a history of offenders, 2 as a history of the reactions of those in power.

The Rules of Parenting

Internationally, there is now an acceptance of the need to develop new strategies in criminal justice which reflect restorative justice principles. At the same time, theory, research and practice in restorative justice is making rapid advances. This book provides an up to date and critical account of recent developments. It describes the practice of restorative justice with respect to young offenders in a number of jurisdictions - Australia, Canada, England, New Zealand, South Africa, the United States and various continental European countries. Research findings on the three most common formats - conferencing, victims offender mediation and circles - are presented. Critical issues for the future development of restorative justice are identified. Two main themes run through the collection - the potential of restorative processes to transform criminal justice processes and the potential for aboriginal or indigenous communities to impact on conventional processes. Contributors include active researchers and leading theorists from around the world.
